## **Many Faces Of Realism:**

The Many Faces of Realism Hilary Putnam, 1987 The first two lectures place the alternative I defend a kind of pragmatic realism in a historical and metaphysical context Part of that context is provided by Husserl's remark that the history of modern philosophy begins with Galileo that is modern philosophy has been hypnotized by the idea that scientific facts are all the facts there are Another part is provided by the analysis of a very simple example of what I call contextual relativity The position I defend holds that truth depends on conceptual scheme and it is nonetheless real truth In my third lecture I turn to the Kantian antecedents of this view explaining what I think should be retained of the Kantian idea of autonomy as the central theme of morality and extracting from Kant's work a moral image of the world that connects the ideals of equality and intellectual liberty In this lecture I defend the idea that moral images are an indispensable part of our moral and cultural heritage In the final lecture I defend the idea of moral objectivity I compare our epistemological positions in ethics history analysis of human character and science and I argue that in no area can we hope for a foundation which is more ultimate than the beliefs that actually at a given time function as foundational in the area the beliefs concerning which one has to say this is where my spade is turned In ethics such beliefs are represented in moral images of the world

The Many Faces of Relativism Maria Baghramian, 2015-10-14 This book is a study of relativism as a dominant intellectual preoccupation of our time Relativism asks how we are to find a way out of intractable differences of perspectives and disagreements in various domains Standards of truth rationality and ethical right and wrong vary greatly and there are no universal criteria for adjudicating between them In considering this problem relativism suggests that what is true or right can only be determined within variable contexts of assessment This book brings together articles published in the International Journal of Philosophical Studies over a period of 17 years as well as in a Special Issue of the journal published in 2004 The chapters in Section I discuss some of the main forms of relativism Section II sheds light on the different motivations for relativism assessing their strengths and weaknesses Section III provides a detailed examination of the vexed question of whether Ludwig Wittgenstein in his later work supported relativism The varied responses to this important question shed light on the issues discussed in Sections I and II This collection is a lively and engaging resource for scholars interested in the crucial impact relativism has had on the way we think about the meaning of truth and what is right and wrong The chapters in this book were originally published in the International Journal of Philosophical Studies

Realism and Anti-Realism in the Philosophy of Science Robert S. Cohen, R. Hilpinen, Ren-Zong Qiu, 2013-03-09 Beijing International Conference 1992

**Max Weber and the Problems of Value-free Social Science** Jay A. Ciaffa, 1998 This book examines the Werturteilsstreit value judgment dispute from its initial stages in the debates between the eminent German social historian Max Weber and his contemporaries to more recent contributions from scholars such as Karl Popper Talcott Parsons and Jürgen Habermas

**Uncertainty in Economics** Julia Köhn, 2017-07-04 In this book the author develops a new approach to uncertainty in

economics which calls for a fundamental change in the methodology of economics It provides a comprehensive overview and critical appraisal of the economic theory of uncertainty and shows that uncertainty was originally conceptualized both as an epistemic and an ontological problem As a result of the economic professions attempt to become acknowledged as a science the more problematic aspect of ontological uncertainty has been neglected and the subjective probability approach to uncertainty became dominant in economic theory A careful analysis of ontological theories of uncertainty explains the blindness of modern economics to economic phenomena such as instability slumps or excessive booms Based on these findings the author develops a new approach that legitimizes a New Uncertainty Paradigm in economics Power, Value, and Conviction William Schweiker, 2019-05-31 Schweiker's reflections are strikingly original and they ought to be required reading for everyone in the field of theological ethics Douglas F Ottati Professor of Theology and Ethics Union Theological Seminary and Presbyterian School of Christian Education With this new work Schweiker continues his vital exploration of hermeneutical realism responsibility ethics moral formation and the lives we live in our complex late modern cultures This is a bracing complex text that richly rewards those who engage it with the care it requires Jean Bethke Elshtain Laura Rockefeller Professor of Social and Political Ethics University of Chicago and author of *Augustine and the Limits of Politics* Schweiker has a comprehensive knowledge of contemporary moral thought philosophical and theological applied and theoretical He brings a wealth of material together with a unifying theological perspective that sharpens our questions and renews our hope This is an outstanding achievement Robin W Lovin Dean and Professor of Ethics Perkins School of Theology Southern Methodist University William Schweiker is the Edward L Ryerson Distinguished Service Professor of Theological Ethics at the University of Chicago Born in Des Moines Iowa 1953 he holds degrees from Simpson College Duke University and also the University of Chicago Besides teaching at Chicago he has also been guest professor at Uppsala University and the University of Heidelberg Schweiker's writings engage theological and ethical questions attentive to global dynamics comparative religious ethics the history of ethics and hermeneutical philosophy Schweiker has published five books numerous articles and award winning essays as well as edited and contributed to six volumes including *A Companion to Religious Ethics* 2004 a comprehensive and innovative work in the field of comparative religious ethics He is currently working on a volume *Religious Ethics Meaning and Method* Ongoing research is for a book on theological ethics and the integrity of life **Words and Life** Hilary Putnam, 1994 Putnam offers a sweeping account of the sources of several central problems of philosophy A unifying theme of the volume is that reductionism scientism and old style disenchanting naturalism tend to be obstacles to philosophical progress *Reinventing Pragmatism* Joseph Margolis, 2018-09-05 In contemporary philosophical debates in the United States redefining pragmatism has become the conventional way to flag significant philosophical contests and to launch large conceptual and programmatic changes This book analyzes the contributions of such developments in light of the classic formulations of Charles S Peirce and John Dewey and the interaction between

pragmatism and analytic philosophy American pragmatism was revived quite unexpectedly in the 1970s by Richard Rorty's philosophical heterodoxy and his running dispute with Hilary Putnam who like Rorty is a professed Deweyan Reinventing Pragmatism examines the force of the new pragmatisms from the emergence of Rorty's and Putnam's basic disagreements of the 1970s until the turn of the century Joseph Margolis considers the revival of a movement generally thought to have ended by the 1950s as both a surprise and a turn of great importance The quarrel between Rorty and Putnam obliged American philosophers and eventually Eurocentric philosophy as a whole to reconsider the direction of American and European philosophy for instance in terms of competing accounts of realism and naturalism      **Feyerabend's Philosophy** Eric Oberheim, 2012-02-13 Paul Feyerabend ranks among the most exciting and influential philosophers of science of the twentieth century This reconstruction of his developing ideas combines historical and systematic considerations Part I examines the three main influences on Feyerabend's philosophical development Wittgenstein's later philosophy Popper critical rationalism and Ehrenhaft's experimental effects Part II focuses on Feyerabend's development and use of the notion of incommensurability at the heart of his philosophical critiques and investigates his relation to realism Feyerabend initially developed the notion of incommensurability from ideas he found in Duhem He used the notion of incommensurability to attack many different forms of conceptual conservatism in philosophy and the natural sciences He argued against many views on the grounds that they would constrain the freedom necessary to develop alternative points of view and thereby hinder scientific advance Contrary to widespread opinion he was never a scientific realist Part III reconstructs Feyerabend's pluralistic conception of knowledge in the context of his pluralistic philosophical method Feyerabend was a philosophical pluralist who practiced pluralism in pursuit of progress      *Space, Time and Culture* David Carr, Chan-Fai Cheung, 2012-11-03 Interculturality has been one of key concepts in phenomenological literature It seeks to clarify the philosophical basis for intercultural exchange within the horizon of our life world The essays in this volume focus on the themes around space time and culture from the perspectives of Chinese and Western phenomenologists Though the discussions begin with classical phenomenological texts in Husserl Heidegger or Merleau Ponty they extend to the problems of Daoism and Buddhism as well as to sociology and analytic philosophy The collection of this volume is a fruitful result of inter cultural exchange of phenomenology      *The Ethics of Postmodernity* Gary B. Madison, Marty Fairbairn, 1999 Recently the question of ethics has become a dominant issue for philosophical reflection In THE ETHICS OF POSTMODERNITY Gary Madison and Marty Fairbairn have collected instructive and illuminating essays that address the dilemmas left in the wake of the postmodern attack on foundationalism This collection is a powerful statement about the many directions a post metaphysical ethics might take      *Ethics without Ontology* Hilary Putnam, 2005-11-30 Can ethical judgments properly be considered objective Reviewing what he deems the disastrous consequences of ontology's influence on analytic philosophy in particular the contortions it imposes upon debates about the objective of ethical judgments Putnam proposes abandoning the

very idea of ontology      **Pragmatism and Political Theory** Matthew Festenstein, 1997-12-22 Pragmatism has enjoyed a considerable revival in the latter part of the twentieth century but what precisely constitutes pragmatism remains a matter of dispute In reconstructing the pragmatic tradition in political philosophy Matthew Festenstein rejects the idea that it is a single cohesive doctrine His incisive analysis brings out the commonalities and shared concerns among contemporary pragmatists while making clear their differences in how they would resolve those concerns His study begins with the work of John Dewey and the moral and psychological conceptions that shaped his philosophy Here Festenstein lays out the major philosophic issues with which first Dewey and then his heirs would grapple The book's second part traces how Dewey's approach has been differently developed especially in the work of three contemporary pragmatic thinkers Richard Rorty Jurgen Habermas and Hilary Putnam This first full length critical study of the relationship between the pragmatist tradition and political philosophy fills a significant gap in contemporary thought      **Contemporary Debates in Metaphysics**

Theodore Sider, John Hawthorne, Dean W. Zimmerman, 2013-05-20 In a series of thought provoking and original essays eighteen leading philosophers engage in head to head debates of nine of the most cutting edge topics in contemporary metaphysics Explores the fundamental questions in contemporary metaphysics in a series of eighteen original essays 16 of which are newly commissioned for this volume Features an introductory essay by the editors on the nature of metaphysics to prepare the reader for ongoing discussions Offers readers the unique opportunity to observe leading philosophers engage in head to head debate on cutting edge metaphysical topics Provides valuable insights into the flourishing field of contemporary metaphysics      **Ernest Sosa** John Greco, 2008-04-15 This is the first book devoted to the work of Ernest Sosa one of the most influential contemporary epistemologists Part of the acclaimed *Philosophers and Their Critics* series The editor's introduction serves as an introduction to Sosa's epistemology Contains critical essays by more than twenty of the most prominent epistemologists in the world commenting on Sosa's work Concludes with Sosa's own reply to his critics

**Ontology After Carnap** Stephan Blatti, Sandra Lapointe, 2016 Rudolf Carnap's deflationary approach to ontology is once again attracting considerable interest and support Eleven original essays by leading voices in metametaphysics deepen our understanding of Carnap's contributions to metaontology and explore how his legacy can be mined for insights into the contemporary debate      **The Politics of Human Rights** The Belgrade Circle, Obrad Savic, 2002-10-17 Original essays on the political and philosophical underpinnings of the idea of human rights by a group of highly distinguished theorists

**Handbook of Epistemology** I. Niiniluoto, Matti Sintonen, Jan Wolenski, 2004-03-31 Epistemology or theory of knowledge has always been one of the most important if not the most important field of philosophy New arguments are constantly brought to bear on old views new variants are marshalled to revive ancient stands new concepts and distinctions increase the sophistication of epistemological theories There are a great many excellent textbooks monographs as well as anthologies consisting of articles in epistemology Similarly there are useful philosophical dictionaries which contain a great number of

relatively short entries and general philosophical handbooks which also touch epistemological issues This volume of 27 essays grew out from the interest to see a handbook which is devoted entirely to the historical roots and systematic development of theory of knowledge It is not intended to compete but to supplement the already existing literature It aims at giving both beginners and more advanced students as well as professionals in epistemology and other areas of philosophy an overview of the central problems and solutions of epistemology The essays are self contained and still often rather extensive discussions of the chosen aspects of knowledge The contributions presuppose very little familiarity with previous literature and only a few of them require the mastery of even elementary logical notation This we hope makes the volume also accessible to the philosophically interested wider audience The contributors were asked to provide substantial up to date self contained and balanced surveys of the various subareas and more specific topics of epistemology with reference to literature

*Reading Putnam* Maria Baghramian, 2013 Hilary Putnam is one of the world's leading philosophers His highly original and often provocative ideas have set the agenda for a variety of debates in philosophy of science philosophy of mind and philosophy of language His now famous philosophical thought experiments such as the Twin earth and the brains in the vat have become part of the established canon in philosophy and cognitive science *Reading Putnam* is an outstanding overview and assessment of Hilary Putnam's work by a team of international contributors and includes replies by Putnam himself Divided into clear sections it contains chapters on key aspects of Putnam's large body of writing including Scientific realism and the changes that Putnam's thought has undergone on this topic analyticity and ontology including the important interconnections between the views of Putnam and Quine Putnam's arguments concerning externalist views of meaning and reference questions of conceptual relativity and his preoccupation with ethics through a denial of the fact value dichotomy Putnam's developing views on perception Offering an excellent survey of Putnam's work *Reading Putnam* is essential for those studying philosophy of mind philosophy of language and philosophy of science as well as for anyone interested in contemporary philosophy

Reality, Representation, and Projection John Haldane, Crispin Wright, 1993 *Reality Representation and Projection* is an important collection of new essays on a range of topics relating to realism and its rivals in metaphysics logic metaethics and epistemology The contributors are some of the leading authors in these fields including the late Ian McFetridge Mark Johnston John Skorupski Christopher Peacocke Michael Williams Edward Craig Michael Smith John Campbell Peter Railton David Wiggins Bob Hale Simon Blackburn John Haldane and Crispin Wright Several of the essays constitute definitive statements of their views In some cases authors write in response to the essays of other contributors while in other cases they proceed independently Although not primarily historical this collection includes discussions of philosophers from the Middle Ages to the present day from Aquinas to Wittgenstein No one seriously interested in questions about realism whether as a general philosophical outlook or as a particular position within specific debates can afford to be without this collection
