Manufacturing Technology Posinasetti Nageswara Rao, 2013      Advances in Manufacturing Technology II Peter F. McGoldrick, 2013-11-21 EN Corlett Joint Chairman COPED University of Nottingham Nottingham UK The contributions offered to this Third National Conference demonstrate that research in production is very much alive The considerable numbers of papers on robotics automation and flexible manufacturing systems together with those in production control and quality matters demonstrate that there is much work going on in our colleges polytechnics and universities related to modern methods of manufacture The future of manufacture undoubtedly hinges on better control Control over the supply and movement of materials is now keenly sought Control over manufacturing equipment is also a goal not just to maintain quality but to give flexibility in sequence and quantity None of these objectives for improved performance is entirely a technical matter although there is an increasing technical ability to influence all of them To achieve their potential they depend on competent people at all levels Discussion with alert managers soon reveals that this is one of their major concerns Either the people they have require more training or they cannot hire the people with the abilities they need This applies at all levels and the availability of people with competence in manufacture is particularly low      **Proceedings Of 17th All India**

growth The book concludes with a clear set of macroeconomic policies for the attainment of fast non inflationary growth in developing countries middle income nations transition economies and developed countries Despite its unorthodox position the book endorses free trade privatization liberalization fiscal rectitude low inflation central bank independence proper governance protection of the environment and better income distribution With this approach the book offers a fresh new look on the problem of growth and offers hope that economic science will finally provide governments with an effective policy tool for the elimination of poverty and unemployment
