Manufacturing Strategy The Research Agenda For The Next Decade:

Manufacturing Strategy John E. Ettlie, Michael Burstein, Avi Fiegenbaum, 2012-12-06 Total Quality Management and Just-in-Time Purchasing Hale Kaynak, 2013-06-17 This study investigates the relation of total quality management TQM and just in time purchasing JITP with respect to firms performance based on theories from operations management organization theory strategic management and marketing U S companies have implemented TQM and JITP techniques to improve their global competitive position The lack of empirical research on how these techniques effect firms performance makes it necessary to explain their strategic values as management innovations In this study a cross sectional mail survey was used with the target population of firms in the continental United States that have implemented either technique or both The results indicate that the extent of TQM and JITP implementation positively correlates with a firm s performance Furthermore the relation between JITP and financial and market performance is more significant in those industries that face high as opposed to low foreign competition In this study the validity of findings was assessed in four parts statistical conclusion internal construct and external validity Each validity type is defined and its threats are discussed Based on the findings a revised research model is offered The author also notes likely avenues of future research for theorists and practitioners

Factories of the Future Tullio Tollo, Giacomo Copani, Walter Terkaj, 2019-02-14 This book is open access under a CC BY 4.0 license This book presents results relevant in the manufacturing research field that are mainly aimed at closing the gap between the academic investigation and the industrial application in collaboration with manufacturing companies Several hardware and software prototypes represent the key outcome of the scientific contributions that can be grouped into five main areas representing different perspectives of the factory domain

- 1 Evolutionary and reconfigurable factories to cope with dynamic production contexts characterized by evolving demand and technologies products and processes
- 2 Factories for sustainable production asking for energy efficiency low environmental impact products and processes new production logics sustainable logistics
- 3 Factories for the People who need new kinds of interactions between production processes machines and human beings to offer a more comfortable and stimulating working environment
- 4 Factories for customized products that will be more and more tailored to the final user's needs and sold at cost effective prices
- 5 High performance factories to yield the due production while minimizing the inefficiencies caused by failures management problems maintenance

This book is primarily targeted to academic researchers and industrial practitioners in the manufacturing domain

Achieving Supply Chain Agility Yi Wu, 2018-12-30 This book identifies factors of information system IS integration that influence supply chain agility and illustrates how IS integration can achieve greater supply chain agility Also considering the consequent operational impacts that arise from IS enabled supply chain agility the author presents real life examples through interviews and surveys to explore how IS integrations affect supply chain agility in the context of the Chinese automotive industry The ability to swiftly respond to competitive challenges is a key element in industry 4.0 and organisations with agile supply chains are better prepared to respond to uncertainties and changes This book develops and presents guidelines on the deployment of information system integration in order to achieve efficient agile supply chains
