

## Taking Care of a Fish

Fish live in water and there are lots of different types.

### Things a fish will need

Fish like good water because they can make gas, fish eat food.

For fish need to live in clean water or they can become ill.

## Taking Care of a Fish

Fish are very good to look after because they do not need lots of equipment.

What does a fish look like?

What does a fish need?

What do I need to remember about looking after my fish?

Different fish require different things. A goldfish needs cold water but other fish, the tropical fish, need warm water. Some fish need to be in salty water, like seawater, whereas other need fresh water.

How do I keep my fish healthy?

Fish breathe by taking in water through their gills. Therefore, it is vital for the water to be cleaned regularly. In a tank, the water is often cleaned by a filter.

## Taking Care of a Fish

Fish are very popular pets. Unlike dogs and cats, they are not kept out easily, but they are beautiful to watch and very relaxing.

What does a fish look like?

Fish, which come in a wide range of colours, are small animals that live in water. They move through the water using their fins and tails to help them. On the sides they have gills that they use to help them breathe under water. Additionally, they have large eyes to help them look around.

What does a fish need?

In the home, fish need to be kept in a fish tank. If there is just one fish, like a goldfish, then they can live in a fairly small tank but they need enough room to move freely. You may choose to keep lots of fish at one time, but if you do, you will need a large tank. Some fish live in cold water so their tank can be filled with water from the tap. Others need warm water to survive so their tank needs to have a special part that heats the water up. Some fish need fresh water, while others will need salt water in order to stay healthy.

*Looking After Aquarium Fish* David Alderton, 1983      *Looking After Fish*, 1975      **One Welfare in Practice** Tanya Stephens, 2021-10-25 Animal welfare has long been recognised as central to the role of the veterinary professional but this is increasingly aligned with the welfare of humans and the broader environment in which we co exist This is the first book dedicated to the role of the veterinarian in One Welfare a concept that recognises the interconnections between animal welfare human wellbeing and the

environment The book demonstrates through a wide range of international case studies why professional ethics and the use of good evidence is integral to this role Contributors bring a rich variety of writings each with their own perception of the role of the veterinarian in improving animal welfare and human wellbeing One Welfare in Practice The Role of the Veterinarian emphasises the importance of interdisciplinary collaboration and solutions it is essential that veterinary practitioners recognise when other professionals or disciplines need to be consulted to benefit both animals and humans With its multiple fascinating approaches to One Welfare this book will inform and inspire the veterinarian to find areas where collaborative action reaps the greatest rewards This unique book shows how veterinarians can and are contributing to improving animal and human welfare offering practical advice as to how the profession can further engage in One Welfare in a range of settings *Documents of the Senate of the State of New York* New York (State). **Aquaculture of the United States** Robert R. Stickney,1996-01-12 Aquaculture in the United States is a significant agribusiness industry but it is also a troubled one whose future is clouded by doubt Many aquaculture practices such as deliberately introducing exotic species hatcheries programs and pen culture in protected waters have come under intense attack from environmentalists Economic pressures on the industry from the value of coastal land the unavailability of suitable supplies of water and the legal costs of regulations have restricted growth This book looks at the past present and future of a troubled industry *The Fish Culturist* ,1925 **Toxic Sexual Politics** Melina Packer,2025-01-28 A bold expos of how the very foundation of toxicology has been contaminated by sexist and racist ideologies The first critical understanding of the field of toxicology from a feminist and antiracist perspective Toxic Sexual Politics asserts that the science of toxicants must be held accountable for the uneven distribution of toxic pollution along racial and sexual lines Drawing upon in depth interviews and extensive ethnographic and archival research including participant observations in toxicology classrooms conferences and laboratories Melina Packer urges environmental health advocates to place toxicant science within its masculinist militarist and eugenicist history Toxic Sexual Politics shows how the founding fathers of U S toxicology were ideologically aligned with the chemical industry inventing a science that could make chemicals safe as opposed to one that could adequately protect planetary health from toxicants hazards While many toxicologists today are critical of the chemical industry they continue to rely on the highly limited tools of toxicology as accurate measures of toxicity as do government regulators the courts and environmental advocates Unlike most critiques of the chemical industry and narratives of environmental health movements Toxic Sexual Politics refuses to take the science at face value By focusing on the sexist racist and ableist biases reinforced by toxicology Packer powerfully argues that this scientific discipline reproduces the very same white supremacist and heterosexist logics that generated environmental injustices in the first place The field of toxicology can explicitly confront chemical corporate power by building from queer feminist anti ableist and antiracist movements for environmental and reproductive justice **Hearings** United States.
