Lotus International 89 Quarterly Architectural Review:

Lotus International ,2002 **Hassan Fathy and Continuity in Islamic Arts and Architecture** Ahmad

Hamid,2010-11-01 Hassan Fathy the Egyptian architect known for his recognition of the potential of vernacular forms as a vital force in contemporary architectural design sought to integrate the traditions of Islamic art with his modern visions for living Guided by Fathy s principles Ahmad Hamid an architect who collaborated with Hassan Fathy in the Institute for Appropriate Technology identifies questions about the nature of Islamic art and its building culture as well as the origins of modern architecture This richly illustrated book provides new insights into Hassan Fathy s profuse pathbreaking design documents and built projects while exploring the socioeconomic environmental psychological and esthetic components of Fathy s work in the light of a quest for a new universal modernity for the twenty first century **Perspectives on Garden**

Histories Michel Conan,1999 Garden history is a discipline of contested purposes Perspectives on Garden Histories contributes to a self critical examination of this emergent field of study at the same time offering an overview of its main achievements in several domains such as Italian and Mughal gardens and of the new kinds of investigation to which they have led In its early years garden history centered on architectural studies of garden design but in the 1960s the emphasis shifted from garden design to garden meaning The new paradigm considered gardens as complex works of art and demanded an extensive documentation of the historical context as well as of the figurative and discursive sources This approach in its turn was challenged by neo Marxist scholars who proceeded to view landscape appreciation as an ideological superstructure an outgrowth of agricultural production processes Garden designs and their histories can also be viewed as expressions of ideological conflicts in society Neither gardens nor their history can thus be studied independently of the social cultural and political movements that give prominence to the contested ideologies Gardens can be used to foster some ideologies or reflect a reaction against a social change Comparative research offers another fascinating approach exploring the relations between European landscape concepts and other cultural contexts and discussing issues of cultural dominance and interpretation The emergence of various perspectives has led to the incorporation of further questions into the domain of garden studies which has been moving in new directions and using new methods in search of an adapted theoretical framework This volume offers a striking view of changes taking place in the discipline *Fairground Attractions* Deborah Philips,2012-01-19 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com The study investigates the cultural production of the visual iconography of popular pleasure grounds from the eighteenth century pleasure garden to the contemporary theme park Deborah Philips identifies the literary genres including fairy tale gothic horror Egyptiana and the Western which are common to carnival sites tracing their historical transition across a range of media to become familiar icons of popular culture Though the bricolage of narratives and imagery found in the contemporary leisure zone has been read by many as emblematic of postmodern culture the author

argues that the clash of genres and stories is less a consequence of postmodern pastiche than it is the result of a history and popular tradition of conventionalised iconography

Geography Unbound Anne Godlewska, 1999 At the end of the eighteenth century French geographers faced a crisis Though they had previously been ranked among the most highly regarded scientists in Europe they suddenly found themselves directionless and disrespected because they were unable to adapt their descriptive focus easily to the new emphasis on theory and explanation sweeping through other disciplines Anne Godlewska examines this crisis the often conservative reactions of geographers to it and the work of researchers at the margins of the field who helped chart its future course She tells her story partly through the lives and careers of individuals from the deposed cabinet geographer Cassini IV to Volney von Humboldt and Letronne innovators in human physical and historical geography and partly through the institutions with which they were associated such as the Encyclopédie and the Jesuit and military colleges Geography Unbound presents an insightful portrait of a crucial period in the development of modern geography whose unstable disciplinary status is still very much an issue today

Books and Periodicals Online, 2001

London Docklands Brian C. Edwards, 2013-10-22 London Docklands Urban Design in an Age of Deregulation discusses the process and products of the first 10 years of the London Docklands The book is comprised of 10 chapters that are organized into three parts The first part talks about the potentials of the London Docklands The second part presents the area of studies which are the Isle of Dogs Surrey Docks Wapping and the Royal Docks The last part deals with the observations and speculations The text will be a great source to urban planners particularly those who are involved in projects that deal with cities that are in close proximity to large bodies of water

The Urbanism of Frank Lloyd Wright Neil Levine, 2016 This is the first book devoted to Frank Lloyd Wright's designs for remaking the modern city Stunningly comprehensive The Urbanism of Frank Lloyd Wright presents a radically new interpretation of the architect's work and offers new and important perspectives on the history of modernism Neil Levine places Wright's projects produced over more than fifty years within their historical cultural and physical contexts while relating them to the theory and practice of urbanism as it evolved over the twentieth century Levine overturns the conventional view of Wright as an architect who deplored the city and whose urban vision was limited to a utopian plan for a network of agrarian communities he called Broadacre City Rather Levine reveals Wright's larger more varied interesting and complex urbanism demonstrated across the span of his lengthy career Beginning with Wright's plans from the late 1890s through the early 1910s for reforming residential urban neighborhoods mainly in Chicago and continuing through projects from the 1920s through the 1950s for commercial mixed use civic and cultural centers for Chicago Madison Washington Pittsburgh and Baghdad Levine demonstrates Wright's place among the leading contributors to the creation of the modern city Wright's often spectacular designs are shown to be those of an innovative precursor and creative participant in the world of ideas that shaped the modern metropolis Lavishly illustrated with drawings plans maps and photographs this book features the first extensive new

photography of materials from the Frank Lloyd Wright Foundation Archives The Urbanism of Frank Lloyd Wright will serve as one of the most important books on the architect for years to come **Progressive Architecture**, 1989 **The Publishers' Trade List Annual**, 1990 Current Contents. Arts & Humanities Institute for Scientific Information, 2001 Avery Index to Architectural Periodicals, 2d Ed., Rev. and Enl Avery Library, 1995 *Ulrich's Periodicals Directory* 2003 Edgar H. Adcock (Jr.), 2003 **Agrest and Gandelsonas Works** Diana Agrest, Mario Gandelsonas, 1995 Documents some 40 of the architects urban projects interiors and theoretical projects with plans renderings and color photos and sketches Includes interviews with the architects biographies and essays on architectural issues Google Books **Architecture and the Raj** Samita Gupta, 1985 *The Best of Both Worlds. Colin Rowe, contextualism, liberalism and the present urban design predicament* Antonio Pietro Latini, 2025-07-27 Questo libro raccoglie alcune analisi su aspetti dell'eredità di Colin Rowe e del gruppo creativo che si è formato attorno a lui a partire dagli anni Sessanta del secolo scorso che possono essere di grande utilità per affrontare e risolvere alcune delle difficoltà dell'urbanistica odierna Come il collo di una clessidra Rowe e la sua cerchia sembrano essere stati in grado di accumulare selezionare e utilizzare come riferimento un groviglio generoso eppure complesso e contraddittorio di idee concetti metodi e modelli variamente disponibili in un mondo di dinamiche culturali per contribuire alle esigenze della progettazione e in particolare della progettazione urbana creando un sistema di diverse conoscenze di combinazioni e di logiche Contestualismo e liberalismo sono due degli approcci caratterizzanti supportati dalle teorie di Rowe che potrebbero rivelarsi più utili nello stato attuale della progettazione urbana DOI 10.13134/979.12.5977.5016 **Modern Architecture** Neil Levine, 2009 In this work esteemed architectural historian Neil Levine investigates the complex history of representation from the 18th to the 20th century Using the lens of a continuous theoretical argument Levine provides a detailed survey and critical analysis of major works by a host of modern architects *Ulrich's International Periodicals Directory* Carolyn Farquhar Ulrich, 1998 *ARIC Bibliography*, 1997 Sacred Buildings Rudolf Stegers, 2008-05-16 The building of religious structures represents a rare opportunity for the architect to concentrate on the creation of volume space and form Sacred architecture is far less determined than other building tasks by functional requirements norms and standards As a rule it is free to unfold as pure architecture Thus in design terms this building task offers enormous freedoms to the architect At the same time however the special atmospherics of sacred spaces call on the part of the architect for a highly sensitive treatment of religion and the relevant cultural and architectural traditions In a systematic section this volume introduces the design technical and planning fundamentals of building churches synagogues and mosques In its project section it also presents about seventy realized structures from the last three decades Drawing upon his in depth knowledge of the subject and his many years of publishing experience the author offers a valuable analysis of the conceptual and formal aspects that combine to create the religious impact of spaces e.g. the ground plan the shapes of the spaces the incidence of light and materiality
