China's Bloody Century R. J. Rummel, 2011-12-31

Except for Soviet citizens no people in this century have endured so much mass killing as have the Chinese. They have been murdered by rebels conniving with their own rulers and then after the defeat in war of the imperial dynasty by soldiers of other lands. They have been killed by warlords who ruled one part of China or another. They have been executed by Nationalists or Communists because they had the wrong beliefs or attitudes or were simply in the wrong place at the wrong time. In China's Bloody Century R.J. Rummel's careful estimate of the total number of killings exceeds 5 million. How do we explain such killings crossing ideological bounds and political conditions? According to Rummel, the one constant factor in all the Chinese mass murder as it was in the Soviet Union and Nazi Germany is arbitrary power. It was the factor that united warlords, Nationalists, Communists and foreign armies. The author argues that whenever such undisciplined power is centralized and unchecked, the possibility exists that it will be used at the whim of dictators to kill for their own ends, whether the aim is ethnic racial purity, national unity, development or utopia. The book presents successive periods in modern Chinese history, with each chapter divided into three parts. Rummel first relates the history of the period within which the nature and the amount of killings are presented. He then provides a detailed statistical table giving the basic estimates with their sources and qualifications. The final part offers an appendix that explains and elaborates the statistical computations and estimates. While estimates are available in the literature on the number of Chinese killed in Communist land reform or in Tibet or by the Nationalists in one military campaign or another, until this book no one has tried to systematically accumulate, organize, add up and analyze these diverse killings for all of China's governments in this century. For the first time in one place, hundreds of published estimates of Chinese genocide and mass murder are listed with sources analyzed and their historical context presented. This book will be of central interest to Sinologists, Sovietologists and those interested in comparative politics and society.

The Chinese Communist Armed Forces Kenneth R. Whiting, 1974. Although the history and present state of the Chinese Communist military forces are not as well covered as those of the Soviet Union, nevertheless there is a relatively large number of books, articles and source collections available in English. Then why this study? The answer is simply that this is an attempt to tell the story of the Chinese Red Army in as concise a form as possible without compressing the narrative to the point of distortion. The study may seem overstuffed with facts or what pass for facts, but the author can assure the reader that he did his best to eliminate all but those he considered essential. The historical approach has been used for the simple reason that like any other organism, the Chinese Red Army is a melange of strengths and weaknesses rooted in its evolution.

The Cambridge History of China Roderick MacFarquhar, John King Fairbank, 1987. *Return to the Middle Kingdom* Yuan-tsung Chen, 2008. The author chronicles three generations of her late husband's family, all of whom fought against the injustices they encountered in their homeland of China.

The Politics of Controlling Organized Crime in Greater China Sonny Shiu-Hing Lo, 2015-12-14. In China, the central government has the political will to control organized crime, which is seen as a national security threat. The crux of the problem is how to control local governments that have

demonstrated lax enforcement without sufficient regulation from the provincial governments. The development of prostitution, underground gambling, and narcotics production has become so serious that the central government has to rely on anti crime campaigns to combat these three evils. This book explores the specific role of government institutions and agencies, notably the police, in controlling organised and cross border crime in Greater China. Drawing heavily on original empirical data, it compares the both the states of the People's Republic of China and Taiwan, as well as city states Hong Kong and Macao. This region has become increasingly economically integrated and human interactions have been enhanced through improved trade relations, tourism, and increased individual freedom. The book argues that the regime capacity of crime control across Greater China has been expanded through regional and international police cooperation, as well as anti crime campaigns. It suggests that a strong central state in China is necessary to rein in the local states and to prevent the risk of deteriorating into a political criminal nexus. Focusing on regime capacity in crime control, regime autonomy from crime groups, and regime legitimacy in the fight against organized crime, this thought provoking book will be of great interest to students and scholars of Chinese politics and criminology more broadly. **Leadership and Authority in China** Lawrence Sullivan, 2012-07-13

This volume presents elite conflicts and political controversies in China from 1895 to 1978, as rooted in two diametrically opposed visions of leadership and political authority: a radical charismatic model that instills absolute authority in the single leader whose will guides the polity and whose word is the basis of policy formulation, versus an institutional model in which authority inheres in organization and where collective leadership and decision making govern the political realm. The former model in modern Chinese history entailed a leader principle and personality cult that began with Sun Yatsen and Chiang Kaishek in the Nationalist Party (KMT) and reached its peak with the leadership cult of Chinese Communist Party (CCP) Chairman Mao Zedong, especially during the 1966-1976 Great Proletarian Cultural Revolution. The latter model, with its emphasis on collective leadership (*jiti lingdao*) and administrative rationalism, began as a reaction among early members of the CCP against the promotion of the Sun and Chiang leadership cults and became a central governing principle in the Communist Party that served as official leadership doctrine beginning with the formation of the Party in 1921. While tensions over leadership issues were relatively muted in the pre-1949 period and early 1950s of CCP history, as an apparent compromise was reached in which, from 1943 onward, a cult of the leader was promoted for propaganda purposes but with collegial decision making governing inner Party decision making, the mid to late 1950s saw this compromise among the top leadership come under increasing strain and finally break down. Devoted to a fundamentally different vision of a socialist China from other top leaders on a number of economic, social, and political fronts, Mao Zedong pushed his domination of the policy process that ultimately provoked a wholesale assault on the CCP apparatus throughout the country while the leader cult reached mythic proportions during the Cultural Revolution. Confronted by the possibility of civil war and generally opposed to the takeover of the polity by the radical Gang of Four led by his wife Jiang Qing, by the mid 1970s the aging great

leader acquiesced to the rebuilding of the CCP along traditional institutional lines **Death by Government** R. J.

Rummel, 1997-01-01 This is R J Rummel's fourth book in a series devoted to genocide and government mass murder or what he calls democide. He presents the primary results in tables and figures as well as a historical sketch of the major cases of democide: those in which one million or more people were killed by a regime. In *Death by Government*, Rummel does not aim to describe democide itself but to determine its nature and scope in order to test the theory that democracies are inherently nonviolent. Rummel discusses genocide in China, Nazi Germany, Japan, Cambodia, Turkey, Yugoslavia, Poland, the Soviet Union, and Pakistan. He also writes about areas of suspected genocide: North Korea, Mexico, and feudal Russia. His results clearly and decisively show that democracies commit less democide than other regimes. The underlying principle is that the less freedom people have, the greater the violence; the more freedom, the less the violence. Thus, as Rummel says, "The problem is power. The solution is democracy. The course of action is to foster freedom." *Death by Government* is a compelling look at the horrors that occur in modern societies. It depicts how democide has been very much a part of human history. Among other examples, the book includes the massacre of Europeans during the Thirty Years War, the relatively unknown genocide of the French Revolution, and the slaughtering of American Indians by colonists in the New World. This riveting account is an essential tool for historians, political scientists, and scholars interested in the study of genocide.
