Mao Tse Tung An Ideological And Psychological Portrait:

Mao Tse-tung Fedor Burlat's kii, 1980 The Labors of Sisyphus Joan Roland, 2017-07-05 Almost a half century has passed since the inception of the People's Republic of China. In that time a charismatic leader has ruled and died leaving a wake of Destruction in his quest to transform China. In that time too the PRC's most powerful ally and mentor the Soviet Union has dismantled and announced that communism had failed. Today China fluctuates between tradition and modernity ideology and pragmatism between an antiquated collectivist ethic and a new spirit of individualism. It is a country precariously suspended between past and future. Maria Hsia Chang's *The Labors of Sisyphus* is a long overdue reassessment of the meaning and purpose of the Chinese communist revolution. In it she discusses the thought of Mao Zedong and Deng Xiaoping reform and its dilemmas regionalism in greater China and autonomous areas and nationalism. She also examines China's immediate present and uncertain future. If it manages to transform economic growth into development China filled with natural resources and a large capable labor force has the potential to become a world superpower. It could also collapse under the weight of its own problems regionalism a flawed state sector corruption and a pronounced decline in state capacity. If China succeeds an imposing new economic power will enter the global stage one that is often arbitrary and prone to despotism and xenophobia unless it is tempered by political reform. Prior accounts of communist China have failed to capture China's evolving present. In all its complexity and variety misrepresenting Maoist China. In the process Information shortfall was partly to blame as recently as August 1994 the Chinese government itself decried falsification of statistics by government officials and cadres. Sinologists in the 1960s and 1970s had to approach analysis of contemporary China with clear recognition of the limitations involved and the questionable validity of the factual sources available. Maria Hsia Chang lends structure meaning and purpose to the very complex recent political and historical past of communist China. With greater access to more accurate information Chang is able to analyze objectively without political motive or intention providing readers with a fresh look at the People's Republic. Her pathbreaking work will be of interest to scholars of international economics and politics sinologists and historians. *A Mirror for Socialism* Gilbert Rozman, 2014-07-14 Gilbert Rozman examines the Soviet debate on Chinese socialism revealing striking similarities between what Soviet scholars write about China and what they criticize as anticommunist in Western writing on the Soviet Union. Marxism, China, and Development A. James Gregor, 2017-07-05 China has always been something of a mystery to Westerners. For one generation Mao Zedong and his followers were simple agrarian

reformers while for another they were the communist emperor and his blue ants In the 1970s some of the finest Sinologists believed there was much the United States could learn from Mao's Great Proletarian Cultural Revolution with regard to bureaucracy criminal justice health care and mass education By the 1980s those same theorists asserted that Maoism was nothing more than a feudal fascism and had absolutely nothing positive to teach Marxism China and Development provides a plausible explanation of these developments that have had such a powerful effect on the people of China for the past half century The author describes and explains the strange collection of beliefs that made up the Marxism of Mao Zedong He seeks to understand why the communist leadership of China like that of the USSR tried to spur economic growth by abandoning the market modalities common to developed economies A James Gregor's conceptual framework is both original and makes more comprehensible the history of Marxism and the history of China Among the major topics he covers are imperialism political democracy economics and alternatives to Maoism and Marxism for China While it is unlikely that our understanding of so complex a series of events as modern Chinese history will soon become less controversial Marxism China and Development's clear concise explanations will clarify some perplexing areas and make the new turns in Chinese political economy more understandable This is a monumental effort at theory construction that will be of interest to political scientists economists sociologists and Sinologists

The Labors of Sisyphus Maria Hsia Chang, 1999-10-01 Maria Hsia Chang's *The Labors of Sisyphus* is a reassessment of the meaning and purpose of the Chinese communist revolution In it she discusses the thought of Mao Zedong and Deng Xiaoping reform and its dilemmas regionalism in greater China and autonomous areas and nationalism She also examines China's immediate present and uncertain future If it manages to transform economic growth into development China filled with natural resources and a large capable labor force has the potential to become a world superpower It could also collapse under the weight of its own problems regionalism a flawed state sector corruption and a pronounced decline in state capacity If China succeeds an imposing new economic power will enter the global stage one that is often arbitrary and prone to despotism and xenophobia unless it is tempered by political reform

Marxism and the Making of China J. Gregor, 2014-02-19 An assessment of the influence of the Marxism of Karl Marx and Friedrich Engels on revolutionary developments in China The work covers the period from the first appearance of the Chinese Communist Party under Mao Zedong until its full transformation by Deng Xiaoping into a nationalist developmental single party developmental dictatorship

[A Place In The Sun](#) A. James Gregor, 2019-04-16 China has endured a century of turmoil beginning with the anti dynastic revolution associated with Sun Yat Sen through the military and tutelary rule of Chiang Kai shek the

revolutionary regime of Mao Zedong and the radical reforms of Deng Xiaoping China has had little respite. Historians and social scientists have attempted to understand some of this history as being the consequence of the impact of European ideologies including Marxism, Leninism and Fascism. Rarely instructive or persuasive, the discussions regarding this issue have more often than not led to puzzlement rather than enlightenment. In *A Place in the Sun*, James Gregor offers an interpretation of the role of European Marxist and Fascist ideas on China's revolutionaries that is both original and based on a lifetime of scholarship devoted to revolutionary ideologies. Gregor renders a detailed analysis of their respective influence on major protagonists. In the exposition, Gregor reveals an unsuspected and complex set of relationships between the Chinese revolution and essentially European ideologies. His discussion concludes with a number of estimations that suggest implications for the future of modern China and its relationship with the advanced industrial democracies. How post-Dengist China, the world's most populous nation, is to be understood remains uncertain to most comparativists and historians. Gregor provides one well-supported alternative and he is carefully attentive to the implications of this alternative.

The Origins of the Cultural Revolution Roderick MacFarquhar, 1999-11. This is the final volume in a trilogy that examines the politics, personalities, economics, culture and international relations of China from the mid 1950s to the mid 1960s. It seeks to answer the central question: Why did Chairman Mao Zedong launch the Cultural Revolution, 1966-76, which plunged China into chaos and almost destroyed its Communist Party? The Coming of the Cataclysm starts with the great famine of the early 1960s, which resulted in tens of millions of deaths and set in train a series of emergency measures that increasingly divided Mao from his comrades in arms. His anger that they were prepared to adopt capitalist methods to rescue the country was sharpened by his belief that Moscow had actually gone capitalist and sold out to the imperialist West. From 1961 to 1966, the period covered by this volume, the increasingly urgent question for Mao was how to prevent a similar revolutionary degeneration in China. The Cultural Revolution was his answer. Drawing upon new evidence from Party documents, personal interviews, books and journals, MacFarquhar details the growing rift between Mao and his colleagues as they attempted to cope with domestic privation and an increasingly hostile international environment until the Chairman finally decided to smash the unity of the Yan'an Round Table by unleashing society against the party state.

Shadow Cold War Jeremy Friedman, 2015-10-15. The conflict between the United States and the Soviet Union during the Cold War has long been understood in a global context, but Jeremy Friedman's *Shadow Cold War* delves deeper into the era to examine the competition between the Soviet Union and the People's Republic of China for the leadership of the world revolution. When a world of newly independent states emerged from decolonization, desperately poor and politically disorganized, Moscow and Beijing turned their focus to attracting these new entities, setting the stage for Sino-Soviet competition. Based on archival research from ten countries, including new materials from Russia and China, many no longer accessible to researchers, this book examines how China sought to mobilize Asia, Africa and Latin America to seize the revolutionary mantle from the Soviet
