Doan, 2016-05-23 Current planning practices have largely neglected the needs of the Lesbian Gay Bisexual and Transgender LGBT community for safe urban spaces in which to live work and play This volume fills the gap in the literature on the planning and development of queer spaces and highlights some of the resistance within the planning profession to incorporate gay and lesbian concerns into the planning mainstream Planning lags behind other disciplines concerned with queer urban issues In contrast the field of geography has developed a rich sub specialty in the geographies of sex and gender that examines spaces and the variety of non heteronormative populations that inhabit them This volume brings together both planners and geographers with experience in planning to examine some of the fundamental assumptions of urban planning as they relate to the LGBT community The first few chapters are substantial revisions and expansions of earlier influential work on planning for non conformist populations and the preservation of LGBT neighborhoods Subsequent chapters comprise original contributions that draw on the rich literature from queer theory planning theory and the geography of sexualities to explore the ways that nonconformist populations struggle with heteronormative expectations embedded in planning theory and procedures These chapters consider the intersection of

planning and a range of populations including transgendered and gender variant individuals Subsequent chapters examine the ways that variations in the scale of urban and regional governance influence local politics around the implementation of more equitable policies at the city level In addition several chapters critically examine the implications of using the tolerance component of Richard Florida's creative cities arguments. The final section consists of two chapters that explore the ways that urban planning regimes have been used to regulate sexually oriented businesses and the way this regulation of sexualized spaces has implications on the heteronormativity of plans and planners. In summary these chapters interrogate planning practice and pose questions for academic and professional planners about the ways that the queer community and its needs for spaces have shifted What do those changes mean for the practice of planning 40 years after the North American Stonewall rebellion and looking forward to the next 40 years. To what extent does existing planning practice constrain the evolution of queer communities or seek to commercialize such spaces to the benefit of large developers and the detriment of marginalized members of the community How might planning practice change to provide more direct support to the evolution of queer people and the spaces in which they live This volume draws on these insights as well as the experiences of the various authors to lay out possible future directions for the field of planning to create truly inclusive urban areas

Theory and Methods Chris Philo, 2017-05-15 This volume tackles the complex terrain of theory and methods seeking to exemplify the major philosophical social theoretic and methodological developments some with clear political and ethical implications that have traversed human geography since the era of the 1960s when spatial science came to the fore Coverage includes Marxist and humanistic geographies and their many variations over the years as well as ongoing debates about agency structure and the concepts of time space place and scale Feminist and other positioned geographies alongside poststructuralist and posthumanist geographies are all evidenced as well as writings that push against the very limits of what human geography has embraced over these fifty plus years The volume combines readings that are well known and widely accepted as classic with readings that while less familiar are valuable in how they illustrate different possibilities for theory and method within the discipline The volume also includes a substantial introduction by the editor contextualising the readings and in the process providing a new interpretation of the last half century of change within the thoughts and practices of human geography The Wiley-Blackwell Encyclopedia of Urban and Regional Studies Anthony M. newspaper clippings he presents a lively history of this resort area and its surprising role in the evolution of local courtship and dating practices from the commoditization of the courting experience by the Canadian Pacific Railway's Moonlight Specials through the development of an elaborate amusement area that encouraged public dating and to its eventual demise amid the moral panic over sexual behaviour during the 1950s and 60s 

Counselling Ideologies Lyndsey Moon, 2016-05-13 Counselling Ideologies draws our attention to the dilemmas inherent within the therapeutic ideologies commonly subscribed to by psychotherapists and counsellors working with those who challenge heteronormative models and approaches Identifying the modernist heteronormative understandings of the world implicit in the more popular models this book employs queer theory to challenge these ideologies drawing on disciplines both within and outside of counselling and psychology as well as sociology cultural studies and various ethnographic accounts It highlights the dilemmas faced by those who may wish to practise as queer therapists addressing not only therapeutic dilemmas but also issues such as identity race coming out experiences internalised homophobia empathy ethical issues bisexuality and pathologisation Comprising contributions from both academic experts and practitioners from the UK USA and Australia this book represents a new approach to counselling and psychotherapy that will appeal not only to sociologists and those working in the field of mental health but also to scholars of race and ethnicity gender queer studies and queer theory
