power of Romantic discourse to reshape imaginative writing and a series of crucial reactions to the impact of Romanticism on cultural life down to the present both in Europe and in the New World Through its combination of chapters on thematic generic and discursive features Romantic Prose Fiction achieves a unique theoretical stance by considering the opinions of primary Romantics and their successors not as guiding truths by which to define the permanent meaning of Romanticism but as data of cultural history that shed important light on an evolving civilization SPECIAL OFFER 30% discount for a complete set order 5 vols The Romanticism series in the Comparative History of Literatures in European Languages is the result of a remarkable international collaboration The editorial team coordinated the efforts of over 100 experts from more than two dozen countries to produce five independently conceived yet interrelated volumes that show not only how Romanticism developed and spread in its principal European homelands and throughout the New World but also the ways in which the affected literatures in reaction to Romanticism have redefined themselves on into Modernism A glance at the index of each volume quickly reveals the extraordinary richness of the series total contents Romantic Irony sets the broader experimental parameters of comparison by concentrating on the myriad expressions of irony as one of the major impulses in the Romantic philosophical and artistic revolution and by combining cross cultural and interdisciplinary studies with special attention also to literatures in less widely diffused language streams Romantic Drama traces creative innovations that deeply altered the understanding of genre at large fed popular imagination through vehicles like the opera and laid the foundations for a modernist theater of the absurd Romantic Poetry demonstrates deep patterns and a sharing of crucial themes of the revolutionary age which underlie the lyrical expression that flourished in so many languages and environments Nonfictional Romantic Prose assists us in coping with the vast array of writings from the personal and intimate sphere to modes of public discourse including Romanticism s own self commentary in theoretical statements on the arts society life the sciences and more Nor are the discursive dimensions of imaginative literature neglected in the closing volume Romantic Prose Fiction where the basic Romantic themes and story types the romance novel novella short story and other narrative forms are considered throughout Europe and the New World This enormous realm is seen not just in terms of Romantic theorizing but in the light of the impact of Romantic ideas and narration on later generations As an aid to readers the introduction to Romantic Prose Fiction explains the relationships among the volumes in the series and carries a listing of their tables of contents in an appendix No other series exists comparable to these volumes which treat the entirety of Romanticism as a cultural happening across the whole breadth of the Old and New Worlds and thus render a complex picture of European spiritual strivings in the late eighteenth and the nineteenth centuries a heritage still very close to our age **Henri Lefebvre and the Theory of the Production of Space** Christian Schmid, 2022-11-29 Henri Lefebvre s was the major theorist of space and of the urban This is the definitive book on Lefebvre Shortlisted for the Deutscher Memorial Prize 2023 This book presents an encompassing detailed and thorough overview and reconstruction of Lefebvre s theory of space and of

The Military Orders Volume III Victor #N/A, 2017-07-05 In the last twenty years there has been an explosion of scholarly interest in the Military Orders With a history stretching from the early twelfth century to the present day they were among the richest and most powerful orders of the church in medieval Europe They founded their own states in Prussia and on the Mediterranean islands of Rhodes and Malta They are of concern to historians of the Church art and architecture government agriculture estate management banking medicine and warfare and of the expansion of Europe overseas The conferences on their history which have been organized in London every four years have attracted leading scholars from all over the world The present volume records the proceedings of the Third Conference in 2000 and is essential reading for those interested in the progress of research on these extraordinary institutions Of the thirty papers published in this collection two deal with the orders in general while eighteen concentrate on the Hospital of St John six on the Temple and three on the Teutonic Order together with another on the Order of the Sword Brothers which it absorbed The preponderance of works on the Hospitallers is perhaps a particular characteristic of this volume but the fact that most of the papers relate to provincial life rather than to the headquarters in the east Prussia or Malta accurately reflects modern concerns as do the

contributions on historiography the papacy cultural history and religious life Examples of new research interests are the paper on bioarchaeology and the two on liturgy

The Politics of Storytelling

Michael Jackson, 2002 Hannah Arendt argued that the political is best understood as a power relation between private and public realms and that storytelling is a vital bridge between these realms a site where individualised passions and shared views are contested and recombined In his new book Michael Jackson explores and expands Arendt's ideas through a cross cultural analysis of storytelling that includes Kuranko stories from Sierra Leone Aboriginal stories of the stolen generation stories recounted before the South African Truth and Reconciliation Commission and stories of refugees renegades and war veterans Focusing on the violent and volatile conditions under which stories are and are not told and exploring the various ways in which narrative reworkings of reality enable people to symbolically alter subject object relations Jackson shows how storytelling may restore to the intersubjective fields of self and other self and state self and cosmos the conditions of viable sociality The book concludes in a reflexive vein exploring the interface between public discourse and private experience

Democratization Laurence Whitehead, 2002 Democratization has swept the globe over the past generation and analysts and policy makers have been struggling to keep up Bookshelves have been filled with case studies and assessments of this kaleidoscope of experiences and a related scholarly community has developed seeking to systematize all this material in accordance with well defined schemas and causal models But experience keeps wrong footing the country analysts so in this fresh interpretation the author goes back to foundational issues He argues that democratization is best understood as a complex long term dynamic and open ended process extending over generations Standard models of causal explanation need to be supplemented by more interpretative approaches Basic questions of citizen security the nature of public accountability and the role of money as a source of political power need reconsideration The delicate balance between monetary authority and democratic consent is also examined in the light of the financial crises that have afflicted so many new democracies This book proposes a range of new perspectives on the complex linkages between democratization and state formation on the logic of paired comparisons and comparisons between large regions of the world and on the relationship between democratic ideals and really existing democratic outcomes It aims to equip those caught up in democratization and democracy promotion with a more realistic understanding of the tensions and turbulence involved

Estranging the Novel

Katarzyna Bartoszyńska, 2021-08-03 To develop a theory of world literature this book demands that the theory of the novel can no

longer ignore literary forms other than realism Winner of the Donald Murphy Prize for a Distinguished First Book by the American Conference on Irish Studies and the Wacław Lednicki Award in the Humanities by the Polish Institute of Arts and Sciences of America For centuries the standard account of the development of the novel focused on the rise of realism in English literature Studies of early novels connected the form to various aspects of British life across the eighteenth and nineteenth centuries including the burgeoning middle class the growth of individualism and the emergence of democracy and the nation state But as the push for teaching and learning global literature grows this narrative is insufficient for studying novel forms outside of a predominately English speaking British and American realm In *Estranging the Novel* Katarzyna Bartoszyńska explores how the emergence and growth of world literature studies has challenged the centrality of British fiction to theories of the novel's rise She argues that a historicist approach frequently reinforces the realist paradigm that has cast other traditions as minor conceding a normative vision of the novel as it seeks to explain why historical forces produced different forms elsewhere Recasting the standard narrative by looking at different novelistic literary forms including the Gothic travel writing and queer fiction Bartoszyńska offers a compelling comparative study of Polish and Irish works published across the long nineteenth century that emphasize fictionality or the problem of world building in literature Reading works by Ignacy Krasicki Jan Potocki Narcyza michowska and Witold Gombrowicz alongside others by Jonathan Swift Charles Maturin Oscar Wilde and Samuel Beckett Bartoszyńska shows that the history of the novel's rise demands a more capacious and rigorous approach to form as well as a reconceptualization of the relationship between fiction and its cultural contexts By modeling such a heterogeneous account of the novel form *Estranging the Novel* paves the way for a bracing and diverse understanding of the makeup of contemporary world literature and the many texts it encompasses and a new perspective on the British novel as well
