**Handbook of Interview Research** Jaber F. Gubrium, James A. Holstein, 2001-07-25 Interviewing has become the window on the world of experience for both researchers and professionals But as familiar as interviewing is now its seemingly straightforward methodology raises more questions than ever What is the interviewer s image of those who are being interviewed Who is the interviewer in the eyes of the respondent From where do interviewers obtain questions and respondents get the answers that they communicate in interviews How do the institutional auspices of interviewing shape interview data Drawing upon leading experts from a wide range of disciplines to address these and related questions The Handbook of Interviewing offers a comprehensive examination of the interview at the cutting edge of information technology in the context of a challenging postmodern environment Encyclopedic in its breadth the Handbook provides extensive discussions of the conceptual and methodological issues surrounding interview practice in relation to forms of interviewing new technology diverse data gathering and analytic strategies and the various ways interviewing relates to distinctive respondents The Handbook is also a story that spins a

particular tale that moves from the commonly recognized individual interview as an instrument for gathering data to reflections on the interview as an integral part of the information we gather about individuals and society **Postmodern Interviewing** Jaber F. Gubrium, 2003-03-21 Interview roles are less clear than they once were and in some cases the roles are even exchanged to promote new opportunities for understanding the shape and evolution of selves and experience Postmodern Interviewing offers readers an exploration of the postmodern interview a conversation with diverse purposes in which the communicative format is constructed as much within the interview conversation as it stems from predesignated research interests It provides cutting edge discussions of emerging horizons featuring reflexivity poetics and power along with discussions of new ways of gathering experiential knowledge Employing concepts from anthropology family studies history and sociology the contributors present the ambitious new directions in which the interview has gone such as How the interview process is refracted through the lens of language knowledge culture and difference How the dividing line between fact and fiction is blurred to promote richer understanding How standardized representation has given way to representational invention By exploring these exciting developments readers will be exposed to the engaging opportunities for understanding the shape and evolution of selves and social worlds that are made possible through changes in the interview process This volume is comprised of chapters from the Handbook of Interview Research Gubrium and Holstein SAGE 2001 The companion volume Inside Interviewing SAGE 2003 is also comprised of chapters from the Handbook

Whimster, 2013-04-17 It is a distinct pleasure to be invited to prepare a short Foreword to Biomedical Research How to plan publish and present it by William F Whimster Ninety years have elapsed since T Clifford Allbutt the Regius Professor of Physic at the University of Cambridge published his classic work of 1904 Notes on the Composition of Scientific Papers Small in size but deep in wisdom it remains a remarkably useful if slightly old fashioned book still well worth reading Since 1904 and particularly in the last 25 years there has been an avalanche of books on scientific style Medawar has aptly observed that most scientists do not know how to write insofar as style betrays I homme meme they write as if they hated writing and wanted nothing more than to have done with it Whimster s book has a broader objective than most of this genre Unlike Allbutt who was addressing in the main those who were writing their theses to obtain the MD Whimster writes for the young medical scientists who are planning and writing up

an account of their research either for publication in scientific journals or for presentation of the scientific material at meetings
