**Looking Fish in the Eye - Cataract as a Problem in Fish Farming** Nina Peuhkuri, Nordic Council of Ministers, 2009  
Increasing frequencies of cataracts i.e. opacities in eye lens have been diagnosed in farmed salmonids during past years. Cataracts have proven a pronounced problem in fish farming because it leads to reduced eyesight and even total blindness of the fish. Norway has been leading research on cataracts because of the economic significance of Atlantic salmon farming. Other issues in respect of stocking and animal welfare have been considered. There are still knowledge gaps on the causes of cataract as well as on its consequences. Furthermore, quantitative information on the severity of the problem is still largely lacking. The report presents results from a number of case studies that have been conducted by the project group and collaborators. The project has shown cataracts to be relatively common in all the six salmonid species included in surveys from Finland and Sweden. The prevalence and severity coverage of eye lens were however variable, often related to an exposure to *Diplostomum* spp. parasites that use fish as their intermediate hosts. The result contrasts with findings from Norway about the importance of nutritional imbalance and environmental abiotic factors in predisposing fish to cataract development. In that time they have evolved into a great variety of forms exploiting nearly every habitat the planet has to offer. In the dark depths of the oceans, in the seemingly inhospitable Polar Regions, in the driest deserts, even within the bodies of other animals, there are animal species that have developed unique and extraordinary means of surviving and thriving. Extraordinary Animals: An Encyclopedia of Curious and Unusual Animals is an exploration of those members of the animal kingdom who possess strange and bizarre adaptations that allow them to survive in the most extreme environments or whose complex lives can only be said to be bewildering. From the tar baby termite to the blue whale, from the harpy eagle to the naked mole rat, these species reflect the exceptionally broad spectrum of life, showing just how diverse the animal kingdom is. Extraordinary Animals has been thoroughly researched for scientific accuracy but is accessibly written in
