*Manufacturing Culture* Meric S. Gertler, 2004 Recent years have seen a lively debate over the role of tacit knowledge and interactive learning in privileging the local over the global Yet our continuing inability to answer questions such as when and why is the local important in production and innovation processes indicates that our understanding of the firm and the forces that shape its managers choices remains weak Such a theory ought to be able to answer fundamental questions like why do firms in particular places adopt particular production and innovation practices and not others What forces determine what a firm knows and when it is able to act upon this knowledge How easy is it to transfer this knowledge between places This book presents a new conception of industrial practice and firm behaviour It explains how the cultures that shape the practices of firms and the trajectories of regional and national economies are actually produced The analysis shows how the internal and inter firm organization of production use of technologies and the industrial knowledge underpinning these practices are strongly influenced by their social and institutional context Routine forms of behaviour are not simply inherited

**The Economic Geography of the IT Industry in the Asia Pacific Region** Philip Cooke, Glen Searle, Kevin O'Connor, 2013-07-18 The development of the information technology IT industry in the Asia Pacific region faces two challenges Firstly can its established physical technical regional and governance infrastructures be adapted to meet the challenges embedded in the set of products and processes created by the IT industry Secondly as this adaptation evolves which cities and regions will be best suited to connect to or lead global responses to these challenges The chapters in this book have set out to explore these questions providing details of change in a range of aspects of the IT industry such as mobile phones software services and flat screen

design in regions in Japan Korea Taiwan India China and Australia The book also outlines the policy responses of national and regional governments in Singapore India and China and India These case studies provide a basis to understand effective strategies which could be formulated for the future This book s originality emerges from the fine detail provided about firms in particular regions and cities from research carried out by young scholars in the past two years This makes it very useful for readers keen to understand the recent changes in this dynamic industry in a fast growth part of the world and it will also help to shape thinking by policy makers on policy settings that can be applied

**Community, Economic Creativity, and Organization** Ash Amin,Joanne Roberts,2008-09-25 Communities of practice like social capital and networks is an idea that has been widely adopted in the social sciences particularly in discussion of innovation and creativity This book evaluates the concept and its uses and will be an essential guide for students and researchers

Higher Education in a Sustainable Society Hans Chr. Garmann Johnsen,Stina Torjesen,Richard Ennals,2015-03-28 This book addresses the following question What is a sustainable society and how can higher education help us to develop toward it The core argument put forward is that the concept of sustainability reaches much farther than just the direct aspects of environmental threats and carbon emissions Using higher education as a point of departure the book shows that sustainability involves a broad range of disciplines from nursing and nutrition to technology and management It argues that a sustainable society entails a distinct perspective on society that influences our social thinking in terms of ethics democracy and knowledge development The book also discusses if and if so how higher education can and should contribute to such a development based on the principles of the freedom of science in a liberal democratic society The book presents Mutual Competence Building as a concept higher education can adapt in order to contribute to a sustainable Society

Putting Voters in Their Place Ron Johnston,Charles Pattie,2006-10-12 Using information from the UK elections this title shows how voters and parties are affected by and seek to influence both national and local forces placing the analysis of electoral behaviour into its geographical context

**Poliomyelitis** Matthew Smallman-Raynor,Andrew David Cliff,2006 For parents few infections scored higher than poliomyelitis on the dread factor from the early years of the twentieth century as each successive wave of the disease outdid its predecessor in the number of children it crippled and killed But from the 1950s this picture abruptly changed when preventive vaccines were developed which have brought the disease to the edge of global eradication Part I Epidemic Emergence 1881 1920 looks at the transition from endemic to epidemic poliomyelitis in Europe and the United States Part II Global Expansion 1921 55 covers the pre vaccination period of epidemic poliomyelitis at world continental and island scales Part III Global Retreat 1955 88 focuses upon the control of poliomyelitis by mass vaccination campaigns Part IV Global Eradication concludes the book by focusing upon the road to eradication to which the Forty first World Health Assembly committed in 1988 And so at the beginning of a new millennium poliomyelitis looks set to be the first disease since smallpox in 1979 to be eradicated by direct human intervention with the interruption of wild poliovirus transmission expected in 2005

The evolution of poliomyelitis to global epidemiological significance from the 1920s marks it out as one of the world's major emergent infections of the twentieth century. What causes diseases to wax and wane in time and space is a theme of contemporary scientific interest as we seek to understand the appearance of new conditions such as Ebola fever, Legionnaires disease and HIV and this book contributes to our comprehension of likely causes. *Industrial Transition* Martina

Fuchs, Martina Fromhold-Eisebith, 2016-05-23 Recently the international division of labour in industrial production has grown increasingly more volatile. The separation between high end tasks undertaken in the traditional core economies and low end tasks undertaken in newly emerging economies has become increasingly blurred. The new dynamics and unpredictability of actor and process configurations in internationalized production bring new challenges for research in economic geography, regional economics and management sciences. The allocation of R and how can regional resilience and response capacities be built and enhanced. **Regional Development in the Knowledge Economy** Philip Cooke, Andrea Piccaluga, 2006-09-27

International contributors provide the first examination of the growing subject of regional knowledge economy development. Illustrated by data and stylized accounts, the international contributors chart the evolution of knowledge economies, questioning the way in which they work and criticize accepted theories and inform how places can cope in the knowledge economy. Based in concept on Cooke's *Knowledge Economies* (Routledge, 2002), *Regional Development in the Knowledge Economy* is a well grounded work exploring this increasingly important theme with relevance to innovation systems and related economic development literature. The Oxford Handbook of Innovation Jan Fagerberg, David C. Mowery, Richard R.

Nelson, 2006-01-19 This handbook provides academics and students with a comprehensive and holistic understanding of the phenomenon of innovation. Handbook on the Geographies of Innovation Richard Shearmur, Christophe

Carrincazeaux, David Doloreux, 2016-11-25 The geography of innovation is changing. Firstly, it is increasingly understood that innovative firms and organizations exhibit a wide variety of strategies, each differently attuned to diverse geographic contexts. Secondly, and concomitantly, the idea that cities, clusters and physical proximity are essential for innovation is evolving under the weight of new theorizing and empirical evidence. The aim of this handbook is to break with the many ideas and concepts that emerged during the course of the 1980s and 1990s and to fully take into account the new reality of the internet, mobile communication technologies, personal mobility and globalization. The handbook gathers a new generation of ideas and authors to contribute to the debate, providing an empirically grounded critical appraisal of the prevailing knowledge on the geography of innovation. The 28 original chapters, written by a diverse range of scholars with widely differing views, present fresh empirical evidence and new perspectives relating to how innovation plays out across space in an age where mobility has increased, information is ubiquitous and globalisation has been realised. Overall, the dialogue between existing theory and new possibilities provides a unique and challenging appraisal of the connection between innovation, agglomeration and space. Offering cutting edge ideas in an accessible format, this will be an ideal resource for students and scholars of economic

geography and innovation studies The empirical evidence and analysis will also be of great value for policymakers and government officials Contributors include B T Asheim H W Aslesen A Bain P A Balland N Bradford A Bramwell C Brennan Horley S Breschi C Carraincazeaux C Chaminade R Comunian C De Fuentes D Doloreux D Eckert A Faggian M Ferru R D Fitjar K Flanagan C Gibson M Grillitsch M Grossetti G Harirchi F Huber A Isaksen S Jewel J Karlsen N Komninos J L Klein N Lee F Lissoni M Maisonobe J Mattes P McCann C T Noumedem R Ortega Argil s M Plechero A Rallet A Rodriguez Pose R Shearmur H L Smith B Spigel J Tallec E Tranos D G Tremblay F T dtling M Trippel E Uyarra C Yang C Wilkie D A Wolfe

**Design Economies and the Changing World Economy** John Bryson, Grete Rusten, 2010-12-14 Design is central to every service or good produced sold and consumed Manufacturing and service companies located in high cost locations increasingly find it difficult to compete with producers located in countries such as India and China Companies in high cost locations either have to shift production abroad or create competitive advantage through design innovation brand and the geographic distribution of tasks rather than price Design Economies and the Changing World Economy provides the first comprehensive account of the relationship between innovation design corporate competitiveness and place Design economies are explored through an analysis of corporate strategies the relationship between product and designer copying and imitation including nefarious learning design and competitiveness and design centred regional policies The design process plays a critical role in corporate competitiveness as it functions at the intersection between production and consumption and the interface between consumer behaviour and the development and design of products This book focuses on firms individuals as well as national policy drawing attention to the development of corporate and nation based design strategies that are intended to enhance competitive advantage Increasingly products are designed in one location and made in another This separation of design from the place of production highlights the continued development of the international division of labour as tasks are distributed in different places but blended together to produce design intensive branded products This book provides a distinctive analysis of the ways in which companies located in developed market economies compete on the basis of design brand and the geographic distribution of tasks The text contains case studies of major manufacturing and service companies and will be of valuable interest to students and researchers interested in Geography Economics and Planning Local and Regional Development Andy Pike, Andrés Rodriguez-Pose, John Tomaney, Andres

Rodriguez-Pose, 2006-11-22 Local and regional development is an increasingly global issue For localities and regions the challenge of enhancing prosperity improving wellbeing and increasing living standards has become acute for localities and regions formerly considered discrete parts of the developed and developing worlds Amid concern over the definitions and sustainability of development a spectre has emerged of deepened unevenness and sharpened inequalities in the development prospects for particular social groups and territories Local and Regional Development engages and addresses the key questions what are the principles and values that shape definitions and strategies of local and regional development What

are the conceptual and theoretical frameworks capable of understanding and interpreting local and regional development What are the main policy interventions and instruments How do localities and regions attempt to effect development in practice What kinds of local and regional development should we be pursuing This book addresses the fundamental issues of what kind of local and regional development and for whom frameworks of understanding and instruments and policies It outlines what a holistic progressive and sustainable local and regional development might constitute before reflecting on its limits and political renewal With the growing international importance of local and regional development this book is an essential student purchase illustrated throughout with maps figures and case studies from Asia Europe and Central and North America

**Infectious Diseases: A Geographical Analysis** A. D. Cliff, M. R. Smallman-Raynor, P. Haggett, D. F. Stroup, S. B. Thacker, 2009-07-30 The last four decades of human history have seen the emergence of an unprecedented number of new infectious diseases the familiar roll call includes AIDS Ebola H5N1 influenza hantavirus hepatitis E Lassa fever legionnaires and Lyme diseases Marburg fever Rift Valley fever SARS and West Nile The outbreaks range in scale from global pandemics that have brought death and misery to millions through to self limiting outbreaks of mainly local impact Some outbreaks have erupted explosively but have already faded away some grumble along or continue to devastate as now persistent features in the medical lexicon in others a huge potential threat hangs uncertainly and worryingly in the air Some outbreaks are merely local others are worldwide This book looks at the epidemiological and geographical conditions which underpin disease emergence What are the processes which lead to emergence Why now in human history Where do such diseases emerge and how do they spread or fail to spread around the globe What is the armoury of surveillance and control measures that may curb the impact of such diseases But uniquely it sets these questions on the modern period of disease emergence in an historical context First it uses the historical record to set recent events against a much broader temporal canvas finding emergence to be a constant theme in disease history rather than one confined to recent decades It concludes that it is the quantitative pace of emergence rather than its intrinsic nature that separates the present period from earlier centuries Second it looks at the spatial and ecological setting of emergence using hundreds of specially drawn maps to chart the source areas of new diseases and the pathways of their spread The book is divided into three main sections Part 1 looks at early disease emergence Part 2 at the processes of disease emergence and Part 3 at the future for emergent diseases

**Decolonizing the Colonial City** Colin Clarke, 2006-08-31 In this sequel to Kingston Jamaica Urban Development and Social Change 1692 to 1962 1975 Colin Clarke investigates the role of class colour race and culture in the changing social stratification and spatial patterning of Kingston Jamaica since independence in 1962 He also assesses the strains created by the doubling of the population on labour and housing markets which are themselves important ingredients in urban social stratification Special attention is also given to colour class and race segregation to the formation of the Kingston ghetto to the role of politics in the creation of zones of violence and drug trading in downtown Kingston and to the contribution of the

arts to the evolution of national culture A special feature is the inclusion of multiple maps produced and compiled using GIS geographical information systems The book concludes with a comparison with the post colonial urban problems of South Africa and Brazil and an evaluation of the de colonization of Kingston

**Infectious Diseases** Andrew David Cliff, 2009 This book is a world geography of emerging diseases from antiquity to the present day The last four decades of human history have seen the emergence of an unprecedented number of new infectious diseases This book looks at the epidemiological and geographical conditions which underpin disease emergence

*The Social Dynamics of Innovation Networks* Roel Rutten, Paul Benneworth, Dessy Irawati, Frans Boekema, 2014-06-27 The social dynamics of innovation networks captures the important role of trust social capital institutions and norms and values in the creation of knowledge in innovation networks In doing so this book connects to a long standing debate on the socio spatial context of innovation in economic geography which is usually referred to as the Territorial Models of Innovation TIMs literature This present volume breaks with the TIM literature in several important ways In the first place this book emphasizes the role of individual agency because individuals and their networks are increasingly recognized as the principal agents of knowledge creation Secondly this volume looks at space as a continuous field of opportunity rather than as bounded territory with a set of endowments such as knowledge base and social capital Although individually these elements are not new to the TIM literature it has thus far failed to grasp their critical implication for studying the social dynamics of innovation networks The approach to the socio spatial context of innovation in this volume is summarized as Knowledge Economy 2.0 It emphasizes that human creativity is now the main source of economic value and that human creativity and knowledge creation is not an organized process within organizations but happens bottom up in formal and informal professional and social networks of individuals that cut across multiple organizations

**The Elgar Companion to Innovation and Knowledge Creation** Harald Bathelt, Patrick Cohendet, Sebastian Henn, Laurent Simon, 2017-11-24 This unique Companion provides a comprehensive overview and critical evaluation of existing conceptualizations and new developments in innovation research It draws on multiple perspectives of innovation knowledge and creativity from economics geography history management political science and sociology The Companion brings together leading scholars to reflect upon innovation as a concept Part I innovation and institutions Part II innovation and creativity Part III innovation networking and communities Part IV innovation in permanent spatial settings Part V innovation in temporary virtual and open settings Part VI innovation entrepreneurship and market making Part VII and the governance and management of innovation Part VIII

The Nature of the State Mark Whitehead, Rhys Jones, Martin Jones, 2007-01-11 The complex relationships between the state and nature remain under theorized and relatively unexplored Combining original research and theoretical insights The Nature of the State challenges the ways in which social scientists approach questions of socio environmental power and offers new insights into the history of state nature relations

**Handbook of Local and Regional Development** Andy Pike, Andres Rodriguez-Pose, John Tomaney, 2010-11-17 The

Handbook of Local and Regional Development provides a comprehensive statement and reference point for local and regional development. The scope of this Handbook's coverage and contributions engages with and reflects upon the politics and policy of how we think about and practise local and regional development, encouraging dialogue across the disciplinary barriers between notions of local and regional development in the Global North and development studies in the Global South. This Handbook is organized into seven inter-related sections with an introductory chapter setting out the rationale, aims and structure of the Handbook. Section one situates local and regional development in its global context. Section two establishes the key issues in understanding the principles and values that help us define what is meant by local and regional development. Section three critically reviews the current diversity and variety of conceptual and theoretical approaches to local and regional development. Section four addresses questions of government and governance. Section five connects critically with the array of contemporary approaches to local and regional development policy. Section six is an explicitly global review of perspectives on local and regional development from Africa, Asia, Pacific, Europe, Latin America and North America. Section seven provides reflection and discussion of the futures for local and regional development in an international and multidisciplinary context. With over forty contributions from leading international scholars in the field, this Handbook provides critical reviews and appraisals of the current state of the art, conceptual and theoretical approaches and future developments in local and regional development.
