digital textile printing emerged and to engage critically with the many issues that it raises the changing role of the designer in the creation of printed textiles the ways in which the design process is being transformed by new technology the relationships between producers clients and the textile industry and the impact of digital printing on the wider creative industries At the core of this study are two key questions what constitutes authenticity in an age when printed textiles are created through the combined agency of the artist designer and the computer And how can this new technology be put to work in a sustainable way during a period of spiralling demand
