Reorganizing Americas Defense Leadership In War And Peace:

Reorganizing the Joint Chiefs of Staff Gordon Lederman, 1999-11-30 The Goldwater Nichols Department of Defense Reorganization Act of 1986 is the most important legislation to affecting U S national defense in the last 50 years This act resulted from frustration in Congress and among certain military officers concerning what they believed to be the poor quality of military advice available to civilian decision makers It also derived from the U S military s perceived inability to conduct successful joint or multi service operations The act passes after four years of legislative debate designated the Chairman of the Joint Chiefs of Staff as the principal military advisor to the President and sought to foster greater cooperation among the military services Goldwater Nichols marks the latest attempt to balance competing tendencies within the Department of Defense namely centralization versus decentralization and geographic versus functional distributions of power As a result of the Goldwater Nichols Act the Chairman of the Joint Chiefs has achieved prominence but his assignment is somewhat contradictory the spokesman and thus the advocate for the Commander in Chief while simultaneously the provider of objective advice to the President While the act did succeed in strengthening the CINCs authority and in contributing to the dramatic U S achievements in the Gulf War the air and ground campaigns revealed weaknesses in the CINCs capability to plan joint operations In addition the increased role of the military in ad hoc peacekeeping operations has challenged the U S military s current organizational structure for the quick deployment of troops from the various services Rapid technological advances and post Cold War strategic uncertainty also complicate the U S military s organizational structure

Foregone Conclusions James H. Lebovic, 2019-04-08 With the end of the Cold War and the erosion of the Soviet threat the United States is reevaluating its defense policy and its acquisition of weapons James Lebovic shows that although current military missions are adapted to post Cold War realities the self defeating bias of bureaucrats and military services toward Cold War weaponry is still prevalent He examines the impact of this bias on the armed services as they assess threat generate requirements develop and change weapon concepts set production rates and engage in testing The author asserts that bias compromises service interests and broader military objectives and he offers general policy recommendations to put U S weapons acquisition on a more effective track

Airpower John Gooch, 2013-11-05 The nine contributors to this volume study the rapid development of airpower during the twentieth century as well as the methodological problems involved in assessing such change

Only the Most Able Stephen M. Duncan, 2012-10-05 The nature of the threats facing America today has drastically reduced the margin for error in senior political appointments In Only the Most Able Stephen M Duncan draws on a lifetime of military public service executive and legal experience to critique the political appointment process focusing on departments that deal with national security the Department of Defense and the Department of Homeland Security He looks at how the current methods for making appointments put people in positions for

which they are not qualified and not prepared Rather he argues appointments should be made on the basis of one's qualifications and merits those who lead our military should be people with military experience and those who must make executive decisions should be people who have served and excelled in an executive capacity Identifying the successful traits of leaders such as Winston Churchill General George Marshall nationally known business executives and others Duncan argues with unusual insight and candor why the quality and performance of senior political appointees who are charged even in part with the nation's security must be improved and offers specific recommendations on how this can be accomplished This timely book will appeal to Americans of all political persuasions as well as those with particular interests in political and military history

Clausewitz and Escalation Stephen J. Cimbala, 2012-11-12 Published in 1991 Clausewitz and Escalation is a valuable contribution to the field of Military Strategic Studies

Superpowers in Economic Decline Richard Cohen, Peter A. Wilson, 2021-05-30 This book first published in 1990 evaluates what future policy adjustments the US will have to make in order to successfully navigate through a national security environment radically altered from that of the past and one determined more than at any point in the post war period by the economic performance of both superpowers The structure of the book centres around two issues that will determine the future national security environment facing the US Discussed are stakes of the threat the response of the Soviet Union to the challenge of economic and related social political decline and its implications for the Soviet national defence effort Also studied are the resources available to the US to meet the threat the status of the US economic performance and the magnitude of resource stress it is likely to face in the future and its probable impact on the US national defence effort

American Political Scientists Glenn H. Utter, Charles Lockhart, 2002-10-30 This dictionary offers the only comprehensive collection of profiles of American political scientists each of whom contributed significantly to the intellectual development of American political science from its beginnings in the late 19th century to the present This second edition includes 22 new and 110 revised entries reflecting new scholarship that emerged during the 1990s Numerous experts helped the editors develop this consensus group of the 193 political scientists who have made the most important theoretical contributions over the years with attention to varied approaches and the different subfields Alphabetically arranged entries focus on the main ideas and major works by each scholar listing list the most important publications by and about the individual There are numerous cross references to show how the work of one scholar has influenced another in the discipline Appendices list the political scientists by degree granting institutions and by major fields A short bibliography points to important general readings about the profession A general index makes this major reference easily accessible for broad interdisciplinary research

Encyclopedia of Military Science G. Kurt Piehler, 2013-07-24 The Encyclopedia of Military Science provides a comprehensive ready reference on the organization traditions training purpose and functions of today's military Entries in this four volume work include coverage of the duties responsibilities and authority of military personnel and an understanding of strategies and tactics of the modern military and

how they interface with political social legal economic and technological factors A large component is devoted to issues of leadership group dynamics motivation problem solving and decision making in the military context Finally this work also covers recent American military history since the end of the Cold War with a special emphasis on peacekeeping and peacemaking operations the First Persian Gulf War the events surrounding 9 11 and the wars in Afghanistan and Iraq and how the military has been changing in relation to these events Click here to read an article on The Daily Beast by Encyclopedia editor G Kurt Piehler Why Don t We Build Statues For Our War Heroes Anymore [Civil-military Relations](#) ,1993 **Air University Library Index to Military Periodicals** ,1987 **Parameters** ,1996 **The Rise of the Gunbelt** Ann R. Markusen,1991 Index and bibliographical references included **Who Guards the Guardians and How** Thomas C. Bruneau,Scott D. Tollefson,2009-06-03 The continued spread of democracy into the twenty first century has seen two thirds of the almost two hundred independent countries of the world adopting this model In these newer democracies one of the biggest challenges has been to establish the proper balance between the civilian and military sectors A fundamental question of power must be addressed who guards the guardians and how In this volume of essays contributors associated with the Center for Civil Military Relations in Monterey California offer firsthand observations about civil military relations in a broad range of regions including Latin America Africa Asia and Eastern Europe Despite diversity among the consolidating democracies of the world their civil military problems and solutions are similar soldiers and statesmen must achieve a deeper understanding of one another and be motivated to interact in a mutually beneficial way The unifying theme of this collection is the creation and development of the institutions whereby democratically elected civilians achieve and exercise power over those who hold a monopoly on the use of force within a society while ensuring that the state has sufficient and qualified armed forces to defend itself against internal and external aggressors Although these essays address a wide variety of institutions and situations they each stress a necessity for balance between democratic civilian control and military effectiveness **Cooperation and Discord in U.S.-Soviet Arms Control** Steve Weber,2014-07-14 If international cooperation was difficult to achieve and to sustain during the Cold War why then were two rival superpowers able to cooperate in placing limits on their central strategic weapons systems Extending an empirical approach to game theory particularly that developed by Robert Axelrod Steve Weber argues that although nations employ many different types of strategies broadly consistent with game theory s tit for tat only strategies based on an ideal type of enhanced contingent restraint promoted cooperation in U S Soviet arms control As a theoretical analysis of the basic security behaviors of states the book has implications that go beyond the three bilateral arms control cases Weber discusses implications that remain important despite the end of superpower rivalry An important theoretical analysis of cooperation between the U S and the Soviet Union in the area of arms control An excellent work on a subject that has received very little attention Choice Originally published in 1991 The Princeton Legacy Library uses the latest print on demand technology to again make

available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Civil-military Relations in Latin America David Pion-Berlin, 2001 The armed forces may no longer rule nations throughout Latin America but they continue to influence democratic governments across the region In nine original thought provoking essays this book offers fresh theoretical insights into the dilemmas facing

Trillions for Military Technology J. Alic, 2007-09-03 Trillions for Military Technology explains why the weapons purchased by the U S Department of Defense cost so much why it takes decades to get them into production even as innovation in the civilian economy becomes ever more frenetic and why some of those weapons don t work very well despite expenditures of many billions of dollars It also explains what do about these problems The author argues that the internal politics of the armed services make weapons acquisition almost unmanageable Solutions require empowering civilian officials and reforms that will bring choice of weapons into the sunshine of public debate

Weapons Under Fire Lauren Holland, 2013-11-26 First Published in 1997 In an effort to find the validity of middle ground this book offers a comprehensive analysis that looks further than the House Committee on National Security s actions on the B 2 bomber President Clinton s campaign promise to support the Seawolf submarine and the Pentagon s use of a concurrent and risky management strategy for the 71 6 billion F 22 fighter aircraft program It provides a dissection of the decision making process for a representative sample of major weapons systems to invalidate the claims that pork and malfeasance are both pervasive and determinate

Flawed by Design Amy B. Zegart, 1999 Challenging the belief that national security agencies work well this book asks what forces shaped the initial design of the Central Intelligence Agency the Joint Chiefs of Staff and the National Security Council in ways that meant they were handicapped from birth

Afterglow Or Adjustment? Mark Randal Brawley, 1999 Is the United States overstretched in its international commitments This book examines differing responses to overstretch in modern history focusing mostly on military and economic policies in the U S and Britain over the past century
