Handbook of Chemical and Biological Warfare Agents, Volume 2 D. Hank Ellison, 2022-12-09. The Handbook of Chemical and Biological Warfare Agents, Volume 2: Pathogens, Mid-Spectrum, and Incapacitating Agents, Third Edition, provides rapid access to key data to response professionals and decision makers on a broad range of agents and pathogens. This volume presents information on a wide range of chemical and biological agents. Chemical agents detailed in this volume are those that were developed specifically for their non-lethal potential. The biological agents described are militarily significant pathogens that could be weaponized to pose a threat to people, animals, or crops and other agricultural interests. Mid-spectrum agents, materials that do not fit clearly into either the Chemical or the Biological Weapons Conventions, include toxins and bioregulators. Entomological agents, the final class of agents discussed in volume, are arthropods that could pose a significant threat to a country's agriculture, infrastructure, and be used to devastate its economy. They were proposed for inclusion in the Biological Weapons Convention but never adopted. In addition to a discussion of each of these classes of agents, coverage includes detailed information on a broad spectrum of individual agents that have been used on the battlefield, stockpiled as weapons, used or threatened to be used by terrorists, or have been otherwise assessed by qualified law enforcement and response organizations and determined to be agents of significant concern. The information presented in this edition has been updated and expanded to contain more information on toxicology, health effects, presentation of diseases, advances in medical care and treatment, as well as protective actions needed at the scene of an incident.

Key Features: Focuses on the key information needed during an emergency response. Provides updated toxicology, exposure hazards, physical/chemical data, and treatment of casualties. Profiles the presentation of diseases in people, animals, and plants. Presents updated protective action distances, decontamination, and remediation information. All data compiled is gathered from numerous sources and arranged into the current, easy-to-access format. In order to ensure accuracy, all data has been cross-checked over the widest variety of military, scientific, and medical sources available.

Research Grants Index National Institutes of Health (U.S.). Division of Research Grants,1966 **Planning and Designing Research Animal Facilities** Jack Hessler,Noel Lehner,2011-04-28 Research institutions have or are planning to build expand and renovate animal research facilities to keep up with the demands of biomedical research caused in part by growth in the use of genetically altered rodents and the upsurge of research in infectious diseases Properly designed facilities greatly facilitate effective management and high quality day to day animal care that is required to optimally support animal research and testing There are multiple solutions to address the myriad of factors that influence the design and construction of animal research facilities There is no best design applicable for all facilities and arguably not even a single best design for a given facility For this reason Planning and Designing Research Animal Facilities is not intended to be a how to book The goal is to cover the basic programmatic requirements of animal research facilities provide ideas for meeting those requirements while hopefully stimulating the creative process in which designers in consultation with those who work in animal research facilities generate even better ideas That is how progress has been made and will continue to be made Facilitates communication between the parties involved in planning and designing animal facilities by providing contemporary information and stimulating creativity that will help lead to wise decisions and advance the knowledge base for planning design and constructing animal research facilities
