Bones Elaine Dewar, 2011-03-04 Scientists not so long ago unanimously believed that people first walked to the New World from northeast Asia across the Bering land bridge at the end of the Ice Age 11 000 years ago But in the last ten years new tools applied to old bones have yielded evidence that tells an entirely different story In *Bones* Elaine Dewar records the ferocious struggle in the scientific world to reshape our views of prehistory She traveled from the Mackenzie River valley in northern Canada to the arid plains of the Brazilian state of Piauí from the skull and bones lines offices of the Smithsonian Institution to the basement lab of an archaeologist in Washington State who wondered if the FBI was going to come for him She met scientists at war with each other and sought to see for herself the oldest human remains on these continents Along the way she found that the old answer to the question of who were the First Americans was steeped in the bitter tea of racism *Bones* explores the ambiguous terrain left behind when a scientific paradigm is swept away It tells the stories of the archaeologists Native American activists DNA experts and physical anthropologists scrambling for control of ancient bones of Kennewick Man Spirit Cave and the oldest one of all a woman named Luzia At stake are professional reputations lucrative grants fame vindication even the reburial of wandering spirits The weapons Lawsuits threats violence The battlefield stretches from Chile to Alaska Dewar tells the stories that never find their way into scientific papers stories of mysterious deaths of the bones of evil shamen and the shadows falling on the lives of scientists who pulled them from the

ground And she asks the new questions arising out of the science of bones and the stories of first peoples What if Native Americans are right in their belief that they have always been in the Americas and did not migrate to the New World at the end of the Ice Age What if the New World s human story is as long and complicated as that of the Old What if the New World and the Old World have always been one

Little Resilience Eli MacLaren, 2020-10-22 The Ryerson Poetry Chap Books were a landmark achievement in Canadian poetry Edited by Lorne Pierce the series lasted for thirty seven years 1925-62 and comprised two hundred titles by writers from Newfoundland to British Columbia over half of whom were women By examining this editorial feat Little Resilience offers a new history of Canadian poetry in the twentieth century Eli MacLaren analyzes the formation of the series in the wake of the First World War at a time when small presses had proliferated across the United States Pierce s emulation of them produced a series that contributed to the historic shift in the meaning of the term chapbook from an antique of folk culture to a brief collection of original poetry By retreating to the smallest of forms Pierce managed to work against the dominant industry pattern of the day agency publishing or the distribution of foreign editions Original case studies of canonical and forgotten writers push through the period s defining polarity modernism versus romanticism to create complex portraits of the author during the Depression the Second World War and the 1950s The stories of five Ryerson poets Nathaniel A Benson Anne Marriott M Eugenie Perry Dorothy Livesay and Al Purdy reveal poetry in Canada to have been a widespread vocation and a poor one as fragile as it was irrepressible The Ryerson Poetry Chap Books were an unprecedented initiative to publish Canadian poetry Little Resilience evaluates the opportunities that the series opened for Canadian poets and the sacrifices that it demanded of them
