Bach, E.A. Lock, 2012-12-06 The Treatment of Glomerulonephritis C.D. Pusey, 2007-05-28 Glomerulonephritis is one of the commonest causes of end stage renal failure worldwide Although there have been considerable advances in the management of renal failure by dialysis and transplantation there has been relatively little progress in its prevention This volume sets out to review current practice in the treatment of glomerulonephritis which is aimed both at controlling the clinical manifestations e g nephrotic syndrome and at preventing the progression to renal failure The term glomerulonephritis covers a wide range of conditions with different immunological histological and clinical features This volume therefore starts with reviews of the immunology and pathology of different types of glomerulonephritis This is followed by detailed consideration of the treatment of the

commoner primary and secondary forms of the disease There are separate chapters on special circumstances such as glomerulonephritis in pregnancy or following renal transplantation In each chapter attempts are made to review the evidence for the effectiveness of treatment based on controlled trials immunopathological principles and the authors considerable experience Although some aspects of the treatment of glomerulonephritis can be found in the standard texts on renal disease this volume provides an up to date thoroughly referenced and practical guide to management As such it should be of value to nephrologists and general physicians including those in training and to postgraduate students of nephrology

Clinical Management of Electrolyte Disorders Mary G. McGeown, 2012-12-06 Serious disturbances of fluid and electrolyte balance are frequently encountered in acutely ill patients somewhat less often in the chronically sick There seems to be a trend for such cases to increase due probably to an increase in major surgical procedures on older patients whose renal function is less than adequate There are already many publications dealing with the physiology of the homeostasis of fluid and electrolytes and others dealing with the clinical aspects of the subject It is often assumed that a knowledge of the basic principles of physiology will enable the doctor to prescribe suitable intravenous therapy In practice this is often found not to be so and the evidence for this is the frequency of calls for help with electrolyte problems from well qualified and experienced doctors who are undoubtedly equipped with adequate or even excellent knowledge of the basic It is not an unusual observation that knowledge of theory and principles involved does not necessarily lead to successful practice in this or any other art or craft Most doctors already possess knowledge of the physiology of the internal environment but some are aware of being unable to deal effectively with clinical problems related to fluid and electrolyte disturbances and seek guidance to translate theoretical knowledge into practice

Prescribing Hemodialysis T.A. Depner, 2012-12-06 What regulation shall we have for the operation Shall a man transfuse he knows not what to correct he knows not what God knows how I Dr Henry Stubbs Royal College of Physicians circa 1670 If dialysis

therapy were a new pharmaceutical product being evaluated by the FDA now it might not be approved for marketing The recommended dose its potential toxicity the side effects of under or over dialysis as well as its efficacy have been the subject of very few studies The high mortality rate associated with the treatment may raise a few eyebrows That it is a life saving modality of treatment is undoubtedly true for more than 100 000 patients in the United States and for more than a million patients world wide Because dialysis has extended the lives of many people by a variable period of time most nephrologists have rested on their laurels and did not vigorously pursue studies to optimize these treatments But facts have a way of intruding in all our lives and the facts are that the overall mortality rate of dialysis patients in the United States is rising and stands close to 25% per year and is closer to 33% per year for patients between the ages of 65 and 74 2 These mortality figures are considerably higher for age adjusted dialysis populations in Europe and particularly in Japan and certainly for the age adjusted nonnal population

**Computer Programs in Clinical and Laboratory Medicine** D. John Doyle, 2012-12-06 This book is the result of several years of enthusiastic planning and effort Much of this enthusiasm came from the experience of developing Critical Care Consultant a large BASIC program for critical care applications St Louis C V Mosby 1985 Working with clinicians showed me that many were interested in learning about clinical applications of computers and even programming in small doses but were faced with a paucity of clinical application software Few had the time or training to develop any such software on their own After a search through the existing medical literature unearthed relatively little in the way of usable programs I decided that a series of small clinical applications programs would be of use to the medical community At the onset a number of strategic decisions were made 1 the programs would be written in BASIC in view of its universal popularity 2 the units used for clinical laboratory tests would be those in common use in the United States 3 the programs would be simple and easily understood and employ no exotic tricks that were not easily transported

across computers 4 references to the literature would be provided to allow the clinician to critically assess the algorithm or method used himself or to follow up on subsequent criticisms that may have been published and 5 the programs would demonstrate reasonable standards of software engineering in terms of clarity trans portability documentation and ease of modification

**Clinical Diagnosis and Management by Laboratory Methods** James Campbell Todd, John Bernard Henry, 1984

**Guide to Reprocessing of Hemodialyzers** Norman Deane, Robert J. Wineman, James A. Bemis, 2012-12-06
