**The Many Worlds of Circus** Robert Sugarman, 2009-05-27 Acrobats and manipulators of objects trained animals and clowns have been performing throughout history In the eighteenth century the invention of the circus ring provided a focus for the activities and the modern circus was born Once the circus was the most spectacular entertainment many Americans saw When the supply of cheap labor disappeared and other forms of entertainment became available the giant circuses shrank and in the last quarter of the twentieth century new one ring circuses returned The Circus and Circus Culture area of the Popular Culture Association has been examining circus history circus life the relationship of circus to society and the impact of circus on the visual and literary arts since 1997 This book is a collection of papers from its annual conferences This fascinating collection showcases the transnational richness and cultural depth of the circus in an array of historical and contemporary settings Strongly recommended for circus enthusiasts and students of popular culture history and theater Janet M Davis Associate Professor Chair of the Department of American Studies College of Liberal Arts at UT Austin author of *The Circus Age Culture and Society under the American Big Top* **Benjamin Franklin** Christopher J. Murrey, 2002 Benjamin Franklin is generally considered one of America's most versatile and talented statesmen scientists and philosophers His achievements include publisher of *Poor Richard's Almanac* and many articles on political economic religious philosophical and scientific subjects He was the inventor of bifocals the Franklin stove lightening rod he was one of the signers of the Declaration of Independence and the founder of what is now the University of Pennsylvania This book presents a detailed and riveting review of Franklin's life based on excerpts from the renowned 1899 book on Franklin by Sydney George Fisher This overview is augmented by a substantial selective bibliography which features access through title subject and author indexes Characters of the Information and Communication Industry Richard F. Bellaver, 2011-05-06 I have taught a graduate course on the history of the information and communications industry for 20 years The course shows students how the world has moved from primitive communication to the integrated multi media situation we are in today Concentration is on the fields of journalism telecommunications broadcasting and computing Emphasis is placed on the leaders of the areas and the political and cultural surroundings that encouraged or discouraged growth of the industry It is true that technology is a driving force of this industry but it has been the individual people characters impelled by discovery acceptance and marketability of that technology who have taken the next step to improve communication The Journalism field started with Gutenberg and early added Ben Franklin later it got a little yellow with Hearst and Pulitzer I think Henry Luce started the business of media integration but Rupert Murdoch certainly keeps it going The first practical use of

electricity was found by Samuel Morse and his telegraph Bell invented the telephone or was it Meucci Theodore Vail invented the Bell System Broadcasting started with Marconi's invention or was it Tesla's David Sarnoff and William Paley made the medium practical and characters like Edwin R. Morrow, Walter Cronkite and even Oprah Winfrey gave it credibility. Certainly Charles Babbage and Ada Lovelace had something to do with the start of computers but later scientists Vannevar Bush and Jon von Neumann added the electronics. Then UNIVAC convinced Thomas Watson Junior that IBM better start making them jobs and Wozniak started the personal computer business but Bill Gates created the software to make them run. Tim Berners-Lee hooked those computers to a network and then Amazon, eBay and Google found a way to make money using the result. This book is the story of these people and companies.

*The Multiple Worlds of Pynchon's Mason & Dixon* Elizabeth Jane Wall Hinds, 2009. New essays examining the interface between 18th and 20th century culture both in Pynchon's novel and in the historical past. Thomas Pynchon's 1997 novel *Mason Dixon* went further using the same style, wit and erudition to re-create an 18th century when America was being formed as both place and idea. Pynchon's focus on the creation of the Mason-Dixon Line and the governmental and scientific entities responsible for it makes a clearer statement than any of his previous novels about the slavery and imperialism at the heart of the Enlightenment as he levels a dark and hilarious critique at this America. This volume of new essays studies the interface between 18th and 20th century culture both in Pynchon's novel and in the historical past. It offers fresh thinking about Pynchon's work as the contributors take up the linkages between the 18th and 20th centuries in studies that are as concerned with culture as with the literary text itself. Contributors: Mitchum Huehls, Brian Thill, Colin Clarke, Pedro Garcia Caro, Dennis Lensing, Justin M. Scott, Coe Ian, Copestake, Frank Palmeri. Elizabeth Jane Wall Hinds is Professor and Chair of the English Department at SUNY Brockport.

**Benjamin Franklin's Intellectual World** Paul E. Kerry, Matthew S. Holland, 2012-12-27. This volume attempts to throw fresh light on two areas of Benjamin Franklin's intellectual world: namely his self-fashioning and his political thought. It is an odd thing that for all of Franklin's voluminous writings, a fantastically well-documented correspondence over many years, scientific treatises that made his name amongst the brightest minds of Europe, newspaper articles, satires and of course his signature on the Declaration of Independence and the U.S. Constitution and yet scholars debate how to get at his political thought, indeed if he had any political philosophy at all. It could be argued that he is perhaps the American Founder most closely associated with the Enlightenment. Similarly for a man who left so much evidence about his life as a printer, bookseller, postmaster, inventor, diplomat, politician, scientist among other professions, one who wrote an autobiography that has become a piece of American national literature and indeed a contribution to world culture, the question of who Ben Franklin continues to engage scholars and those who read about his life. His identity seems so stable that we associate it with certain virtues that apply to the way we live, our lives, time management for example. The image of the stable figure of Franklin is applied to create a sense of trust in everything from financial institutions to plumbers. His constant drive to improve and fashion himself reveal however a man

whose identity was not static and fixed but was focused on growth on bettering his understanding of himself and the world he lived in and attempted to influence and improve

**A Short but Full Book on Darwin's Racism** Leon Zitzer, 2017-04-24 Darwin once pondered what it would be like to talk to an ape if he could take a dispassionate view of his own case The ape he said would have to admit he was inferior to humans Darwin was obsessed with ranking organisms It was no different with human beings It is not hard to prove that racism deeply infected the work of Charles Darwin Turn the pages of his writings his letters Journal Notebooks and published works and it's there There is hardly a source that does not contain it It seems like every time he picked up his pen he had something to say about the inferiority of certain races For him

evolution produced inequality But Darwin and evolution are not synonymous terms It is possible to criticize Darwin without criticizing the theory of evolution Some previous evolutionists as well as some of his contemporaries were more holistic and humanitarian than he was They looked for connections rather than disconnections and ranking They defied the ideology of conquest and domination of their day and paid a price We can continue to eliminate them from our memories or we can retrieve their voices and let them inspire      *Wisconsin Library Bulletin* ,1963      *Consciousness in the Physical World* Torin Andrew Alter,Yujin Nagasawa,2015 According to Russellian monism an alternative to the familiar theories in the philosophy of mind that combines attractive components of physicalism and dualism matter has intrinsic properties that both constitute consciousness and serve as categorical bases for the dispositional properties described in physics Consciousness in the Physical World collects various works on Russellian monism including historical selections recent classics and new pieces Most chapters are sympathetic with the view but some are skeptical Together they constitute the first book length treatment of the view itself its relationship to other theories its motivations and its problems      *Time and the Multiverse* Gerald Holdsworth PhD,2017-12-13 Is there a mechanism through which some people can see the future How can a life in this universe be predetermined Where might information about the future exist If we are to have faith in our grasp of physics and cosmological principles it must exist outside this universe How can we structure a multiverse so that it broadly accommodates precognition In *Time and the Multiverse* author Dr Gerald Holdsworth addresses these questions and more and discusses phenomena that cannot be explained by the principles of established physics Holdsworth accepted the challenge of explaining the basis behind the common experience of precognition the easiest phenomena to verify but the hardest to explain He tells how he built a looped version of the serial time zoned multiverse which exhibits time zoning within the regular clock time system as well as revealing what can be termed a timing system which coordinates the processes within the multiverses Cosmic quantum computer This second time is in practice represented by a fixed frequency of time pips occurring within the computer Author notes What I present in chapter 2 of this book concerning the dynamics of the multiverse cannot be described by mathematical equations because the physics isnt available I have relied entirely on logical statements and geometry to produce the Cosmic Blueprint and from a special case of it the Cosmological model Arthur Eddington and Wolfgang Pauli knew that to achieve a complete understanding of our existence one has to include all the unexplained anomalies like precognition along with established physics quantum mechanics particle physics and Einsteins gravity theory Eddington and John W Dunne realized that time would play a major role in tying together all the evidence Dunnes attempts ending in 1955 were invalid due to his deliberate exclusion of the existence of multiple universes He did at least finally confess his spiritual experiences
