Mao Great Lives Observed:

Great Lives Observed: Garibaldi, 1969 **Mao: Great Lives Observed**, 1969 *The Labors of Sisyphus* Joan Roland, 2017-07-05 Almost a half century has passed since the inception of the People's Republic of China. In that time a charismatic leader has ruled and died leaving a wake of Destruction in his quest to transform China. In that time too the PRC's most powerful ally and mentor the Soviet Union has dismantled and announced that communism had failed. Today China fluctuates between tradition and modernity, ideology and pragmatism between an antiquated collectivist ethic and a new spirit of individualism. It is a country precariously suspended between past and future. Maria Hsia Chang's *The Labors of Sisyphus* is a long overdue reassessment of the meaning and purpose of the Chinese communist revolution. In it she discusses the thought of Mao Zedong and Deng Xiaoping reform and its dilemmas, regionalism in greater China and autonomous areas and nationalism. She also examines China's immediate present and uncertain future. If it manages to transform economic growth into development, China, filled with natural resources and a large capable labor force, has the potential to become a world superpower. It could also collapse under the weight of its own problems: regionalism, a flawed state sector, corruption, and a pronounced decline in state capacity. If China succeeds, an imposing new economic power will enter the global stage, one that is often arbitrary and prone to despotism and xenophobia unless it is tempered by political reform. Prior accounts of communist China have failed to capture China's evolving present. In all its complexity and variety, misrepresenting Maoist China. In the process, information shortfall was partly to blame. As recently as August 1994, the Chinese government itself decried falsification of statistics by government officials and cadres. Sinologists in the 1960s and 1970s had to approach analysis of contemporary China with clear recognition of the limitations involved and the questionable validity of the factual sources available. Maria Hsia Chang lends structure, meaning, and purpose to the very complex recent political and historical past of communist China. With greater access to more accurate information, Chang is able to analyze objectively without political motive or intention, providing readers with a fresh look at the People's Republic. Her pathbreaking work will be of interest to scholars of international economics and politics, sinologists, and historians. *Mao's Way* Edward E. Rice, 2023-11-10 This major biography of Mao draws on never before seen documents to reveal surprising details about Mao's rise to power and leadership in China. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high quality peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1972. ***Mao Tse-tung and the Chinese People*** Roger Howard, 2018-09-18 This book, first published in 1977, attempts to show Mao Tse-tung in his relationship with the Chinese people. The author makes extensive use of a number of interviews with a cross section of Chinese people as well as examining the written records made by foreign visitors. *Mao Tse-Tung's Theory of Dialectic* F.Y.K. Soo, 2012-12-06 The

year 1979 ushered in a new phase in China's long and continuous revolution. Currently this new phase is being symbolically referred to by the Chinese leaders themselves as the New Long March, a continuation of the legendary and historical Long March in terms of modernization which comprises the Four Modernizations: Agriculture, Industry, Science and Technology, and Military Defense. Such an all-encompassing attempt at modernization may appear to some at least to be something new or may indicate a radical shift in her policy. But upon closer examination this decision seems only to reflect an historical continuity in terms of the two major long-term goals of the Chinese Revolution: national independence and modernization or industrialization. The former would make China strong; the latter wealthy. For ever since the Opium War in 1840 and throughout the Revolutions of 1911 and 1949, China has always pursued these two revolutionary goals, though with different emphases at different times. This has been especially true during the past three decades as this twofold goal has dictated all of China's important policies, both domestic and foreign. In other words, while the concrete policies may have appeared to be lacking in unity at times, they have been formulated with the specific intent of achieving national independence and modernization. From this perspective, the New Long March marks the passage of post-Mao China beyond the transition of succession toward the continued pursuit of the same revolutionary goals. The 20th Century Go-N Frank N. Magill, 2014-03-05

Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history. This is not a who's who. Instead, each entry provides an in-depth essay on the life and career of the individual concerned. Essays commence with a quick reference section that provides basic facts on the individual's life and achievements. The extended biography places the life and works of the individual within an historical context, and the summary at the end of each essay provides a synopsis of the individual's place in history. All entries conclude with a fully annotated bibliography. The Labors of Sisyphus Maria Hsia Chang, 1999-10-01

Maria Hsia Chang's *The Labors of Sisyphus* is a reassessment of the meaning and purpose of the Chinese communist revolution. In it, she discusses the thought of Mao Zedong and Deng Xiaoping, reform and its dilemmas, regionalism in greater China and autonomous areas, and nationalism. She also examines China's immediate present and uncertain future. If it manages to transform economic growth into development, China, filled with natural resources and a large, capable labor force, has the potential to become a world superpower. It could also collapse under the weight of its own problems: regionalism, a flawed state sector, corruption, and a pronounced decline in state capacity. If China succeeds, an imposing new economic power will enter the global stage, one that is often arbitrary and prone to despotism and xenophobia unless it is tempered by political reform. *Leadership, Legitimacy, and Conflict in China* Frederick C. Teiwes, 2017-09-29. This title was first published in 1984. This text provides a source of citations to North American scholarships relating specifically to the area of Eastern Europe and the former Soviet Union. It indexes fields of scholarship such as the humanities, arts, technology, and life sciences, and all kinds of scholarship such as PhDs. **China, the United Nations and World Order** Samuel S. Kim, 2015-03-08

China's role in the United Nations has been a significant one. Yet Samuel Kim contends as far as the literature on Chinese foreign policy is concerned the People's Republic of China still remains outside the heuristic framework of the global community. In a comprehensive macro analysis of Chinese global politics Professor Kim probes China's image and strategy of world order as manifested through its behavior in the UN. The author draws upon a wide range of previously untapped primary sources including China's policy pronouncements and voting record and over a hundred personal interviews with UN delegates and international civil servants. He finds that Chinese participation has made the United Nations not only more representative but also more relevant as the global political institution responding to the challenge of establishing a more humane and just world order. Originally published in 1979, The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press. Mao: A Biography Ross Terrill, 1999. Everyone who came in close contact with Mao was taken aback at the anarchy of his personal ways. He ate idiosyncratically. He became increasingly sexually promiscuous as he aged. He would stay up much of the night sleep during much of the day and at times he would postpone sleep remaining awake for thirty six hours or more until tension and exhaustion overcame him. Yet many people who met Mao came away deeply impressed by his intellectual reach originality style of power within simplicity kindness toward low level staff members and the aura of respect that surrounded him at the top of Chinese politics. It would seem difficult to reconcile these two disparate views of Mao. But in a fundamental sense there was no brick wall between Mao the person and Mao the leader. This biography attempts to provide a comprehensive account of this powerful and polarizing historical figure.

Genocide in the Modern Age Zachary A. Karazsia, 2025-01-30. This book explores why some episodes of mass political violence and genocide are so much deadlier than others and under what conditions perpetrators in government and society opt for brutality as a means of accomplishing their goals. Cases including the Holocaust Soviet Union Rwanda Cambodia the Lord's Resistance Army the Islamic State the Ottoman Empire of the 1890s Mao Zedong's revolutionary violence the Congo Crisis and Darfur are used by the author to identify four types of mass political violence perpetrators state actors state society coalitions state sponsored groups and non state actors to explain historical trends and identify which perpetrators are most likely to emerge in a given socio political context and sustain violence over time. Comparative and grounded in case studies this book will interest policymakers diplomats governmental advisers practitioners and industry researchers. Erickson, Lyle J Goldstein, Carnes Lord, 2009-07-01 In modern history China has been primarily a land power dominating smaller states along its massive continental flanks But China's turn toward the sea is now very much a reality as evident in its stunning rise in global shipbuilding markets its vast and expanding merchant marine the wide offshore reach of its energy and minerals exploration companies its growing fishing fleet and indeed its increasingly modern navy Yet for all these achievements there is still profound skepticism regarding China's potential as a genuine maritime power Beijing must still import the most vital subcomponents for its shipyards maritime governance remains severely bureaucratically challenged and the navy evinces at least as of yet little enthusiasm for significant blue water power projection capabilities This volume provides a truly comprehensive assessment of prospects for China's maritime development by situating these important geostrategic phenomena within a larger world historical context China is hardly the only land power in history to attempt transformation by fostering sea power Many continental powers have elected or been impelled to transform themselves into significant maritime powers in order to safeguard their strategic position or advance their interests We examine cases of attempted transformation from the Persian Empire to the Soviet Union and determine the reasons for their success or failure Too many works on China view the nation in isolation Of course China's history and culture are to some extent exceptional but building intellectual fences actually hinders the effort to understand China's current development trajectory Without underestimating the enduring pull of China's past as it relates to threats to the country's internal stability and its landward borders this comparative study provides reason to believe that China has turned the corner on a genuine maritime transformation If that proves indeed to be the case it would be a remarkable if not singular event in the history of the last two millennia *The Modernization of China* Rozman, 1982-08 In *The Modernization of China* an interdisciplinary team of scholars collaborate closely to provide the first systematic integrated analysis of China in transformation from an agrarian based to an urbanized and industrialized society Moving from the legacy of the Ming and Ch'ing dynasties to the reforms and revolutions of the 20th century the authors seek reasons for China's inability to achieve rapid steady growth during a 200 year long struggle to modernize They examine the changing shape of Chinese society the role of the state in local politics military affairs economics the development of the educational system changes in family population and settlement patterns science and technology world views and foreign relations And they make frequent comparisons between China's experience with growth and that of two other latecomers to modernization Japan and Russia The result is a book that brings much needed clarity and perspective to our understanding of China and the way a great civilization attempts to meet the challenge of modernity **The Great Wall at Sea, Second Edition** Bernard D Cole, 2010-12-01 Bernard Cole takes a comprehensive look at China's Navy a Navy that continues to grow while the U S Navy shrinks Of particular note according to the author is

Beijing's increased attention to guarding its vital sea lanes because of the nation's growing dependence on maritime trade especially energy supplies. He provides a thorough description of China's naval establishment including its personnel system followed by a detailed view of its ships, submarines and aircraft all marked by technical sophistication and capability as China reaches the top rank of the world's maritime powers. His evaluation is based on extensive interviews with Chinese and other naval experts in depth perusal of original documents and visits to Chinese warships training facilities and shore establishments. Western Dominance and Political Islam Khalid B. Sayeed, 1995-01-01 This book challenges prevalent Western media and popular interpretations of Islam. Through a political and historical analysis of Saudi Arabia, Iran and Pakistan, countries that represent the religious, ethnic and ideological spectrum of the Muslim world, it explores whether or not Islam as a political religion and civilization can provide a preferable alternative to Western capitalist democracy. Sayeed argues that although Islamic fundamentalism, particularly in its militant and violent form, lacks the potential to become such a system, some of the major Islamic ideas, if reinterpreted and reformulated, can provide a viable alternative to Western political and economic dominance, especially in the Middle and Near East.
