Theology for a Liberating Church Alfred T. Hennelly, 1989 Freedom is a fundamental Christian theological category as much a challenge to construct a new way of seeing oneself and others as it is an announcement of what Christ has already done for us in his death and resurrection Liberation theology is most simply the effort to spell out what such freedom means for Christians in the twentieth and twenty first centuries This book has as its principle premise the conviction that if we are to construct a North American liberation theology we must begin listening to and understanding Latin American theology not so much as a model

to be slavishly followed but as a challenge to our own cultural political and even religious assumptions The focus thus is not so much on the theoretical meaning of Christian freedom but on its practice and more exactly its praxis that is to say the dialectic between theory and practice After focusing on the creation and development of liberating theological methods and sources and above all the revitalization and renewal of structures that will contribute to the development of a liberated and liberating church Fr Hennelly ends with an analysis of the most recent and the most important vatican document on liberation theology The Instruction of Christian Freedom and Liberation which he sees as an acknowledgement by the universal church that the theme of liberation is central to the meaning of Christian theology

Immovable Laws, Irresistible Rights Christine Pierce, 2000 Same sex partnerships Pregnancy through in vitro fertilization

Ending one's own life in dignity All are deemed inherently wrong by the standards of natural law ethics but for many people they represent legitimate life choices that are morally right Now a leading feminist critic of the natural law tradition explores the ongoing confrontation between natural law and moral rights to argue that rights constitute a more solid grounding for ethics in human affairs and for feminist thought In this volume Christine Pierce's important essays including the celebrated Natural Law Language and Women expand reflect and refine this central controversy Reaching back to Aristotle and Aquinas and drawing on modern papal encyclicals and Supreme Court cases Pierce demonstrates that the natural law tradition with its doctrine of a supposed hierarchy of natural purpose has served to mystify women's nature and thereby justify restricting women to a predetermined social stratum Addressing issues that concern not only feminism but legal theory as well she defends her views on equality and universalization against a growing postmodern critique and presents rights theory as an alternative to an ethics of responsibility based on Aristotelian notions of friendship and trust Through tightly constructed arguments presented in engaging prose Pierce conveys her deep knowledge of legal philosophy and her passion for rights as she takes on such issues as AIDS gay marriage animal liberation and feminist separatism She combats the prevailing view of Plato as sexist and explores Sartre's views of holes and slime She also examines the work of contemporary authors in ecology biology sociobiology and religion to reveal their reliance on nature for ethical conclusions and she criticizes recent efforts to root a feminist natural law in Thomism With natural law concepts now in fashion with many conservatives and even some Supreme Court justices Pierce's essays offer a necessary perspective on where current legal and ethical thinking is headed Immovable Laws Irresistible Rights is invigorating reading for all scholars students and interested readers who seek a better understanding of these arguments and the issues affected by them
