Handbook of Geriatric Medicine Mason Button, 2019-06-06 Geriatric medicine is aimed at the promotion of health in older adults. There is no particular age at which patients are placed under the care of a geriatrician. It depends on the patient's needs. Owing to a physiologic decline in organs, older adults develop certain diseases and complications from even minor problems. Sometimes even multiple problems can compound, often leading to polypharmacy. This can lead to adverse drug reactions and drug interactions. Geriatric medicine can have several specializations depending on the care provided to the elderly. Some of such specializations are geriatric nephrology, geriatric dentistry, geriatric rheumatology, geriatric urology, etc. This book provides comprehensive insights into the field of geriatric medicine. It presents researches and studies performed by experts across the globe. It will help the readers in keeping pace with the rapid changes in this field.
