**Field Guide to the Birds of South-East Asia** Craig Robson, 2020-02-06  
This is the first time flexi cover edition of this classic field guide which is the definitive volume on the region's birdlife. This award-winning book which was first published in 2000 was fully updated in 2009 to include 76 new species for the region that were recent new discoveries for science, taxonomic splits or had been recorded there for the first time. This comprehensive field guide to the birds of South East Asia covers all of the 1 327 species recorded in the region and each has been fully illustrated. This edition has many new artworks and 16 more colour plates than the original guide and the text has been meticulously updated to take in all the most recent information. The vast diversity of South East Asian birdlife attracts increasing numbers of birdwatchers each year. Covering Thailand, Vietnam, Singapore, Peninsular Malaysia, Myanmar, Laos and Cambodia, this unique and indispensable guide covers in detail the identification, voice, breeding status, habitat and distribution of all the species and distinctive subspecies of the region.

**Mammals of Africa: Volume I** Jonathan Kingdon, 2014-11-20  
Mammals of Africa MoA is a series of six volumes which describes in detail every currently recognized species of African land mammal. This is the first time that such extensive coverage has ever been attempted and the volumes incorporate the very latest information and detailed discussion of the morphology, distribution, biology and evolution, including reference to fossil and molecular data of Africa's mammals. With more than 1 160 species and 16 18 orders, Africa has the greatest diversity and abundance of mammals in the world. The reasons for this and the mechanisms behind their evolution are given special attention in the series. Each volume follows the same format with detailed profiles of every species and higher taxa. The series includes hundreds of colour illustrations and pencil drawings by Jonathan Kingdon, highlighting the morphology and behaviour of the species concerned, as well as line drawings of skulls and jaws by Jonathan Kingdon and Meredith Happold. Every species also includes a detailed distribution map. Edited by Jonathan Kingdon, David Happold, Tom Butynski, Mike Hoffmann, Meredith Happold and Jan Kalina and written by more than 350 authors, all experts in their fields, Mammals of Africa is as comprehensive a compendium of current knowledge as is possible. Extensive references alert readers to more detailed information. This first volume in the series comprises eight introductory chapters covering topics such as evolution, geography and geology, biotic zones, classification, behaviour and morphology. The rest of the book is devoted to the Afrotheria, a grouping that comprises six orders and 49 species: these are the hyraxes, elephants, manatees, otter shrews, golden moles, sengis, elephant shrews and Aardvark.

The Quaternary in the Tropics Klaus Heine, 2024-07-22 The Ice Age Quaternary is a period of extreme climate fluctuations that led to the growth and melting of massive ice sheets in the high latitudes Tropical deserts savannas rainforests and mountainous regions experienced equal dramatic climatic changes of which the traces are preserved in sedimentary deposits The knowledge of tropical climate history is of paramount importance because in the tropics and marginal tropics natural and more recently human induced processes significantly control global climate Yet relatively few palaeoclimate records are known from these regions This book presents the climate archives of the tropics and critically discusses their palaeoclimatic informative value Based on decades of research the author demonstrates that a lack of geocological knowledge leads to misinterpretations in modeling climate futures The results presented here call for a correction of many widely held views about the role of atmospheric greenhouse gases in global warming over the past 150 years The book is intended for natural scientists of all disciplines who are looking for a synopsis of the problem area Our climate in the past present and future in the tropics      The History of the European Fauna Robert Francis Scharff, 1899

**Biodiversity Hotspots** Frank E. Zachos, Jan Christian Habel, 2011-09-15 Biodiversity and its conservation are among the main global topics in science and politics and perhaps the major challenge for the present and coming generations This book written by international experts from different disciplines comprises general chapters on diversity and its measurement

human impacts on biodiversity hotspots on a global scale human diversity itself and various geographic regions exhibiting high levels of diversity The areas covered range from genetics and taxonomy to evolutionary biology biogeography and the social sciences In addition to the classic hotspots in the tropics the book also highlights various other ecosystems harbouring unique species communities including coral reefs and the Southern Ocean The approach taken considers but is not limited to the original hotspot definition *sensu stricto* and presents a chapter introducing the 35th hotspot the forests of East Australia While due to a bias in data availability the majority of contributions on particular taxa deal with vertebrates and plants some also deal with the less studied invertebrates This book will be essential reading for anyone involved with biodiversity particularly researchers and practitioners in the fields of conservation biology ecology and evolution
