Making the American Team Mark Dyreson, 2024-04-22 Sport dominates television and the mass media Politics and business are a bustle with sports metaphors Endorsements by athletes sell us products Home run slam dunk and the rest of the vocabulary of sport color daily conversation Even in times of crisis and emergency the media reports the scores and highlights Marky Dyreson delves into how our obsession with sport came into being with a close look at coverage of the Olympic Games between 1896 and 1912 How people reported and consumed information on the Olympics offers insight into how sport entered the heart of American culture as part of an impetus for social reform Political leaders came to believe in the power of sport to revitalize the republican experiment Sport could instill a new sense of national identity that would forge a new sense of community and a healthy political order while at the same time linking America s intellectual and power elite with the experiences of the masses *An Introduction to American Civilization* Harold Ordway Rugg, 1929 Interesting readings from which you can get additional information at end of each chapter **Making History Matter** Robert

Dawidoff, 2000 This collection of Robert Dawidoff s essays and journalism is peopled by the likes of the Founding Fathers Fred Astaire Henry and William James Sophie Tucker Trent Lott and Cole Porter Drawing together this unlikely cast of characters Dawidoff probes into the role of outsider groups as well as intellectual and political elites in the formation of American culture As a scholar of intellectual and cultural history Dawidoff takes the stance that historians ought to take an active role in our democratic culture informing and participating in public discourse He argues for a broad reach when it comes to cultural expression resisting the polarization of formal intellectual history and folk or commercial popular culture In his view and in his book Ralph Waldo Emerson and Katharine Hepburn are equally worthy topics for a historian s consideration providing that they are treated with equal seriousness of purpose and analytic rigor In The Gay Nineties section that closes the book he traces key events in the continual struggle for gay and lesbian civil rights and takes on such unresolved issues as safer sex needle exchange programs to control HIV transmission and the public controversy around the

portrayal of gay and lesbian television characters Divided into sections that deal with the patriarchs of American political and intellectual culture expressive culture and a historian's public voice this book is a model of engaged and engaging writing Accessible and witty Making History Matter will appeal to general and academic readers interested in American history as well as gay and lesbian political and cultural issues Author note Robert Dawidoff is John D and Lillian Maguire Distinguished Chair and Professor of History at Claremont Graduate University He is most recently the author with Michael Nava of Created Equal Why Gay Rights Matter to America and The Genteel Tradition and the Sacred Rage High Culture V Democracy in Adams James and Santayana

Making America, Making American Literature A. Robert Lee, W. M. Verhoeven, 1996 If 1776 heralds America's Birth of the Nation so too it witnesses the rise of a matching and overlapping American Literature For between the 1770s and the

1820s American writing moves on from the ancestral Puritanism of New England and Virginia though not as yet into the American Renaissance so strikingly called for by Ralph Waldo Emerson Even so the concourse of voices which arise in this period that is between and including Benjamin Franklin and James Fenimore Cooper mark both a key transitional literary generation and yet one all too easily passed over in its own imaginative right This collection of fifteen specially commissioned essays seeks to establish new bearings a revision of one of the key political and literary eras in American culture Not only are Franklin and Cooper themselves carefully re evaluated in the making of America s new literary republic but figures like Charles Brockden Brown Washington Irving Philip Freneau William Cullen Bryant the other Alexander Hamilton and the playwrights Royall Tyler and William Dunlop Other essays take a more inclusive perspective whether American epistolary fiction a first generation of American women authored fiction the public discourse of The Federalist Papers the rise of the American periodical or the founding African American generation of Phillis Wheatley What unites all the essays is the common assumption that the making of America was as much a matter of creating its national literature as the making of American literature was a matter of shaping a national identity

Religious Myths and Visions of America

Christopher Buck, 2009-04-30 At the heart of American studies is the idea of America itself Here Buck looks at the religious significance of America by examining those religions that have attached some kind of spiritual meaning to America The author explores how American Protestantism and nine minority faiths have projected America into the mainstream of world history by defining and by redefining America s world role Surveying the religious myths and visions of America of ten religions Buck shows how minority faiths have redefined America s sense of national purpose This book invites serious reflection on what it means to be an American particularly from a religious perspective Religious myths of America are thought orienting narratives that serve as vehicles of spiritual and social truths about the United States itself Religious visions of America are action oriented agendas that articulate the goals to which America should aspire and the role it should play in the community of nations Buck examines the distinctive perspectives held by ten religious traditions that inform and expand on the notion of America and its place in the world He covers Native American Protestant Catholic Jewish Mormon Christian Identity Black Muslim Islamic Buddhist and Baha i beliefs and invites serious reflection on what it means to be an American particularly from a religious perspective

The Making of Middlebrow Culture Joan Shelley Rubin, 2000-11-09 The proliferation of book clubs reading groups outline volumes and new forms of book reviewing in the first half of the twentieth century influenced the tastes and pastimes of millions of Americans Joan Rubin here provides the first comprehensive analysis of this phenomenon the rise of American middlebrow culture and the values encompassed by it Rubin centers her discussion on five important expressions of the middlebrow the founding of the Book of the Month Club the beginnings of great books programs the creation of the New York Herald Tribune s book review section the popularity of such works as Will Durant s *The Story of Philosophy* and the emergence of literary radio programs She also investigates the lives and expectations of the individuals who shaped these

middlebrow institutions such figures as Stuart Pratt Sherman Irita Van Doren Henry Seidel Canby Dorothy Canfield Fisher John Erskine William Lyon Phelps Alexander Woollcott and Clifton Fadiman Moreover as she pursues the significance of these cultural intermediaries who connected elites and the masses by interpreting ideas to the public Rubin forces a reconsideration of the boundary between high culture and popular sensibility The Making of a Great Race Edward Alfred Steiner,1929 **The Americans: The Democratic Experience** Daniel J. Boorstin,2010-11-03 Winner of the Pulitzer Prize A study of the last 100 years of American history Making Capitalism Work Leonard Silk,Mark Silk,1996-11 A Twentieth Century Fund book The Making of a History Gregory M. Tobin,2014-09-10 Walter Prescott Webb became one of the best known interpreters of the American West following the publication of *The Great Plains* in 1931 That book remained one of the outstanding studies of the region for decades and attracted considerable attention over the years for its unusual emphasis on the impact of geographic factors on the process of settlement Using manuscript sources some of which had not previously been available Gregory M Tobin has traced the elements that went into the planning and writing of *The Great Plains* and that account for its distinctive approach to the writing of a regional history Tobin emphasizes two aspects of Webb's life that molded the historian's outlook his early family life and community connections in West Texas and his admiration for the ideas of scholar Lindley Miller Keasbey Webb reacted strongly against the assumption that the only cultural values of any real worth emanated from the urban and sophisticated East he was determined to write the history of his own people in a way that would reveal the scale of their anonymous contribution to American civilization By reverting to Keasbey's stress on the relationship between natural environment and social institutions Webb broadened his study to take in what he believed to be a distinct geographic environment The result was *The Great Plains* an assertion of individual and regional identity by a man with a personal stake in establishing the image of a distinctive Plains civilization Although *The Making of a History* is not a full biography of Walter Prescott Webb it is the first biographically oriented study of a man regarded as one of the twentieth century's major western historians It places his development within the framework of his intellectual and social setting and in a sense subjects his career to the same type of scrutiny that he advocated as the basis of the study of evolving cultures The National Civic Federation and the Making of a New Liberalism, 1900-1915 Christopher J. Cyphers,2002-01-30 Founded in 1900 the National Civic Federation NCF a broad based nongovernmental social and policy reform organization emerged throughout the Progressive Era as one of the nation's most powerful policy research and lobbying groups Amidst the strong demand by rank and file Americans for economic and social reform the NCF proposed that the government begin to assume a more prominent role in managing the nation's economy and providing for the needs of the country's weakest and most vulnerable citizens The organization constructed broad based coalitions of business leaders labor leaders social scientists and politicians with diverse backgrounds to fashion model legislation and promote public policy aimed at meeting the demands created by modern capitalism Cyphers work challenges the longstanding assumption that

organizations like the NCF existed simply to build a relationship between big business and the government for the sole benefit of big business He argues that the NCF sought the preservation of the fundamental tenets of American liberalism and the redefinition of this liberalism for a modern polity whose life was shaped by industrial and commercial capitalism It saw the individual states rather than the federal government as the ideal mechanism to promote uniform economic and social reform Cyphers also charts the origins of civic cooperation and the creation of voluntary associations as alternatives to the statist remedies to modern economic and social problems that were championed by America s early 20th century socialist movement

Edwin Du Bois Shurter,Charles Almer Marsh,1929 **American Studies: The Basics** Andrew Dix,2021-11-02 American Studies The Basics is an accessible and concise introduction that aims to unpack what American studies does and why it matters From Moby Dick to baseball Hollywood westerns to BlackLivesMatter and Disneyland to the U S Supreme Court American studies engages with a myriad of topics in its efforts to understand what the French sociologist Jean Baudrillard called social and cultural America The book begins by considering how America was studied before American studies

emergence as a recognized discipline in the mid twentieth century Successive chapters then explore the rise of American studies its varied subjects its distinctive methods of research its geographical framing and its politics Throughout the book explanatory examples are drawn from across American history and culture Photographs are examined alongside novels and historical monuments discussed next to films The text offers an ideal way into an exciting academic subject of continuing growth and relevance This book is a must read for those studying and with an interest in American studies Race and Epistemologies of Ignorance Shannon Sullivan,Nancy Tuana,2012-02-01 Offering a wide variety of philosophical approaches to the neglected philosophical problem of ignorance this groundbreaking collection builds on Charles Mills s claim that racism involves an inverted epistemology an epistemology of ignorance Contributors explore how different forms of ignorance linked to race are produced and sustained and what role they play in promoting racism and white privilege They argue that the ignorance that underpins racism is not a simple gap in knowledge the accidental result of an epistemological oversight In the case of racial oppression ignorance often is actively produced for purposes of domination and exploitation But as these essays demonstrate ignorance is not simply a tool of oppression wielded by the powerful It can also be a strategy for survival an important tool for people of color to wield against white privilege and white supremacy The book concludes that understanding ignorance and the politics of such ignorance should be a key element of epistemological and social political analyses for it has the potential to reveal the role of power in the construction of what is known and provide a lens for the political values at work in knowledge practices
