Articles in English as a Second Language Justyna Leśniewska, 2019-06-02 The aim of this study is twofold firstly to provide an overview of research findings on the acquisition and use of articles in English as a second language secondly to investigate this issue from a phraseological perspective The book also presents an examination of various linguistic accounts of the English article system with respect to their application to English language teaching In view of the growing body of theoretical and empirical studies indicating that language use is to a considerable degree phraseologically motivated this book argues for a connection between formulaicity and correct article use This possibility is explored in two studies presented in the final chapter which suggest that correctness in the use of articles depends on the frequency of the phrases in which they appear These findings support the view that frequency driven conventionality in language may play a role in the acquisition and use of articles in L2 English This is a very important contribution to the discussion of the L2 acquisition of articles with particular regard to the L2 acquisition of English Such a discussion is required in view of the confusing variety of opinions expressed on this matter and the unsatisfactory nature of the pedagogical advice on offer to teachers of English as an L2 Dr Le niewska s study reviews the relevant literature interestingly and fully and it proposes an approach to article acquisition in L2 English which is long overdue Prof David Singleton Fellow Emeritus Trinity College *Reforming Bilingual Education* United States. Congress. House. Committee on Education and the Workforce. Subcommittee on Early Childhood, Youth, and Families, 1999 Linguistic Relativity in SLA ZhaoHong Han, Teresa Cadierno, 2010-06-18 Crosslinguistic influence is an established area of second language research and as such it has been subject to extensive scrutiny Although the field has come a long way in understanding its general character many issues still remain a conundrum for example why does transfer appear selective and why does transfer never seem to go away for certain linguistic elements Unlike most existing studies which have focused on transfer at the surface form level the present volume examines the relationship between thought and language in particular thought as shaped by first language development and use and its interaction with second language use The chapters in this collection conceptually explore and empirically investigate the relevance of Slobin s Thinking for Speaking Hypothesis to adult second language acquisition offering compelling and enlightening evidence of the fundamental nature of crosslinguistic influence in adult second language acquisition *New Methodological Approaches to Foreign Language Teaching* Thomas H. Schmidt, Laura Torres-Zúñiga, 2017-06-23 This volume explores how the traditional academic disciplines of linguistics translation literature and cultural studies can contribute to or be integrated into the teaching of a foreign language by means of innovative methodologies techniques and instruments The book begins with a selection of essays on applied linguistics that share some significant findings in the context of second or foreign language acquisition It then examines the ways in which linguistics translation theory literature and cultural studies are

brought into the foreign language classroom not just as objects of study but also as vehicles for language learning By presenting studies on four main foreign languages English Spanish French and German the collection offers to the foreign language profession an opportunity for the sharing and comparison of strategies across languages at both the secondary and higher education level The text is a valuable resource for language teachers with a more philologically oriented background who would like to learn how to apply their research knowledge and experience to the design and implementation of new methodological approaches New Perspectives on Transfer in Second Language Learning Liming Yu, Terence Odlin, 2016 When people attempt to learn a new language the language s they already know can help but also hinder their understanding or production of new forms This phenomenon known as language transfer is the focus of this book The collection offers new theoretical perspectives some in the empirical studies and some in other chapters and consists of four sections considering lexical syntactic phonological and cognitive perspectives The volume provides a wealth of studies on the influence of Chinese on the acquisition of English but also includes studies involving Finnish French Hindi Korean Persian Spanish Swedish and Tamil It will be of great interest to researchers and students working in the areas of crosslinguistic influence in second language acquisition language pedagogy and psycholinguistics **Teaching and Learning in Two Languages** Eugene E.
