works in addition to numerous previously unpublished visual sources Duchamp Love and Death even is a seminal monograph for understanding this crucial figure of modern art

**Merriam-Webster's Dictionary of Allusions** Elizabeth Webber, Mike Feinsilber, 1999 A guide to references commonly used in speech and writing Explains more than 900 allusions Entries include examples from today's leading media A must for serious readers language lovers and ESL students      Storytelling in Science and Literature Margery Arent Safir, 2014-12-24 This gathering of eminent thinkers from the sciences and the humanities engages a common theme In what ways does language and storytelling in particular deal with ethics in science in literature and in other art forms Evelyn Fox Keller Jean Michel Rabat Mieke Bal and Roald Hoffmann explore ways in which science and rhetoric politics and fiction science and storytelling and ethics and aesthetics are deeply and creatively imbricated with each other rather than distinct and autonomous      The Evolution of Technology George Basalla, 1989-02-24 This book presents an evolutionary theory of technological change based upon recent scholarship in the history of technology and upon relevant material drawn from economic history and anthropology It challenges the popular notion that technology advances by the efforts of a few heroic individuals who produce a series of revolutionary inventions owing little or nothing to the technological past Therefore the book's argument is shaped by analogies taken selectively from the theory of organic evolution and not from the theory and practice of political revolution Three themes appear and reappear with variations throughout the study The first is diversity an acknowledgment of the vast numbers of different kinds of made things artifacts that have long been available to humanity the second is necessity the belief that humans are driven to invent new artifacts in order to meet basic biological requirements such as food shelter and defense and the third is technological evolution an organic analogy that explains both the emergence of novel artifacts and their subsequent selection by society for incorporation into its material life without invoking either biological necessity or technological progress Although the book is not intended to provide a strict chronological account of the development of technology historical examples including many of the major achievements of Western technology the waterwheel the printing press the steam engine automobiles and trucks and the transistor are used extensively to support its theoretical framework The Evolution of Technology will be of interest to all readers seeking to learn

how and why technology changes including both students and specialists in the history of technology and science **Who Owns America's Past?** Robert C. Post, 2013-10-15 From an insider's perspective Robert C Post offers insight into the politics of display and the interpretation of history Never before has a book about the Smithsonian detailed the recent and dramatic shift from collection driven shows with artifacts meant to speak for themselves to concept driven exhibitions in which objects aim to tell a story displayed like illustrations in a book Dust jacket flap **Fables and Futures** George Estreich, 2025-05-27 How new biomedical technologies from prenatal testing to gene editing techniques require us to imagine who counts as human and what it means to belong From next generation prenatal tests to virtual children to the genome editing tool CRISPR Cas9 new biotechnologies grant us unprecedented power to predict and shape future people That power implies a question about belonging which people which variations will we welcome How will we square new biotech advances with the real but fragile gains for people with disabilities especially when their voices are all but absent from the conversation This book explores that conversation the troubled territory where biotechnology and disability meet In it George Estreich an award winning poet and memoirist and the father of a young woman with Down syndrome delves into popular representations of cutting edge biotech websites advertising next generation prenatal tests feature articles on three parent IVF a scientist's memoir of constructing a semisynthetic cell and more As Estreich shows each new application of biotechnology is accompanied by a persuasive story one that minimizes downsides and promises enormous benefits In this story people with disabilities are both invisible and essential a key promise of new technologies is that disability will be repaired or prevented In chapters that blend personal narrative and scholarship Estreich restores disability to our narratives of technology He also considers broader themes the place of people with disabilities in a world built for the able the echoes of eugenic history in the genomic present and the equation of intellect and human value Examining the stories we tell ourselves the fables already creating our futures Estreich argues that given biotech that can select and shape who we are we need to imagine as broadly as possible what it means to belong **A Curious Man** Neal Thompson, 2013-05-07 A Curious Man is the marvelously compelling biography of Robert Believe It or Not Ripley the enigmatic cartoonist turned globetrotting millionaire who won international fame by celebrating the world's strangest oddities and whose outrageous showmanship taught us to believe in the unbelievable As portrayed by acclaimed biographer Neal Thompson Ripley's life is the stuff of a classic American fairy tale Buck toothed and cursed by shyness Ripley turned his sense of being an outsider into an appreciation for the strangeness of the world After selling his first cartoon to Time magazine at age eighteen more cartooning triumphs followed but it was his Believe It or Not conceit and the wildly popular radio shows it birthed that would make him one of the most successful entertainment figures of his time and spur him to search the globe's farthest corners for bizarre facts exotic human curiosities and shocking phenomena Ripley delighted in making outrageous declarations that somehow always turned out to be true such as that Charles Lindbergh was only the sixty seventh man to fly across the Atlantic or that The Star

Spangled Banner was not the national anthem Assisted by an exotic harem of female admirers and by ex banker Norbert Pearlroth a devoted researcher who spoke eleven languages Ripley simultaneously embodied the spirit of Peter Pan the fearlessness of Marco Polo and the marketing savvy of P T Barnum In a very real sense Ripley sought to remake the world s aesthetic He demanded respect for those who were labeled eccentrics or freaks whether it be E L Blystone who wrote 1 615 alphabet letters on a grain of rice or the man who could swallow his own nose By the 1930s Ripley possessed a vast fortune a private yacht and a twenty eight room mansion stocked with such oddities as shrunken heads and medieval torture devices and his pioneering firsts in print radio and television were tapping into something deep in the American consciousness a taste for the titillating and exotic and a fascination with the fastest biggest dumbest and most weird Today that legacy continues and can be seen in reality TV YouTube America s Funniest Home Videos Jackass MythBusters and a host of other pop culture phenomena In the end Robert L Ripley changed everything The supreme irony of his life which was dedicated to exalting the strange and unusual is that he may have been the most amazing oddity of all

The Theater and Cinema of Buster Keaton Robert Knopf, 2018-06-05 Famous for their stunts gags and images Buster Keaton s silent films have enticed everyone from Hollywood movie fans to the surrealists such as Dal and Bu uel Here Robert Knopf offers an unprecedented look at the wide ranging appeal of Keaton s genius considering his vaudeville roots and his ability to integrate this aesthetic into the techniques of classical Hollywood cinema in the 1920s When young Buster was being hurled about the stage by his comically irate father in the family s vaudeville act The Three Keatons he was perfecting his acrobatic skills timing visual humor and trademark stone face As Knopf demonstrates such theatrics would serve Keaton well as a film director and star By isolating elements of vaudeville within works that have previously been considered classical Knopf reevaluates Keaton s films and how they function The book combines vivid visual descriptions and illustrations that enable us to see Keaton at work staging his memorable images and gags such as a three story wall collapsing on him Steamboat Bill Jr 1928 and an avalanche of boulders chasing him down a mountainside Seven Chances 1925 Knopf explains how Keaton s stunts and gags served as fanciful departures from his films storylines and how they nonetheless reinforced a strange sense of reality that of a machine like world with a mind of its own In comparison to Chaplin and Lloyd Keaton made more elaborate use of natural locations The scene in The Navigator for example where Buster brandishes a swordfish to fend off another swordfish derives much of its power from actually being shot under water Such hyper literalism was but one element of Keaton s films that inspired the surrealists Exploring Keaton s influence on Salvador Dal Luis Bu uel Federico Garc a Lorca and Robert Desnos Knopf suggests that Keaton s achievement extends beyond Hollywood into the avant garde The book concludes with an examination of Keaton s late career performances in Gerald Potterton s The Railrodder and Samuel Beckett s Film and locates his legacy in the work of Jackie Chan Blue Man Group and Bill Irwin

**The Practice of Misuse** Raymond Malewitz, 2014-10-01 In the age of Ikea Hackers and salvagepunks this book charts the emergence of rugged consumers who creatively misuse reuse and repurpose the objects within their environments to suit their idiosyncratic needs and desires Figures of both literary and material culture whose behavior evokes an American can do ethic rugged consumers mediate between older mythic models of self sufficiency and the consumption driven realities of our passive post industrial economy Through their unorthodox encounters with the material world rugged consumers show that using objects properly is a conventional behavior that must be renewed and reinforced rather than a naturalized process that persists untroubled through time and space At the same time this Utopian ideal is rarely met most examples of rugged consumerism conceal rather than foreground the ideological problems to which they respond and thus support or ignore rather than challenge the structures of late capitalist consumerism By analyzing convergences and divergences between subjective material practices and collectivist politics Raymond Malewitz shows how rugged consumerism both recodes and reflects the dynamic social history of objects in the United States from the 1960s to the present
