Route Des Indes:

La Route Des Indes Nicole Bamberger, **Mapping and Charting in Early Modern England and France** Christine Petto, 2015-03-26 Mapping and Charting for the Lion and the Lily Map and Atlas Production in Early Modern England and France is a comparative study of the production and role of maps charts and atlases in early modern England and France with a particular focus on Paris the cartographic center of production from the late seventeenth century to the late eighteenth century and London which began to emerge in the late eighteenth century to eclipse the once favored Bourbon center The themes that carry through the work address the role of government in map and chart making In France in particular it is the importance of the centralized government and its support for geographic works and their makers through a broad and deep institutional infrastructure Prior to the late eighteenth century in England there was no central controlling agency or institution for map chart or atlas production and any official power was imposed through the market rather than through the establishment of institutions There was no centralized support for the cartographic enterprise and any effort by the crown was often challenged by the power of Parliament which saw little value in fostering or supporting scholar geographers or a national survey This book begins with an investigation of the imagery of power on map and atlas frontispieces from the late sixteenth century to the seventeenth century In the succeeding chapters the focus moves from county and regional mapping efforts in England and France to the paper wars over encroachment in their respective colonial interests The final study looks at charting efforts and highlights the role of government support and the commercial trade in the development of maritime charts not only for the home waters of the English Channel but the distant and dangerous seas of the East Indies **La Tradition Colombienne Et la Decouverte de L'Amerique** Henry Vignaud, 1920 , **Natural History in Early Modern France** , 2018-08-13 Natural History in Early Modern France offers a longue dur e account of recurring poetic structures of the genre through case studies spanning from the Renaissance to the eve of the nineteenth century These case studies reveal the lasting epistemic importance of bookish knowledge and commonplacing in the natural historical description from Belon to Buffon They also highlight the French reception of Baconianism Natural History in Early Modern France makes a case for the literary status of the genre by attending to the permanence of its Plinian features such as wonders Natural history was not only concerned with increasingly rational modes of ordering natural particulars this book reveals its enduring social affective spiritual and aesthetic underpinnings Contributors are Peter Anstey Susan Broomhall Isabelle Charmantier Arlette Fruet Rapha le Garrod Paul Gibbard Dana Jalobeanu Myriam Marrache Gouraud St phane Schmitt Paul J Smith and St phane Van Damme The Dutch Trading Companies As Knowledge Networks Siegfried Huigen, Jan L.
