The European Heritage Gerard Delanty, 2017-07-06 Gerard Delanty offers a critical interpretation of the European heritage today in light of recent developments in the human and social sciences and in view of a mood of crisis in Europe that compels us to re think the European past One of the main insights informing this book is that a transnational and global perspective on European history can reorient the European heritage in a direction that offers a more viable way for contemporary Europe to articulate an intercultural identity in keeping with the emerging shape of Europe and with its own often acknowledged past He argues that the European heritage is based less on a universalistic conception of culture than on a plurality of interconnecting narratives Such a perspective opens up new directions for scholarship and public debate on heritage that are guided by critical cosmopolitan considerations that highlight contention resistances competition and dissonance He argues that the specificity of the European dimension of culture is in the entanglement of many cultures rather than in an original culture The cultures of Europe are not separated but have been shaped in close interaction with each other and with the non European world Nations are not therefore unique exceptional or fundamentally different from each other The outcome of such intermingling is a multiplicity of ideas of Europe that serve as shared cultural reference points

The cultural & heritage guide for Uganda ,2025-09-24 **Cultural Heritage in Japan and Italy** Nobuko Kawashima, Guido Ferilli, 2024-04-08

This edited book represents one of the first scholarly research through an international collaboration project between Japan and Italy to address economic and social values of cultural heritage beyond its inherent historic archaeological or aesthetic values Cultural policies in the world have over the decades expanded to include non cultural purposes such as economic development and social inclusion Japanese cultural policy for heritage is catching up on this trend we have seen major shifts of emphasis from preservation for its sake to the utilisation of cultural heritage for the

purposes of tourism place branding local vitalization and community building whilst Italy has long thrived on the economy of heritage tourism and more cases are being seen for urban and regional development with the use of cultural assets The recent outbreak of Covid 19 and the problem of over tourism that preceded it have challenged tourism policy and practice in the two countries This book identifies emerging trends issues and problems in such policy shifts The book breaks a new ground in the burgeoning studies of tourism heritage and cultural policy by adopting an international inter disciplinary approach The chapters on Japan in particular make an original contribution to these fields in the English literature in which discussion of Japan despite its economic and cultural presence on the globe has hitherto been less available

Cultural Heritage and Tourism in the Developing World
Dallen J. Timothy, Gyan P. Nyaupane, 2009-05-18

Cultural Heritage and Tourism in the Developing World is the first book of its kind to synthesize global and regional issues challenges and practices related to cultural heritage and tourism specifically in less developed nations The importance of preservation and management of cultural heritage has been realized as an increasing number of tourists are visiting heritage attractions Although many of the issues and challenges developing countries face in terms of heritage management are quite different from those in the developed world there is a lack of consolidated research on this important subject This seminal book tackles the issues through theoretical discourse ideas and problems that underlay heritage tourism in terms of conservation management economics and underdevelopment politics and power resource utilization colonialism and various other antecedent notions that have shaped the development of heritage tourism in the less developed regions of the world The book is comprised of two sections The first section highlights the broader conceptual underpinnings debates and paradigms in the realm of heritage tourism in developing regions The chapters of this section examine heritage resources and the tourism product protecting heritage relics places and traditions politics of heritage and the impacts of heritage tourism The second section examines heritage tourism issues in specific regions including the Pacific Islands South Asia the Caribbean China and Northeast Asia South East Asia Sub Saharan Africa Central and Eastern Europe the Middle East and North Africa and Latin America Each region has unique histories cultures political traditions heritages issues and problems and the way these issues are tackled vary from place to place This volume develops frameworks that are useful tools for heritage managers planners and policy makers researchers and students in understanding the complexity of cultural heritage and tourism in the developing world Unlike many other books written about developing regions this book provides insiders perspectives as most of the empirical chapters are authored by the individuals who live or have lived in the various regions and have a greater understanding of the region s culture history and

operational frameworks in the realm of cultural heritage The richness of this indigenous or expert knowledge comes through as each regional overview elucidates the primary challenges and opportunities facing heritage and tourism managers in the less affluent areas of the world *International Encyclopedia of Human Geography*, 2019-11-29 International Encyclopedia of Human Geography Second Edition Fourteen Volume Set embraces diversity by design and captures the ways in which humans share places and view differences based on gender race nationality location and other factors in other words the things that make people and places different Questions of for example politics economics race relations and migration are introduced and discussed through a geographical lens This updated edition will assist readers in their research by providing factual information historical perspectives theoretical approaches reviews of literature and provocative topical discussions that will stimulate creative thinking Presents the most up to date and comprehensive coverage on the topic of human geography Contains extensive scope and depth of coverage Emphasizes how geographers interact with understand and contribute to problem solving in the contemporary world Places an emphasis on how geography is relevant in a social and interdisciplinary context **Heritage and Tourism** Russell Staiff, Robyn Bushell, Steve Watson, 2013-06-26 The complex relationship between heritage places and people in the broadest sense can be considered dialogic a communicative act that has implications for both sides of the conversation This is the starting point for Heritage and Tourism However the dialogue between visitors and heritage sites is complex Visitors have for many decades become synonymous with tourists and the tourism industry and so the dialogic relationship between heritage place and tourists has produced a powerful critique of this often contested relationship Further at the heart of the dialogic relationship between heritage places and people is the individual experience of heritage where generalities give way to particularities of geography place and culture where anxieties about the past and the future mark heritage places as sites of contestation sites of silences sites rendered political and ideological sites powerfully intertwined with representation sites of the imaginary and the imagined Under the aegis of the term dialogues the heritage tourism interaction is reconsidered in ways that encourage reflection about the various communicative acts between heritage places and their visitors and the ways these are currently theorized so as to either step beyond where possible the ontological distinctions between heritage places and tourists or to re imagine the dialogue or both Heritage and Tourism is thus an important contribution to understanding the complex relationship between heritage and tourism The French-Canadian Heritage in New England Gerard J. Brault, 1986 In this book Gerard J Brault offers an introduction to Franco American culture covering the group s history ideology language and literature architecture art folklore and music demography education politics religion and sociology Back cover of book **The cultural & heritage guide for Saint Kitts and Nevis**, 2025-09-24 The cultural & heritage guide for Saint Lucia, 2025-09-24 **Molecular Biology and Cultural Heritage** C.
