Representations Of Reductive Groups:

Representations of Reductive Groups Roger W. Carter, Meinolf Geck, 1998-09-03 This volume provides a very accessible introduction to the representation theory of reductive algebraic groups **Unitary Representations of**

Reductive Lie Groups. (AM-118), Volume 118 David A. Vogan Jr., 2016-03-02 This book is an expanded version of the Hermann Weyl Lectures given at the Institute for Advanced Study in January 1986 It outlines some of what is now known about irreducible unitary representations of real reductive groups providing fairly complete definitions and references and sketches at least of most proofs The first half of the book is devoted to the three more or less understood constructions of such representations parabolic induction complementary series and cohomological parabolic induction This culminates in the description of all irreducible unitary representation of the general linear groups For other groups one expects to need a new construction giving unipotent representations The latter half of the book explains the evidence for that expectation and suggests a partial definition of unipotent representations *Representations of Reductive Groups* Avraham Aizenbud, Dmitry Gourevitch, David Kazhdan, Erez M. Lapid, 2019-02-20 This volume contains the proceedings of the Conference on Representation Theory and Algebraic Geometry held in honor of Joseph Bernstein from June 11 16 2017 at the Weizmann Institute of Science and The Hebrew University of Jerusalem The topics reflect the decisive and diverse impact of Bernstein on representation theory in its broadest scope The themes include representations of p adic groups and Hecke algebras in all characteristics representations of real groups and supergroups theta correspondence and automorphic forms

Representations of Reductive Groups Monica Nevins, Peter E. Trapa, 2015-12-18 Over the last forty years David Vogan has left an indelible imprint on the representation theory of reductive groups His groundbreaking ideas have lead to deep advances in the theory of real and p adic groups and have forged lasting connections with other subjects including number theory automorphic forms algebraic geometry and combinatorics *Representations of Reductive Groups* is an outgrowth of the conference of the same name dedicated to David Vogan on his 60th birthday which took place at MIT on May 19 23 2014 This volume highlights the depth and breadth of Vogan's influence over the subjects mentioned above and point to many exciting new directions that remain to be explored Notably the first article by McGovern and Trapa offers an overview of Vogan's body of work placing his ideas in a historical context Contributors Pramod N Achar Jeffrey D Adams Dan Barbasch Manjul Bhargava C dric Bonnaf Dan Ciubotaru Meinolf Geck William Graham Benedict H Gross Xuhua He Jing Song Huang Toshiyuki Kobayashi Bertram Kostant Wenjing Li George Lusztig Eric Marberg William M McGovern Wilfried Schmid Kari Vilonen Diana Shelstad Peter E Trapa David A Vogan Jr Nolan R Wallach Xiaoheng Wang Geordie Williamson

Multipliers and a Paley Wiener theorem for real reductive groups **Real Reductive Groups I** Nolan R.

Wallach,1988-03-01 Real Reductive Groups I is an introduction to the representation theory of real reductive groups It is based on courses that the author has given at Rutgers for the past 15 years It also had its genesis in an attempt of the author to complete a manuscript of the lectures that he gave at the CBMS regional conference at The University of North Carolina at Chapel Hill in June of 1981 This book comprises 10 chapters and begins with some background material as an introduction The following chapters then discuss elementary representation theory real reductive groups the basic theory of g K modules the asymptotic behavior of matrix coefficients The Langlands Classification a construction of the fundamental series cusp forms on G character theory and unitary representations and g K cohomology This book will be of interest to mathematicians and statisticians *Representations of Reductive Groups* Avraham Aizenbud,2019 This volume contains the proceedings of the Conference on Representation Theory and Algebraic Geometry held in honor of Joseph Bernstein from June 11 16 2017 at the Weizmann Institute of Science and The Hebrew University of Jerusalem The topics reflect the decisive and diverse impact of Bernstein on representation theory in its broadest scope The themes include representations of p adic groups and Hecke algebras in all characteristics representations of real groups and supergroups theta correspondence and automorphic forms

Representation Theory of Finite Reductive Groups Marc Cabanes,Michel Enguehard,2004-01-29 Publisher Description

Characters of Reductive Groups over a Finite Field. (AM-107), Volume 107 George Lusztig,2016-03-02 This book presents a classification of all complex irreducible representations of a reductive group with connected centre over a finite field To achieve this the author uses étale intersection cohomology and detailed information on representations of Weyl groups

Representations of Reductive Groups Over Finite Rings and Extended Deligne-Lusztig Varieties Alexander Stasiński,2004

Continuous Cohomology, Discrete Subgroups, and Representations of Reductive Groups Armand Borel,Nolan R. Wallach,2013-11-21 It has been nearly twenty years since the first edition of this work In the intervening years there has been immense progress in the use of homological algebra to construct admissible representations and in the study of arithmetic groups This second edition is a corrected and expanded version of the original which was an important catalyst in the expansion of the field Besides the fundamental material on cohomology and discrete subgroups present in the first edition this edition also contains expositions of some of the most important developments of the last two decades

Representations Of Real And P-adic Groups Eng-chye Tan,Chen-bo Zhu,2004-04-15 The Institute for Mathematical

Sciences at the National University of Singapore hosted a research program on Representation Theory of Lie Groups from July 2002 to January 2003. As part of the program, tutorials for graduate students and junior researchers were given by leading experts in the field. This invaluable volume collects the expanded lecture notes of those tutorials. The topics covered include uncertainty principles for locally compact abelian groups, fundamentals of representations of p -adic groups, the Harish-Chandra-Howe local character expansion, classification of the square integrable representations modulo cuspidal data, Dirac cohomology, and Vogan's conjecture on multiplicity-free actions, and Schur-Weyl-Howe duality. The lecturers include Tomasz Przebinda from the University of Oklahoma, USA; Gordan Savin from the University of Utah, USA; Stephen DeBacker from Harvard University, USA; Marko Tadi from the University of Zagreb, Croatia; Jing Song Huang from The Hong Kong University of Science and Technology, Hong Kong; Pavle Pandić from the University of Zagreb, Croatia; Chal Benson and Gail Ratcliff from East Carolina University, USA; and Roe Goodman from Rutgers University, USA.

The Langlands Classification and Irreducible Characters for Real Reductive Groups J. Adams, D. Barbasch, D.A. Vogan, 2012-12-06. This monograph explores the geometry of the local Langlands conjecture. The conjecture predicts a parametrization of the irreducible representations of a reductive algebraic group over a local field in terms of the complex dual group and the Weil-Deligne group. For p -adic fields, this conjecture has not been proved, but it has been refined to a detailed collection of conjectural relationships between p -adic representation theory and geometry on the space of p -adic representation theory and geometry on the space of p -adic Langlands parameters. This book provides an introduction to some modern geometric methods in representation theory. It is addressed to graduate students and research workers in representation theory and in automorphic forms.

Forty Years Of Algebraic Groups, Algebraic Geometry, And Representation Theory In China: In Memory Of The Centenary Year Of Xihua Cao's Birth Jie Du, Jianpan Wang, Lei Lin, 2022-10-21. Professor Xihua Cao (1920-2005) was a leading scholar at East China Normal University (ECNU) and a famous algebraist in China. His contribution to the Chinese academic circle is particularly the formation of a world-renowned ECNU School in algebra, covering research areas include algebraic groups, quantum groups, algebraic geometry, Lie algebra, algebraic number theory, representation theory, and other hot fields. In January 2020, in order to commemorate Professor Xihua Cao's centenary birthday, East China Normal University held a three-day academic conference. Scholars at home and abroad gave dedications or delivered lectures in the conference. This volume originates from the memorial conference, collecting the dedications of scholars, reminiscences of family members, and 16 academic articles written based on the lectures in the conference, covering a wide range of research hot topics in algebra. The book shows not only scholars' respect and memory for Professor Xihua Cao but also the research achievements of Chinese scholars at home and abroad.
