Gifford, Linda C. Wing, 2012-12-06 Bernard R Gifford and Linda C Wing Standardized testing has become a ubiquitous feature of American life As a major source of information for reducing uncertainty in the allocation of merit based educational training and employment opportunities testing affects the life chances of individuals Moreover testing influences the way in which our society judges itself and provides for our collective

future Test scores may determine a child's admission to kindergarten and promotion to the first grade. Most states award the high school diploma only if a student has passed a minimum competency test. Major institutions of higher education typically require applicants to supplement their records of academic achievement with scores on college admissions tests. In the labor market as a condition of employment or assignment to training programs, more and more employers are requiring workers to sit for personnel selection tests. Additionally, it has become commonplace to use test scores to calibrate our national sociopolitical condition and our capacity to compete with other countries in the global economy. In short, with increasing frequency and intensity, scores on examinations that purport to be objective and precise measures of individual knowledge, abilities, and potential are playing a critical role in the opportunity marketplace. Similarly, test scores are exercising growing influence in assessments of our social and economic institutions and in policy decisions about the relative investments that should be made in each. In all these instantiations, test scores are at the center of high-stakes decision making about the future of individuals and of the nation itself.

Handbook of Research on Character and Leadership Development in Military Schools Ryan, Mark Patrick, Weekes, Timothy L., 2021-01-22. Military academies have served youth for more than a century with proud traditions of producing graduates who are scholars, leaders, and athletes who adhere to a code of honor and ethical principles as they take the knowledge, skills, and dispositions gained at those academies into higher education, the business world, military service, civic endeavors, and the broader workforce. There is a current gap and need for research that explores the various components of a K-20 military school, college education, and how those components successfully produce leaders of character for our military, civic, academic, and business worlds both in the United States and abroad. The *Handbook of Research on Character and Leadership Development in Military Schools* synthesizes research on the impact of military academies by providing a singular compendium of current academic studies on the graduates of military academies and the communities of which they enter after graduation. The chapters will explore the academics, leadership, character development, citizenship, athletics, and other dimensions of both global and national and both private and public military academies. This book is ideal for current leaders, staffs, governing board members, and alumni of military academies both in the United States and internationally, along with policymakers, government officials, practitioners, researchers, academicians, and students interested in the implications of character and leadership development on individuals enrolled in or graduated from military schools.
