Replaceable You Engineering The Body In Postwar America:

Replaceable You David Serlin, 2004-06-15 After World War II the United States underwent a massive cultural transformation that was vividly realized in the development and widespread use of new medical technologies Plastic surgery wonder drugs artificial organs and prosthetics inspired Americans to believe in a new age of modern medical miracles The nationalistic pride that flourished in postwar society meanwhile encouraged many Americans to put tremendous faith in the power of medicine to rehabilitate and otherwise transform the lives and bodies of the disabled and those considered abnormal **Replaceable You** revisits this heady era in American history to consider how these medical technologies and procedures were used to advance the politics of conformity during the 1950s **Contours of Ableism** F.

Campbell, 2009-09-16 Challenging notions of what constitutes normal and pathological bodies this ambitious agenda setting study theoretically reinvigorates disability studies by reconceptualising it as studies of ableism focusing on the practices and formations of able bodiedness to uncover what it means to be able rather than disabled **Chronic Youth** Julie Passanante Elman, 2014-10-20 The teenager has often appeared in culture as an anxious figure the repository for American dreams and worst nightmares at once on the brink of success and imminent failure Spotighting the troubled teen as a site of pop cultural medical and governmental intervention **Chronic Youth** traces the teenager as a figure through which broad threats to the normative order have been negotiated and contained Examining television popular novels science journalism new media and public policy Julie Passanante Elman shows how the teenager became a cultural touchstone for shifting notions of able bodiedness heteronormativity and neoliberalism in the late twentieth century By the late 1970s media industries as well as policymakers began developing new problem driven edutainment prominently featuring narratives of disability from the immunocompromised *The Boy in the Plastic Bubble* to ABC's *After School Specials* and teen sick lit Although this conjoining of disability and adolescence began as a storytelling convention disability became much more than a metaphor as the process of medicalizing adolescence intensified by the 1990s with parenting books containing neuro scientific warnings about the incomplete and volatile teen brain Undertaking a cultural history of youth that combines disability queer feminist and comparative media studies Elman offers a provocative new account of how American cultural producers policymakers and medical professionals have mobilized discourses of disability to cast adolescence as a treatable condition By tracing the teen's uneven passage from postwar rebel to 21st century patient **Chronic Youth** shows how teenagers became a lynchpin for a culture of perpetual rehabilitation and neoliberal governmentality [The Look of a Woman](#) Eric Plemons, 2017-07-27

Developed in the United States in the 1980s facial feminization surgery FFS is a set of bone and soft tissue reconstructive surgical procedures intended to feminize the faces of trans women While facial surgery was once considered auxiliary to genital surgery many people now find that these procedures confer distinct benefits according to the different models of sex and gender in which they intervene Surgeons advertise that FFS not only improves a trans woman's appearance it allows her

to be recognized as a woman by those who see her In *The Look of a Woman* Eric Plemons foregrounds the narratives of FFS patients and their surgeons as they move from consultation and the operating room to postsurgery recovery He shows how the increasing popularity of FFS represents a shift away from genital based conceptions of trans selfhood in ways that mirror the evolving views of what is considered to be good trans medicine Outlining how conflicting models of trans therapeutics play out in practice Plemons demonstrates how FFS is changing the project of surgical sex reassignment by reconfiguring the kind of sex that surgery aims to change
