Peter Mallios reveals the historical and political factors that made Conrad's work valuable to a range of prominent figures including Fitzgerald, Faulkner, Richard Wright, Woodrow Wilson, and Theodore and Edith Roosevelt, and explores regional differences in Conrad's reception. He proves that foreign authored writing can be as integral a part of United States culture as that of any native. Arguing that an individual writer's apparent national gendered racial political identity is not always a good predictor of the diversity of voices and dialogues to which he gives rise, this exercise in transnational comparativism participates in post-Americanist efforts to render American Studies less insular and parochial.

Cumulative List of Organizations Described in Section 170 (c) of the Internal Revenue Code of 1986, 1987 *Cumulative List of Organizations Described in Section 170 (c) of the Internal Revenue Code of 1954*, 2004 JFK and de Gaulle Sean J.

McLaughlin, 2019-08-20 America's road to disaster in Vietnam has been endlessly chronicled, but Sean L. McLaughlin takes a fresh approach to that familiar story. James Hershberg, George Washington University. Despite French President Charles de Gaulle's persistent efforts to constructively share French experience and use his resources to help engineer an American exit from Vietnam, the Kennedy administration responded to de Gaulle's peace initiatives with bitter silence and inaction. The administration's response ignited a series of events that dealt a massive blow to American prestige across the globe, resulting in the deaths of over fifty-eight thousand American soldiers and turning hundreds of thousands of Vietnamese citizens into refugees. This history of Franco-American relations during the Kennedy presidency explores how and why France and the US disagreed over the proper western strategy for the Vietnam War. France clearly had more direct political experience in Vietnam, but France's postwar decolonization cemented Kennedy's perception that the French were characterized by a toxic mixture of shortsightedness, stubbornness, and indifference to the collective interests of the West. At no point did the Kennedy administration give serious consideration to de Gaulle's proposals or entertain the notion of using his services as an honest broker in order to disengage from a situation that was rapidly spiraling out of control. Kennedy's Francophobia, the roots of which appear in a selection of private writings from Kennedy's undergraduate years at Harvard, biased his decision making. This book explores how the course of action Kennedy chose in 1963—a rejection of the French peace program—all but handcuffed Lyndon Johnson into formally entering a war he knew the United States had little chance of winning.

Publication, 1987 **The Polish Crisis and Relations with Eastern Europe, 1979-1982** Isabelle Tombs, Richard Smith, 2017-03-16 This volume presents a collection of diplomatic documents describing Britain's relations with Eastern Europe from 1979 to 1982, with special focus on the crisis in Poland. After coming to power in 1979, the Conservative Government of Margaret Thatcher reaffirmed a policy of differentiation between the Soviet Union and the rest of Eastern Europe, and between individual countries; concurrently, it encouraged states to exercise a limited amount of independence. This policy was soon put to the test when in 1980 Solidarność, the Solidarity trade union led by Lech Wałęsa, challenged the power of the Party state in Poland. Political demands, social unrest, and economic crisis culminated in the imposition of martial

law in December 1981 finally suspended in December 1982 The volume maps the UK response in consultation with Western partners to the unfolding crisis in Poland the threat of Soviet intervention and the impact on other Communist states in Europe The volume also provides a flavour of bilateral UK relations with Albania Bulgaria Czechoslovakia the German Democratic Republic Hungary Romania and Yugoslavia highlighting themes such as human rights and trade This volume will be of great interest to students of British Politics Eastern European Politics Cold War History Diplomacy Studies and International Relations in general Anatomy of Post-Communist European Defense Institutions Thomas-Durell

Young,2017-06-29 Although the West won the Cold War the continuation of the status quo is not a foregone conclusion The former Soviet aligned regions outside of Russia Ukraine Poland Czech Republic and others sit atop decaying armed forces while Russian behavior has grown more and more aggressive as evidenced by its intervention in Ukraine in recent years Thomas Young delves into the state of these defense institutions in Central and Eastern Europe whose resources have declined at a faster rate than their Western neighbors due to social and fiscal circumstances at home and shifting attitudes in the wider international community With rigorous attention to the nuances of each region s politics and policies he documents the status of reform of these armed forces and the role that Western nations have played since the Cold War as well as identifying barriers to success and which management practices have been most effective in both Western and Eastern capitals This is essential reading for undergraduates and graduates studying the recent history of Europe in the post Soviet era as well as those professionally involved in defense governance in the region **Public Papers of the Presidents of the**
