## **Rescuing History From The Nation:**

Rescuing History from the Nation Prasenjit Duara, 1996-11-20 Prasenjit Duara offers the first systematic account of the relationship between the nation state nationalism and the concept of linear history Focusing primarily on China and including discussion of India Duara argues that many historians of postcolonial nation states have adopted a linear evolutionary history of the Enlightenment colonial model As a result they have written repressive exclusionary and incomplete accounts The backlash against such histories has resulted in a tendency to view the past as largely constructed imagined or invented In this book Duara offers a way out of the impasse between constructionism and the evolving nation he redefines history as a series of multiple often conflicting narratives produced simultaneously at national local and transnational levels In a series of closely linked case studies he considers such examples as the very different histories produced by Chinese nationalist reformers and partisans of popular religions the conflicting narratives of statist nationalists and of advocates of federalism in early twentieth century China He demonstrates the necessity of incorporating contestation appropriation repression and the return of the repressed subject into any account of the past that will be meaningful to the present Duara demonstrates how to write histories that resist being pressed into the service of the national subject in its progress or stalled progress toward modernity

Saving the Nation Thomas H. Reilly, 2020 While Protestant Christians made up only a small percentage of China's overall population during the Republican period they were heavily represented among the urban elite Chinese Protestant elites adapted both the social message and practice of Christianity so that they were better able to contribute to the building of a New China Saving the Nation recounts the history of the Protestant elite and their struggle to strengthen and renew their nation

Saving the Nation through Culture Jie Gao, 2019-05-13 The Modern Chinese Folklore Movement coalesced at National Peking University between 1918 and 1926 A group of academics inspired by Western thought turned to the study of folklore popular songs beliefs and customs to rally people around the flag Saving the Nation through Culture opens a new chapter in the history of the Folklore Movement by exploring the evolution of the discipline's Chinese branch Gao reveals that intellectuals in the New Culture Movement influenced the founding folklorists with their aim to repudiate Confucianism

following the Chinese Republic's failure to modernize the nation. The folklorists however faced a unique challenge advocating for modern academic methods while upholding folklore as the key to the nation's salvation. Largely unknown in the West and underappreciated in China, the Modern Folklore Movement failed to achieve its goal of reinvigorating the Chinese nation. But it helped establish a modern discipline promoting a spirit of academic independence that influences Chinese intellectuals today.

RESCUING HISTORY FROM THE NATION, 2003 *Saving the Nation* Margherita Zanasi, 2010-02-15 Economic modernity is so closely associated with nationhood that it is impossible to imagine a modern state without an equally modern economy. Even so, most people would have difficulty defining a modern economy and its connection to nationhood. In *Saving the Nation*, Margherita Zanasi explores this connection by examining the first nation building attempt in China after the fall of the empire in 1911. Challenging the assumption that nations are products of technological and socioeconomic forces, Zanasi argues that it was notions of what constituted a modern nation that led the Nationalist nation builders to shape China's institutions and economy. In their reform effort, they confronted several questions: What characterized a modern economy? What role would a modern economy play in the overall nation building effort? And how could China pursue economic modernization while maintaining its distinctive identity? Zanasi expertly shows how these questions were negotiated and contested within the Nationalist Party. Silenced in the Mao years, these dilemmas are reemerging today as a new leadership once again redefines the economic foundation of the nation.

RESCUING HISTORY FROM THE NATION, 2003 Nation and the Writing of History in China and Britain, 1880-1930 Asier Hernández Aguirresarobe, 2022-08-19 *Nation and the Writing of History in China and Britain* explores through a comparative approach the reception of the nationalist worldview and its effects on the practice of history in China and Britain. This book proposes that nationalism rather than a political doctrine is a way of making sense of the world which results from the combination of a set of definite assumptions. The work analyzes how each one of these premises was accepted and negotiated by literati, intellectuals, historians, and other scholars in the late nineteenth and early twentieth centuries. The results of this research showcase how the reception of the new nationalist worldview crucially affected images of the past, the present, and the future in both societies and decisively framed cultural, social, and political debate. In addition, they likewise evidence the fundamental role that historical narratives play in the crystallization of national identities. This book is perfect for readers interested in China and Britain during this time period but also to anyone attracted to new ways of conceiving nationalism and its role in our world.

**Nation Work** Timothy Brook, André Schmid, 2010-08-04 As increasing attention is drawn to globalization questions arise about the fate of the nation, a political and social unit that for centuries has seemed the common sense way to organize the world. In *Nation Work*, Timothy Brook and André Schmid draw together eight essays that use historical examples from Asian countries: China, India, Korea, and Japan to enrich our understandings of the origin and growth of nations. Asia provides

fertile ground for this inquiry the volume argues because in Asia the history of the modern nation has been inseparable from global influences in the form of Western imperialism Yet while the impetus for building a modern national identity may have come from the need to fashion a favorable place in a world system dominated by Western nations those engaged in nationalist enterprises found their particular voices more often in relation to tensions within Asia than in relation to more generic tensions between Asia and the West With topics ranging from public health measures in nineteenth century Japan through textual scholarship of Tamil intellectuals the willful division of Korea s history from China s the development of China s cotton industry and the meaning of postnational ism for Chinese artists the essays reveal the fascinating array of sites at which nation work can take place This will be essential reading for historians and social scientists interested in Asia Timothy Brook is Professor of History Stanford University Andr Schmid is Assistant Professor of East Asian Studies University of Toronto

Making the Chinese Mexican Grace Delgado, 2013-04-15 Making the Chinese Mexican is the first book to examine the Chinese diaspora in the U S Mexico borderlands It presents a fresh perspective on immigration nationalism and racism through the experiences of Chinese migrants in the region during the late nineteenth and early twentieth centuries Navigating the interlocking global and local systems of migration that underlay Chinese borderlands communities the author situates the often paradoxical existence of these communities within the turbulence of exclusionary nationalisms The world of Chinese *fronterizos* borderlanders was shaped by the convergence of trans Pacific networks and local arrangements against a backdrop of national unrest in Mexico and in the era of exclusionary immigration policies in the United States Chinese *fronterizos* carved out vibrant enduring communities that provided a buffer against virulent Sinophobia This book challenges us to reexamine the complexities of nation making identity formation and the meaning of citizenship It represents an essential contribution to our understanding of the U S Mexico borderlands

*Unearthing the Nation* Grace Yen Shen, 2014-02-13 Questions of national identity have long dominated China's political social and cultural horizons So in the early 1900s when diverse groups in China began to covet foreign science in the name of new technology and modernization questions of nationhood came to the fore In *Unearthing the Nation* Grace Yen Shen uses the development of modern geology to explore this complex relationship between science and nationalism in Republican China Shen shows that Chinese geologists in battling growing Western and Japanese encroachment of Chinese sovereignty faced two ongoing challenges how to develop objective internationally recognized scientific authority without effacing native identity and how to serve China when China was still searching for a stable national form Shen argues that Chinese geologists overcame these obstacles by experimenting with different ways to associate the subjects of their scientific study the land and its features with the object of their political and cultural loyalties This in turn led them to link national survival with the establishment of scientific authority in Chinese society The first major history of modern Chinese geology *Unearthing the Nation* introduces the key figures in the rise of the field as well as several key organizations such as the Geological Society of China and explains how they helped bring Chinese geology onto the world stage
