Mapping And Empire:

Mapping an Empire Matthew H. Edney, 2024-05-31 In this fascinating history of the British surveys of India Matthew H. Edney relates how imperial Britain used modern survey techniques to not only create and define the spatial image of its Empire but also to legitimate its colonialist activities There is much to be praised in this book It is an excellent history of how India came to be painted red in the nineteenth century But more importantly *Mapping an Empire* sets a new standard for books that examine a fundamental problem in the history of European imperialism D Graham Burnett *Times Literary Supplement* *Mapping an Empire* is undoubtedly a major contribution to the rapidly growing literature on science and empire and a work which deserves to stimulate a great deal of fresh thinking and informed research David Arnold *Journal of Imperial and Commonwealth History* This case study offers broadly applicable insights into the relationship between ideology technology and politics Carefully read this is a tale of irony about wishful thinking and the limits of knowledge Publishers Weekly

Mapping an Empire Matthew H. Edney, 1999 **The Imperial Map** James R. Akerman, 2009-03 Maps from virtually every culture and period convey our tendency to see our communities as the centre of the world if not the universe and by implication as superior to anything beyond our boundaries This study examines how cartography has been used to prop up a variety of imperialist enterprises

Mapping an Empire Benjamin Schmidt, 1997 **The New Map of Empire** S. Max Edelson, 2017-04-24 After the Treaty of Paris ended the Seven Years War in 1763 British America stretched from Hudson Bay to the Florida Keys from the Atlantic coast to the Mississippi River and across new islands in the West Indies To better rule these vast dominions Britain set out to map its new territories with unprecedented rigor and precision Max Edelson's *The New Map of Empire* pictures the contested geography of the British Atlantic world and offers new explanations of the causes and consequences of Britain's imperial ambitions in the generation before the American Revolution Under orders from King George III to reform the colonies the Board of Trade dispatched surveyors to map far flung frontiers chart coastlines in the Gulf of St Lawrence sound Florida's rivers parcel tropical islands into plantation tracts and mark boundaries with indigenous nations across the continental interior Scaled to military standards of resolution the maps they produced sought to capture the essential attributes of colonial spaces their natural capacities for agriculture navigation and commerce and give British officials the knowledge they needed to take command over colonization from across the Atlantic Britain's vision of imperial control threatened to displace colonists as meaningful agents of empire and diminished what they viewed as their greatest historical accomplishment settling the New World As London's mapmakers published these images of order in breathtaking American atlases Continental and British forces were already engaged in a violent contest over who would control the real spaces they represented Accompanying Edelson's innovative spatial history of British America are online visualizations of more than 250 original maps plans and charts

Mapping and Empire Dennis Reinhartz, Gerald D. Saxon, 2010-01-01 From the sixteenth through the mid nineteenth centuries Spain then Mexico and finally the United States

took ownership of the land from the Gulf Coast of Texas and Mexico to the Pacific Coast of Alta and Baja California today's American Southwest. Each country faced the challenge of holding on to territory that was poorly known and sparsely settled and each responded by sending out military mapping expeditions to set boundaries and chart topographical features. All three countries recognized that turning terra incognita into clearly delineated political units was a key step in empire building as vital to their national interest as the activities of the missionaries, civilian officials, settlers, and adventurers who followed in the footsteps of the soldier engineers. With essays by eight leading historians, this book offers the most current and comprehensive overview of the processes by which Spanish, Mexican, and U.S. soldier engineers mapped the southwestern frontier as well as the local and even geopolitical consequences of their mapping. Three essays focus on Spanish efforts to map the Gulf and Pacific Coasts to chart the inland Southwest and to define and defend its boundaries against English, French, Russian, and American incursions. Subsequent essays investigate the role that mapping played both in Mexico's attempts to maintain control of its northern territory and in the United States' push to expand its political boundary to the Pacific Ocean. The concluding essay draws connections between mapping in the Southwest and the geopolitical history of the Americas and Europe.

Mapping Empires: Colonial Cartographies of Land and Sea Alexander James Kent, Soetkin Vervust, Imre Josef Demhardt, Nick Millea, 2019-08-26. This book comprises 17 chapters derived from new research papers presented at the 7th International Symposium of the ICA Commission on the History of Cartography held in Oxford from 13 to 15 September 2018 and jointly organized by the ICA Commission on Topographic Mapping and the Bodleian Libraries, University of Oxford. The overall conference theme was Mapping Empires: Colonial Cartographies of Land and Sea. The book presents a breadth of original research undertaken by internationally recognized authors in the field of historical cartography and offers a significant contribution to the development of this growing field and to many interdisciplinary aspects of geography, history, and the geographic information sciences. It is intended for researchers, teachers, postgraduate students, map librarians, and archivists.

Mapping, Connectivity, and the Making of European Empires Luis Lobo-Guerrero, Laura Lo Presti, Filipe dos Reis, 2021-06-29. This volume seeks to collectively explore how maps can be used to understand the making of European empires, how the epistemological practices embedded in them can be approached to understand European imperial space making, and how maps can be seen as representations of imaginaries of connectivity. Rehearsing mapping's past and its multifarious relations with European imperial orders is not merely an historical exercise to contribute to a global history of cartography. What binds the several interventions is rather an awareness that looking at a particular moment of the past with composite methodologies and interdisciplinary gazes may harbour potential discoveries on the context embedded relations between mapping, connectivity, and European empire to which we are not yet attuned. By exploring the imaginaries of the world in the mapping of Western modern empires, the book also links to the burgeoning literature on the history of international relations and empire. The emphasis on empires serves here as an important corrigendum for IR's state centrism.

and Eurocentrism and contributes to further erode the myth of Westphalia **Mapping Men and Empire** Richard Phillips,1996 Mapping European Empire Russell Foster,2015-06-26 Empire and maps are mutually reliant phenomena and traceable to the dawn of civilisation Furthermore maps retain a supremely authoritative status as unquestioned reflections of reality In today s image saturated world their influence is more powerful now than at any other time in history This book argues that in the 21st century we are seeing an imperial renaissance in the European Union EU a political organisation which defies categorisation but whose power and influence grows by the year It examines the past present and future of the EU to demonstrate that empire is not a category of state but rather a collective imagination which reshapes history and appropriates an artificial past to validate the policies of the present and the ambitions of the future In doing so this book illuminates the imperial discourse that permeates the mass maps of the modern EU This text will be of key interest to students and scholars of political science EU Studies Human Geography European political history cartography and visual methodologies and international relations Mapping the End of Empire Aiyaz Husain,2014-04-14 By 1945 Washington and London envisioned a new era in which the U S shouldered global responsibilities while Britain focused its regional interests narrowly Mapping the End of Empire reveals how Anglo American perceptions of geography and perspectives on the Muslim world shaped postcolonial futures from the Middle East to South Asia **Mapping Men and Empire** Richard Phillips,1997 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company **Mapping and Empire** Matthew H. Cartography Matthew H. Edney, 2019-04-12

In his most ambitious work to date Edney questions the very concept of cartography to argue that this flawed ideal has hobbled the study of maps Susan Schulten author of *A History of America in 100 Maps* Over the past four decades the volumes published in the landmark *History of Cartography* series have both chronicled and encouraged scholarship about maps and mapping practices across time and space As the current director of the project that has produced these volumes Matthew H. Edney has a unique vantage point for understanding what cartography has come to mean and include In this book Edney disavows the term cartography rejecting the notion that maps represent an undifferentiated category of objects for study Rather than treating maps as a single unified group he argues scholars need to take a processual approach that examines specific types of maps sea charts versus thematic maps for example in the context of the unique circumstances of their production circulation and consumption To illuminate this bold argument Edney chronicles precisely how the ideal of cartography that has developed in the West since 1800 has gone astray By exposing the flaws in this ideal his book challenges everyone who studies maps and mapping practices to reexamine their approach to the topic The study of cartography will never be the same An intellectually bracing and marvellously provocative account of how the mythical ideal of cartography developed over time and in the process distorted our understanding of maps *Times Higher Education*

Cartography The Ideal and Its History offers both a sharp critique of current practice and a call to reorient the field of map studies A landmark contribution Karen Wigen coeditor of *Time in Maps*
