McVicker, 2015-05-07 The past quarter century has seen a number of biographies and anthologies on women travelers but to date there has been little comprehensive reference work done on the travelers themselves Some of the women were eccentric many were very adventurous some were in search of a different world British women make up the largest portion of the book's focus these particular adventurers being backed in many cases by family money scientific inquiry and the ready availability of the British seafaring tradition Entries include the woman's family background her educational history and a summary of her world travels with in many cases evocative extracts from their writings many are literary gems *19th Century Female Explorers* Caroline Roope, 2025-08-05 As any historian will testify a nineteenth century woman's place was very much at home Or was it For a lucky and plucky few who had a little determination and the ability to withstand lice infestations climbing mountains in corsets rascally guides and occasional certain death as well as the raised eyebrows of the society they left behind then the world really was their oyster In this lively re-telling of twenty-two extraordinary ladies who did just that Caroline Roope invites you to journey to the further corners of the earth along with them From humble missionary Annie Royle Taylor who knew God would keep her safe to the haughty aristocrat Lady Hester Stanhope who defied convention and dressed as a Turkish man including pistol knife and turban their collective voices still resonate hundreds of years later Drawing on their original accounts and archival sources this expertly researched book brings to light a wealth of stories that are full of grit sometimes literally courage and just enough humor to wish we'd been there with them on their adventures on the other side of the horizon So pack a suitcase along with a good thick skirt la Mary Kingsley and prepare to go beyond the garden gate **Dazzled and Deceived** Peter Forbes, 2011-11-15 Nature has perfected the art of deception Thousands of creatures all over the world including butterflies moths fish birds insects and snakes have honed and practised camouflage over hundreds of millions of years Imitating other

animals or their surroundings nature's fakers use mimicry to protect themselves to attract and repel to bluff and warn to forage and to hide The advantages of mimicry are obvious but how does blind nature do it And how has humanity learnt to profit from nature's ploys Dazzled and Deceived tells the unique and fascinating story of mimicry and camouflage in science art warfare and the natural world Discovered in the 1850s by the young English naturalists Henry Walter Bates and Alfred Russel Wallace in the Amazonian rainforest the phenomenon of mimicry was seized upon as the first independent validation of Darwin's theory of natural selection But mimicry and camouflage also created a huge impact outside the laboratory walls Peter Forbes cultural history links mimicry and camouflage to art literature military tactics and medical cures across the twentieth century and charts its intricate involvement with the dispute between evolution and creationism *The Love*
