Reproductive Technologies A Reader:

Reproductive Technologies Thomas A. Shannon, 2003-12-17 Over a decade ago the field of bioethics was established in response to the increased control over the design of living organisms afforded by both medical genetics and biotechnology. Since its introduction, bioethics has become established as an academic discipline with journals and professional societies, is covered regularly in the media, and affects people everyday around the globe. In response to the increasing need for information about medical genetics and biotechnology as well as the ethical issues these fields raise, Sheed Ward proudly presents the Readings in Bioethics Series. Edited by Thomas A. Shannon, the series provides anthologies of critical essays and reflections by leading ethicists in four pivotal areas: reproductive technologies, genetic technologies, death and dying, and health care policy. The goal of this series is twofold: first, to provide a set of readers on thematic topics for introductory or survey courses in bioethics or for courses with a particular theme or time limitation; second, each of the readers in this series is designed to help students focus more thoroughly and effectively on specific topics that flesh out the ethical issues at the core of bioethics. The series is also highly accessible to general readers interested in bioethics. This volume collects critical essays by leading scholars on reproductive technologies, abortion, in vitro fertilization, prenatal diagnosis, and cloning. Included in this volume are David Adamson, James P. Toner, Thomas A. Shannon, Bonnie Steinbock, Laura A. Schieve, Richard J. Paulson, G. Pennings, Thomas H. Murray, Lori B. Andrews, J. M. Phillips. **Reproductive Technologies**, 1991 *Reader's Guide to Lesbian and Gay Studies* Timothy Murphy, 2013-10-18 The Reader's Guide to Lesbian and Gay Studies surveys the field in some 470 entries on individuals, Adrienne Rich, arts and cultural studies, Dance, ethics, religion, and philosophical issues, Monastic Traditions, historical figures, periods, and ideas, Germany between the World Wars, language, literature, and communication, British Drama, law and politics, Child Custody, medicine and biological sciences, Health and Illness, and psychology, social sciences, and education, Kinsey Report. *Reader's Guide to Women's Studies* Eleanor Amico, 1998-03-20 The Reader's Guide to Women's Studies is a searching and analytical description of the most prominent and influential works written in the now universal field of women's studies. Some 200 scholars have contributed to the project, which adopts a multi-layered approach, allowing for comprehensive treatment of its subject matter. Entries range from very broad themes such as Health, General Works, to entries on specific individuals or more focused topics such as Doctors. Reproductive Health and Assisted Reproductive Technologies In Sub-Saharan Africa Olanike S. Adelakun, Erebi Ndoni, 2023-08-28 This book focuses on reproductive health rights and assisted reproductive technologies (ART) in sub-Saharan Africa. Each chapter is connected to the other by focusing on different aspects of ART as a means of achieving conception. Topics such as regulation of ART, practices, surrogacy, and specific aspects of ART which are gradually becoming acceptable but largely unregulated in Africa, promises to be of interest to scholars, researchers, and fertility practitioners. Research in the book takes a rights-based approach and ethical analysis of ART practice in sub-Saharan Africa by authors from diverse backgrounds, bringing together

law and society perspectives Readers stand to gain new knowledge on the societal legal medical and psychological requirements effects and challenges of reproductive health rights and ART in the African context The book is also relevant to UN Sustainable Development Goal 3 Good Health and Well being given that it promotes and advocates for access to reproductive healthcare for persons who have difficulty or are unable to conceive without medical assistance
