Imperial Delusions Carl Boggs, 2005 In this hard hitting critique Carl Boggs argues that the United States is dominated by a new militarism one that has become more potent and menacing since 9 11 He skillfully explores the origins and development of this new militarism and show its devastating effects on American society Unhitched Richard Seymour, 2013-01-16 Irascible and forthright Christopher Hitchens stood out as a man determined to do just that In his younger years a career minded socialist he emerged from the smoke of 9 11 a neoconservative Marxist an advocate of America s invasion of Iraq filled with passionate intensity Throughout his life he played the role of universal gadfly whose commitment to the truth transcended the party line as well as received wisdom But how much of this was imposture In this highly critical study Richard Seymour casts a cold eye over the career of the Hitch to uncover an intellectual trajectory determined by expediency and a fetish for power As an orator and writer Hitchens offered something unique and highly marketable But for all his professed individualism he remains a recognizable historical type the apostate leftist Unhitched presents a rewarding and entertaining case study one that is also a cautionary tale for our times **Capability of U.S. Defense Industrial Base** United States. Mulligan, 2017-04-13 A second edition of this leading introduction to the origins of the First World War and the pre war international system William Mulligan shows how the war was a far from inevitable outcome of international politics in the early twentieth century and suggests instead that there were powerful forces operating in favour of the maintenance of peace He discusses key issues ranging from the military public opinion economics diplomacy and geopolitics to relations between the great powers the role of smaller states and the disintegrating empires In this new edition the author assesses the extensive new literature on the war s origins and the July Crisis as well as introducing new themes such as the relationship between economic interdependence and military planning With well structured chapters and an extensive bibliography this is an essential classroom text which significantly revises our understanding of diplomacy political culture

and economic history from 1870 to 1914 *Trials of War Criminals Before the Nuernberg Military Tribunals Under Control Council Law No. 10, Nuremberg, October 1946-April, 1949: Case 12: U.S. v. von Leeb (High Command case)*, 1949

France's struggles to reconstruct military power within the context of a global conflict with its armed forces shattered into warring factions and the country under Axis occupation. Disagreements over the causes of the 1940 debacle and the subsequent requirement for the armistice mirrored long-standing fractures in politics, society, and the French military itself, as efforts to reconstitute French military power crumbled into Vichy collaboration, De Gaulle's exile, resistance, Alsace-Moselle occupation, struggles, and a scuffle for imperial supremacy.

Trade in War Mariya Grinberg, 2025-08-15. Trade in War is an urgent, insightful study of a puzzling wartime phenomenon: states doing business with their enemies. Trade between belligerents during wartime should not occur. After all, exchanged goods might help enemies secure the upper hand on the battlefield. Yet, as history shows, states rarely choose either war or trade. In fact, they frequently engage in both at the same time. To explain why states trade with their enemies, Mariya Grinberg examines the wartime commercial policies of major powers during the Crimean War, the two World Wars, and several post-1989 wars. She shows that in the face of two competing imperatives—preventing an enemy from increasing its military capabilities and maintaining its own long-term security through economic exchange—states at war tailor wartime commercial policies around a product's characteristics and war expectations. If a product's conversion time into military capabilities exceeds the war's expected length, then trade in the product can occur, since the product will not have time to affect battlefield outcomes. If a state cannot afford to jeopardize the revenue provided by the traded product, trade in it can also occur. Grinberg's findings reveal that economic cooperation can thrive even in the most hostile of times and that interstate conflict might not be as easily deterred by high levels of economic interdependence as is commonly believed. Trade in War compels us to recognize that economic ties between states may be insufficient to stave off war.
