Historical Earthquakes, Tsunamis and Archaeology in the Iberian Peninsula Manuel Álvarez-Martí-Aguilar, Francisco Machuca Prieto, 2022-06-22 Research on historical earthquakes and tsunamis in the Iberian Peninsula has made great strides in recent years from diverse scientific fields ranging from geology to archaeology. In addition to the famous earthquake and tsunami of 1755 which intensely affected the peninsula researchers are conducting a growing number of surveys and case studies on seismic episodes and extreme wave events of possible tsunamigenic origin in Portugal and Spain during the ancient medieval and modern eras. However the development of these studies has suffered due to a certain lack of communication among the different fields of research which are focused on their own methodologies and interests. The aim of this book is to promote interdisciplinary dialogue by linking the results of the most recent research into historical earthquakes and tsunamis in Iberia from the fields of geology history and archaeology. The volume which devotes special attention to tsunamis and to events that occurred in the Iberian Peninsula before 1755 offers synthetic insights, updates and case studies of maximum interest for knowledge of the historical seismology of Portugal and Spain
