PaintingDigitalPhotography Carl Robinson, 2019-01-29 We live in a digital age where the mediums of art are inextricably bound to the binary code and painting and photography are redefined in their interconnected relationship through digital reconfiguration As digitisation unmoors these mediums from their traditional supports their modes of production display and dissemination shift These changes bring about new ways of creating and engaging with artworks Through this the innate qualities of the mediums previously anchored in their analogue nature are re evaluated through their connection with the digital Born out of the PaintingDigitalPhotography conference held at QUAD Derby UK in May 2017 this anthology of essays investigates aspects of interconnectivity between painting digital and photography in contemporary art practices It contributes to critical discourses around networks of associations by examining where syntheses occur and differences remain between these mediums at the beginning of the twenty first century *Res: Anthropology and Aesthetics, 36, Autumn 1999*

Scholten, 2025-06-30 In these days the most famous modeller this is how the Dutch sculptor Adriaen de Vries 1556 1626 was characterised in 1621 A virtuoso modeller De Vries explored new ways to enliven his art His bronze sculptures were made in

a radically new sketchy style with free figure compositions and a vigorous treatment of human anatomy often balancing on the border between realism and distortion This book explores how and why a Late Renaissance sculptor broke so drastically with the prevailing stylistic paradigm of his time in search of *vivezza* natural liveliness and the *viva figura* the statue on the brink of coming to life Adriaen de Vries aimed to create sculptures that move in the metaphorical no man s land between death and life back and forth from inert bronze to apparent vitality as this study will argue

Nature's Experiments and the Search for Symbolist Form Allison Morehead,2017-02-27 This provocative study argues that some of the most inventive artwork of the 1890s was strongly influenced by the methods of experimental science and ultimately foreshadowed twentieth century modernist practices Looking at avant garde figures such as Maurice Denis douard Vuillard August Strindberg and Edvard Munch Allison Morehead considers the conjunction of art making and experimentalism to illuminate how artists echoed the spirit of an increasingly explorative scientific culture in their work and processes She shows how the concept of nature s experiments the belief that the study of pathologies led to an understanding of scientific truths above all about the human mind and body extended from the scientific realm into the world of art underpinned artists solutions to the problem of symbolist form and provided a ready made methodology for fin de si cle truth seekers By using experimental methods to transform symbolist theories into visual form these artists broke from naturalist modes and interrogated concepts such as deformation automatism the arabesque and madness to create modern works that were radically and usefully strange Focusing on the scientific psychological and experimental tactics of symbolism *Nature s Experiments and the Search for Symbolist Form* demystifies the avant garde value of experimentation and reveals new and important insights into a foundational period for the development of European modernism

Bauhaus Bodies Elizabeth Otto,Patrick Rössler,2019-01-24 A century after the Bauhaus s founding in 1919 this book reassesses it as more than a highly influential art architecture and design school In myriad ways emerging ideas about the body in relation to health movement gender and sexuality were at the heart of art and life at the school *Bauhaus Bodies* reassesses the work of both well known Bauhaus members and those who have unjustifiably escaped scholarly scrutiny its women in particular In fourteen original cutting edge essays by established experts and emerging scholars this book reveals how Bauhaus artists challenged traditional ideas about bodies and gender Written to appeal to students scholars and the broad public *Bauhaus Bodies* will be essential reading for anyone interested in modern art architecture design history and gender studies it will define conversations and debates during the 2019 centenary of the Bauhaus s founding and beyond

Renaissance Theory James Elkins,Robert Williams,2008-04-01 *Renaissance Theory* presents an animated conversation among art historians about the optimal ways of conceptualizing Renaissance art and the links between Renaissance art and contemporary art and theory This is the first discussion of its kind involving not only

questions within Renaissance scholarship but issues of concern to art historians and critics in all fields Organized as a virtual roundtable discussion the contributors discuss rifts and disagreements about how to understand the Renaissance and debate the principal texts and authors of the last thirty years who have sought to reconceptualize the period They then turn to the issue of the relation between modern art and the Renaissance Why do modern art historians and critics so seldom refer to the Renaissance Is the Renaissance our indispensable heritage or are we cut off from it by the revolution of modernism The volume includes an introduction by Rebecca Zorach and two final synoptic essays as well as contributions from some of the most prominent thinkers on Renaissance art including Stephen Campbell Michael Cole Frederika Jakobs Claire Farago and Matt Kavalier

Inadvertent Images Peter Geimer, 2018-03-14 As an artistic medium photography is uniquely subject to accidents or disruptions that can occur in the making of an artwork Though rarely considered seriously those accidents can offer fascinating insights about the nature of the medium and how it works With *Inadvertent Images* Peter Geimer explores all kinds of photographic irritation from throughout the history of the medium as well as accidental images that occur through photo like means such as the image of Christ on the Shroud of Turin brought into high resolution through photography Geimer's investigations complement the history of photographic images by cataloging a corresponding history of their symptoms their precarious visibility and the disruptions threatened by image noise Interwoven with the familiar history of photography is a secret history of photographic artifacts spots and hazes that historians have typically dismissed as spurious phenomena parasites or enemies of the photographer With such photographs it is virtually impossible to tell where a picture has been disrupted where the representation ends and the image noise begins We must Geimer argues seek to keep both in sight the technical making and the necessary unpredictability of what is made the intentional and the accidental aspects representation and its potential disruption

The Hand on the Shakespearean Stage Farah Karim Cooper, 2016-04-21 This ground breaking new book uncovers the way Shakespeare draws upon the available literature and visual representations of the hand to inform his drama Providing an analysis of gesture touch skill and dismemberment in a range of Shakespeare's works it shows how the

hand was perceived in Shakespeare's time as an indicator of human agency, emotion, social and personal identity. It demonstrates how the hand and its activities are described and embedded in Shakespeare's texts and about its role on the Shakespearean stage as part of the actor's body in the language as metaphor and as a morbid stage prop. Understanding the cultural signifiers that lie behind the early modern understanding of the hand and gesture opens up new and sometimes disturbing ways of reading and seeing Shakespeare's plays.

Paul Gauguin Dario Gamboni, 2014-09-15 French artist Eugène Henri Paul Gauguin 1848-1903 once reproached the Impressionists for searching around the eye and not at the mysterious centre of thought. But what did he mean by this enigmatic phrase? In this innovative investigation into Gauguin's art and thought, Dario Gamboni illuminates Gauguin's quest for this mysterious centre and offers a fresh look at the artist's output in all media from ceramics and sculptures to prints, paintings and his large corpus of writings. Foregrounding Gauguin's conscious use of ambiguity, Gamboni unpacks what the artist called the language of the listening eye. Gamboni shows that the interaction between perception, cognition and imagination was at the core of Gauguin's work and he traces a line of continuity in them that has been previously overlooked. Emulating Gauguin's wide-ranging curiosity with literature, psychology, theology and the natural sciences, not to mention the whole of art history, this richly illustrated book provides new insight into the life and works of this well-known yet little-understood artist.

France and the Visual Arts Since 1945 Catherine Dossin, 2019-01-01 Taking on the myth of France's creative exhaustion following World War II, this collection of essays brings together an international team of scholars whose research offers English readers a rich and complex overview of the place of France and French artists in the visual arts since 1945. Addressing a wide range of artistic practices spanning over seven decades and using different methodologies, their contributions cover ground charted and unknown. They introduce greater depth and specificity to familiar artists and movements such as Lettrism, Situationist International or Nouveau Réalisme while bringing to the fore lesser-known artists and groups including GRAPUS, the Sociological Art Collective and Nicolas Schffer. Collectively, they stress the political dimensions and social ambitions of the art produced in France at the time, deconstruct the traditional geography of the French art world and highlight the multiculturalism of the French art scene that resulted from its colonial past and the constant flux of artistic travels and migrations. Ultimately, the book contributes to a story of postwar art in which France can be inscribed not as a main or sub chapter but rather as a vector in the wider constellation of modern and contemporary art.

The Brush and the Pen Dario Gamboni, 2011 French symbolist artist Odilon Redon 1840-1916 seemed to thrive at the intersection of literature and art. Known as the painter-writer, he drew on the works of Poe, Baudelaire, Flaubert, and Mallarmé for his subject matter. And yet he concluded that visual art has nothing to do with literature. Examining this apparent contradiction, *The Brush and the Pen* transforms the way we understand Redon's career and brings to life the interaction between writers and artists in fin de siècle Paris. Dario Gamboni tracks Redon's evolution from collaboration with the writers of symbolism and decadence to a defense of the autonomy of the visual arts. He argues that Redon's conversion was the symptom of a mounting crisis in the relationship between artists and writers provoked at the turn of the century by the growing power of art criticism that foreshadowed the modernist separation of the arts into intractable fields. In addition to being a distinguished study of this provocative artist, *The Brush and the Pen* offers a critical reappraisal of the interaction of art-writing, criticism, and government institutions in late nineteenth-century France. Nederlands Kunsthistorisch Jaarboek, 2004

Virtue Jan de Jong, 2004 Virtue was ubiquitous in early modern Europe not because everyone behaved well but in the sense that interest in the subject was pervasive and intense. In a changing society, the widening aspiration to nobility was justified by claims to different kinds of virtue, and the theory of virtue was the established way of re-assessing accepted human values. In Latin-based languages and humanist culture, certain materially based qualities attributed to the artwork itself eventually became identified as virtuosity, and the virtuoso emerged in 17th-century Europe as an elite figure with a particular interest in and appreciation of works of art and other objects of virtue. This volume brings together a set of essays on the relevance of virtue to Netherlandish art, dealing with virtue as a popular subject of visual representation and opening up fascinating links and comparisons between the special qualities accorded to revered works of art with the claims of elite artists and beholders to privileged standing. Themes addressed range from a discussion of ways in which Dutch artists and writers adapted courtly and humanist notions of martial virtue to validate still life to an analysis of political and painterly virtue in a mythological painting by Cornelisz van Haarlem from an examination of Goltzius's *Tabula Cebetis* as a representation of artistic virtue to an exploration of the virtues of amateur landscape in the seventeenth-century Netherlands. The volume also reconsiders the relationship between virtue and net and row painting, particularly with reference to the definition of sprezzatura in Castiglione's *Book of the Courtier*. Or readers can compare Rubens's self-identification with virtue through humanist friendship with Jan Brueghel the Elder's reference as a court painter to the virtue and diligence of both his conduct and his art. Within a wide range of subject matter and approaches, the authors share a commitment to establishing the place of virtue at the heart of Netherlandish art. **Meeting of Board of Regents** University of Michigan.
