*Manual of Aesthetic Surgery 1* Werner Mang, 2013-04-17 Aesthetic surgery is an interdisciplinary specialty Its members are recruited from the fields of surgery gynecology orthopedics otolaryngology ENT maxillofacial surgery plastic surgery ophthalmology and dermatology In most cases they are specialists who have become interested in practicing aesthetic surgery after completing their specialist training Aesthetic surgery is not synonymous with plastic surgery During their training in aesthetic surgery aspiring aesthetic surgeons have to learn special surgical techniques which are unfortunately not adequately described in the postgraduate training catalogues This manual has been prepared as an audiovisual medium It presents the most important standard operations in the field of aesthetic surgery in a clearly understandable style We hope that the manual will help young surgeons to learn the techniques of aesthetic surgery an equally important to avoid mistakes and complications The Manual is primarily aimed at specialists in aesthetic surgery However it is also suitable for physicians who become interested in aesthetic surgery after finishing medical school who would like to find out about the field and for the natural target group of physicians who want to learn the techniques of aesthetic surgery after completing their specialist training

Gleason, 2012-12-06 Initially we asked Springer Verlag why they thought the world needed another book about aesthetic surgery They pointed to the popularity of the Comprehensive Manual of Surgical Specialties Series suggesting that completeness required our contribution We recalled the current masters of aesthetic surgery Rees

Sheen among others Each had produced his own monograph all of them established classics What could we add Furthermore none of us was recognized exclusively for aesthetic surgery achievements Nevertheless each of us was committed to the challenge of teaching residents aesthetic surgery during their residency not afterward as was done in the past Furthermore Dick Egdahl Senior Editor and designer of CMSS made clear to us the specific orientation of the manuals to residents in training as did Springer Verlag well known for their commitment He won our support to high quality color illustrations We appreciate being asked by Dr Egdahl to contribute to CMSS We were not even offended by his original plan to embrace all of plastic surgery in one volume He should have known better The Manual of Reconstructive Surgery will follow this volume in 2 years Defining its scope remains an unmet challenge Limiting the scope of Manual of Aesthetic Surgery has been an easier task It is a sourcebook for beginning residents not an encyclopedic reference
