MAXXI Architettura. Catalogo delle Collezioni Margherita Guccione, 2017-05-04 Il volume documenta gli autori e le opere delle collezioni di architettura che sono frutto di concorsi, committenze e dei diversi progetti culturali prodotti dal MAXXI Architettura dal 2001 al 2017. L'edizione aggiornata e integrata in formato digitale rende conto anche delle oltre venti acquisizioni che hanno arricchito tra il 2015 e il 2017 il patrimonio museale. Il Catalogo al tempo stesso un agile strumento di riferimento per studiosi e ricercatori ma anche una sintesi densa e significativa della produzione architettonica contemporanea che il museo mette a disposizione del pubblico per rafforzare l'intrinseco rapporto tra collezioni, ricerca e mostre che è l'aspetto fondamentale della sua identità. I materiali relativi agli 85 autori in collezione raccolti in questi anni sono lo specchio fedele di un attività su più fronti: dalla conservazione all'esposizione, dalla ricerca alla comunicazione, dalla produzione alla documentazione, condotta con un unico fine: realizzare il primo museo italiano di architettura.

Constructions Michael Hensel, Christian Hermansen Cordua, 2015-05-04 The current trend for constructing experimental structures is now an international phenomenon. It has been taken up worldwide by design professionals, researchers, educators and students alike. There exist, however, distinct and significant tendencies within this development that require further investigation. This issue of AD takes on this task by examining one of the most promising trajectories in this area: the rise of intensely local architectures. In his seminal essay of 1983, Kenneth Frampton redefined Critical Regionalism by calling for an intensely local approach to architectural design. Today, Frampton's legacy is regaining relevance for a specific body of work in practice and education focused on the construction of experimental structures. Could this ultimately provide the seeds for a compelling and alternative approach to sustainable design? Contributors include Barbara Ascher, Peter Buchanan, Karl Otto Ellefsen, David Jolly, Monge Lisbet Harboe, David Leatherbarrow, Arete Markopoulou, Philip Nobel, Rodrigo Rubio, Søren Sørensen, Defne Sunguroğlu, Hensel. Featured practices: Renzo Piano Building Workshop, Rintala Eggertsson, SHoP, Studio Mumbai, TYIN tegnestue.

Ideas + Buildings Carl Knutson, Ron Stelmarski, 2008 Perkins Will a global architecture and design practice releases the first volume in a series of publications showcasing the talent of its teams and scope of their projects. *Ideas Buildings* defines the essential characteristics of innovation and excellence that make Perkins Will unique among architecture firms worldwide. The *Ideas Buildings* series will include essays on design theory, white papers on programmatic and technological innovation, client business issues and the environment, and ideas that relate directly to the practice and its work as well as broader social and cultural issues. *Ideas Buildings Collective Process Global*

Social and Sustainable Design includes 12 unique projects along with anecdotal information about the firm and its history providing insight into the firm who they are and what they do The book demonstrates the progress and energy of Perkins Will as the firm advances towards its 75th anniversary

The Architectural Detail Edward R. Ford, 2012-08-10 The Architectural Detail is author Edward R Ford s life s work and this may be his most important book to date Ford walks the reader through five widely accepted and wildly different definitions of detail in an attempt to find once and for all the quintessential definition of detail in architecture

The Sound of Architecture Angeliki Sioli, Elisavet Kiourtsoglou, 2022-05-18 How sound and its atmospheres transform architecture Acoustic atmospheres can be fleeting elusive or short lived Sometimes they are constant but more often they change from one moment to the next forming distinct impressions each time we visit certain places Stable or dynamic acoustic atmospheres have a powerful effect on our spatial experience sometimes even more so than architecture itself This book explores the acoustic atmospheres of diverse architectural environments in terms of scale program location or historic period providing an overview of how acoustic atmospheres are created perceived experienced and visualized The contributors explore how sound and its atmospheres transform architecture and space Their essays demonstrate that sound is a tangible element in the design and staging of atmospheres and that it should become a central part of the spatial explorations of architects designers and urban planners The Sound of Architecture will be of interest to architectural historians theorists students and practicing architects who will discover how acoustic atmospheres can be created without complex and specialized engineering It will also be of value to scholars working in the field of history of emotions as it offers evocative descriptions of acoustic atmospheres from diverse cultures and time periods
