## **Research In Transportation Economics:**

Research in Transportation Economics Theodore E. Keeler, 1983 This volume of Research in Transportation Economics reflects the changes that are occurring in the transportation arena as we enter the twenty first century In the US the transportation industries rail and trucking in particular are still adjusting to deregulation that has taken place since the 1970 s The emerging transportation issues focus less on economic regulation of the transport sector and more on policies to deal with congestion optimal pricing and the allocation of scarce resources The papers presented represent a diverse view of transportation economics in a field that is forever changing as regulations change economic growth continues and our econometric and modeling methods become increasingly refined The series is abstracted and indexed in Journal of Economic Literature and in EconLit

**Bus Transport** David A. Hensher, 2007-01-30 The bus is the most patronised of all land based public passenger mode but is seen as a somewhat unglamorous means of supporting mobility and accessibility in contrast to rail heavy and light yet offers so much to the travelling public as well as offering attractive sustainability opportunities This book reflects the author s perspective on issues of importance to the preservation and health of the bus sector The twenty one chapters cover the themes of institutional reform performance measurement and monitoring service quality costing and pricing of services including commercial and non commercial contracts travel choice and demand integrated bus based systems and public transport policy especially challenges in growing patronage
