Reproductive Biology Of Invertebrates Vol 9c Progress In Male Gamete Ultrastructure And Phylogeny:

Treatise on Zoology - Anatomy, Taxonomy, Biology. The Myriapoda, Volume 1 Alessandro Minelli, 2011-03-21
Myriapods are the only major zoological group for which a modern encyclopedic treatment has never been produced. In particular, this was the single major gap in the largest zoological treatise of the XIX century Grassé's *Traité de Zoologie* whose publication has recently been stopped. The two volumes of *The Myriapoda* fill that gap with an updated treatment in the English language. Volume I opens with an introductory treatment of myriapod affinities and phylogeny. The following chapters are mostly devoted to the Chilopoda or centipedes, extensively treated from the point of view of external and internal morphology, physiology, reproduction, development, distribution, ecology, phylogeny, and taxonomy. All currently recognized suprageneric and generic taxa are considered. Additional chapters deal with the two smaller myriapod classes, the Symphyla and the Pauropoda. All groups and features are extensively illustrated by line drawings and micrographs, and living specimens of representative species of the main groups are presented in color photographs.

Treatise on Zoology - Anatomy, Taxonomy, Biology. The Myriapoda Alessandro Minelli, 2011-03-21
The *Myriapoda* is the first comprehensive monograph ever on all aspects of myriapod biology, including external and internal morphology, physiology, reproduction, development, distribution, ecology, phylogeny, and taxonomy. It is thus of major interest for all zoologists and soil biologists.

Treatise on Zoology - Anatomy, Taxonomy, Biology. The Crustacea, Volume 9 Part B Frederick Schram, Carel von Vaupel Klein, 2012-03-20
This volume 9B covers the infraorders of the Astacidea that were not covered in volume 9A: Enoplometopidea, Nephropoidea, and Glypheidea, as well as the Axiidea, Gebiidea, and Anomura. With the publication of this ninth volume in the *Treatise on Zoology: The Crustacea*, we depart from the sequence one would normally expect. Some crustacean groups never had a French version produced, namely the orders Stomatopoda, Euphausiacea, Amphionidacea, and Decapoda, the largest contingent of these involved. Decapoda, a group of tremendous diversity and for which we have great depth of knowledge, was the organization and production of these new chapters began independently from the other chapters and volumes. Originally envisioned by the editorial team to encompass volume 9 of the series, it quickly became evident that the depth of material for such a volume must involve the printing of separate fascicles. These new chapters are now nearing completion, and the decision was made to begin publication of volume 9 immediately rather than wait until after volumes 3 through 8 would appear.
