

# Super Simple Research Paper

**\*\*The research and writing process takes time. Expect to skim 5-10 resources (websites, databases, books, etc.) before selecting one you will use. Once you select a resource, plan to read all or most of it to select portions that will support your research. A research project involves doing, um, research.**

- **Step 1 – Select a topic.** Make sure you are interested. You don't want to spend days (weeks?) working on a topic you find boring. Make sure you can find enough information to support your topic. If not, pick a new topic.
- **Step 2 – Think about what your topic is, who you are writing for (do they know anything about your topic?), your writing style, and purpose.** Is the purpose of your paper to persuade (argue a viewpoint or convince others your viewpoint is correct), summarize, evaluate (give criteria and determine if something meets it), analyze, or investigate (research a topic to find little-known facts without bias)?
- **Step 3 – Write a research question.** Once you have selected your topic and determined your purpose, do some preliminary research. This is when you can use Wikipedia to find out enough about your topic that you can ask a question. Your research question helps to focus your topic. It should not be too broad. Your question can ask "How?" "What?" or "Why?"
- **Step 4 – Write a thesis statement.** A thesis statement usually appears at the end of your first paragraph and tells the reader what your paper will be about. You can adjust your thesis statement as you write your paper if your focus changes.
- **Step 5 – Find your first source.** Before you start looking, decide what kind of information you need – facts, opinions, news reports, research studies, history. Decide what kind of sources would most likely have what you are looking for – books, websites, databases, newspaper articles, primary sources. Remember that websites do not contain all of the knowledge in the world. There is a lot of information hidden in online databases, books and other sources. A Google search will not return this information.

*How do I know if I am using a Website or a Database?*

The school library purchases databases. They can be accessed through the library web page with a password. A database is an organized collection of information. The information is usually scholarly and authoritative. The search results can be filtered to get the exact information you are looking for.
