collaborations and comparative discussions elsewhere in Australia and globally spanning Europe Asia the Middle East and the United States The book is positioned not as a definitive theoretical model for transdisciplinary design education but instead as a collective of chapters in which many forms of learning are explored through overarching themes of curriculum design and experiential and authentic learning and collaboration transforming professional identities and design cultures

Transforming Universities in the Midst of Global Crisis Richard Hil, Kristen Lyons, Fern Thompsett, 2021-12-22 This book calls into question the colonial and neoliberal university presenting alternative models of higher education that can more effectively respond to today's intersecting social economic environmental and political crises The authors argue that universities should be driven by a different set of core values one that promotes the common good over private or commercial interests individualism and market fundamentalism Presenting a broad range of educational initiatives from around the world that reflect life affirming regenerative and relational practices Indigenous intellectual sovereignty and principles of social and ecological justice the authors contend that pathways toward transforming higher education already exist within and without the university This task say the authors is urgent and necessary if universities and other institutions are to hold relevance in a rapidly changing global environment This book makes a unique contribution to critiques of the modern neoliberal university by looking for alternatives within and beyond traditional institutions of higher education In doing so the authors dismantle the longstanding ivory tower image of the university instead resituating education within broader social and ecological communities

Transforming Universities in the Midst of Global Crisis is aimed at all those who have a direct or indirect interest and stake in universities from the general reader to futurists ecologists as well as students academics administrators managers policy makers and politicians
