International Handbook on Giftedness Larisa Shavinina, 2009-08-12 If you publish, you are trying to create something that is original that stands out from the crowd. Above all, you want to create something you are proud of. Richard Branson, 2002, p. 57. After the publication of my bestselling *International Handbook on Innovation*, publishers from around the world began to invite me to work on new books with them. When Springer invited me to prepare the *International Handbook on Giftedness*, I was on a maternity leave with my 3 months old and my 5 year old was just starting school. I however had wanted to prepare such a Handbook for a long time and was waiting for just the right moment to dive right into such an endeavor. The time had come and I agreed to prepare a Handbook that would expose readers to new views, great discoveries and significant advancements of scientific knowledge exactly as Richard Feynman advised. See his opening quote at the beginning of the introductory chapter: I have always been convinced of the paramount significance of the topic of giftedness and gifted education to the world as a whole. There is no doubt that gifted individuals are and will be extremely important to society. One way to understand the history of human civilization is via inventions and discoveries of the gifted. All human cultural development builds on the amazing technological, scientific, educational and moral achievements of the human mind. Today people increasingly realize that gifted and talented individuals are even more important than in the past.

Longitudinal Studies on the Organization of Social Interaction Simona Pekarek Doehler, Johannes Wagner, Esther González-Martínez, 2018-02-14 This book advances our understanding of change over time in human social conduct and represents the first consolidated effort to reveal how micro-analytic studies of social interaction address such issues. The book presents a collection of longitudinal studies drawing on conversation analysis across a variety of settings, practices, languages and timescales and analyses the ways in which participants produce and deal with practices changing over time. This edited collection will interest students and scholars of conversation analysis, sociolinguistics, discourse analysis, interactional linguistics and pragmatics.
