Uncanny Fairy Tales Francesca Arnavas, 2024-05-31 There are fairy tales that surprise destabilise or even shock us these are uncanny fairy tales that manipulate familiar stories in creative and bewildering ways in order to express new meanings This work analyses these tales basing its approach on a reformulation of Freud s concept of the uncanny Through a cognitive outlook the employed theoretical framework provides new perspectives on the study of experimental literary fairy tales Considering English language literature complex and unsettling reinterpretations of the fairy tale discourse began to appear during the Victorian Age later resurfacing as a postmodern trend This research individuates uncanny related narrative techniques and cognitive responses as means to decodify and explore these tales and as ways to discover unseen connections between Victorian and postmodern texts The new theorisation of the uncanny is linked with three subconcepts mirror hybridity and wonder which function as tools to describe and investigate the cognitive and emotional entanglements characterising enigmatic and disorienting fairy tales

INSIDE Beauty and the Beast, Jack and the Beanstalk, Tam Lin, Thomas the Rhymer, and five fairy tales by Hans Christian Andersen

Inhabited by Stories Nancy A. Barta-Smith, Danette DiMarco, 2012-11-30
 Intertextuality has signaled change, appropriation, adaptation, and derivation. It has focused readers on irresolvable questions of influence and origination, progressive or regressive movement across continents, periods, and media. *Inhabited by Stories: Critical Essays on Tales Retold* takes a different approach. What would a model of literary study look like that steps out of time's river and embraces not only the presence and proximity of the world to the senses but also of the past and the future to the present here and now? When stories inhabit us, imagination and memory extend our ability to see and feel. Phenomenological experience is lived, not just thought. Such a perspective suggests that the past and future inhabit the present, increase the depth of sensory perception itself, and enrich the range of our affective and ethical responses. Grounded in the lived experience of reading, this perspective offers an alternative to an idea of intertextuality as simply following lines of influence and appropriation. It focuses on the expansion of experience created by telling and retelling stories. Ironically, for literary theorists and critics, perhaps the highest form of both praise and critique is a tale retold, since such retellings attest to literature's instructive power and its perennial regeneration.

Young Adult Resources Today Don Latham, Melissa Gross, 2014-05-21
Young Adult Resources Today: Connecting Teens with Books, Music, Games, Movies, and More is the first comprehensive young adult library services textbook specifically written for today's multidimensional information landscape. The authors integrate a research-focused information behavior approach with a literature-focused resources approach and

bring together in one volume key issues related to research theory and practice in the provision of information services to young adults. Currently no single book addresses both YA information behaviors and information resources in any detail; instead books tend to focus on one and give only cursory attention to the other. Key features of this revolutionary book include its success in integrating theory, research, and practice; integrating implications for practice throughout the book; integrating knowledge of resources with professional practice as informed by research; integrating both print and electronic formats throughout within the resource chapters, including websites and social media. Latham and Gross accomplish all this while paying particular attention to the socially constructed nature of young adulthood, diversity, YA development, and multiple literacies. Their coverage of information landscapes covers literature with detailed coverage of both genres and subgenres: movies, magazines, web sites, social media, and gaming. The final chapter covers navigating information landscapes, focusing on real and virtual YA spaces, readers advisory, programming, and collaboration. Special attention is paid to program planning and evaluation.

Red Riding Hood and the Wolf in Bed Ann Martin, 2006-01-01
