**Mapping Subaltern Studies and the Postcolonial** Vinayak Chaturvedi, 2000 This volume in the Mapping series offers a balance sheet of the Subaltern Studies Project an intervention in South Asian history and politics which has generated an impact in Latin American Irish and African Studies

**The Postcolonial Orient** Vasant Kaiwar, 2014-05-08 In The Postcolonial Orient Vasant Kaiwar presents a far reaching analysis of the political economic and ideological cross currents that have shaped and informed postcolonial studies preceding and following the 1989 moment of world history The valences of the post in postcolonialism are unfolded via some key historical political postcolonial texts showing inter alia that they are replete with elements of Romantic Orientalism and the Oriental Renaissance Kaiwar mobilises a critical body of classical and contemporary Marxism to demonstrate that far richer understandings of Europe not to mention colonialism modernity and difference are possible than with a postcolonialism captive to phenomenological existentialism and post structuralism concluding that a narrative so enriched is indispensable for a transformative non Eurocentric internationalism

**The Postcolonial Unconscious** Neil Lazarus, 2011-06-30 The Postcolonial Unconscious is a major attempt to reconstruct the whole field of postcolonial studies In this magisterial and at times polemical study Neil Lazarus argues that the key critical concepts that form the very foundation of the field need to be re assessed and questioned Drawing on a vast range of literary sources Lazarus investigates works and authors from Latin America and the Caribbean Africa and the Arab world South Southeast and East Asia to reconsider them from a postcolonial perspective Alongside this he offers bold new readings of some of the most influential figures in the field Fredric Jameson Edward Said and Frantz Fanon A tour de force of postcolonial studies this book will set the agenda for the future probing how the field has come to develop in the directions it has and why and how it can grow further

**Remapping the Indian Postcolonial Canon** Nirmala Menon, 2016-12-27 This book critically examines the postcolonial canon questioning both the disproportionate attention to texts written in English and their overuse in attempts to understand the postcolonial condition The author addresses the non representation of Indian literature in theory and the inadequacy of generalizing postcolonial experiences and subjectivities based on literature produced in one language English It argues that while postcolonial scholarship has successfully challenged Eurocentrism it is now time to extend the dimensions beyond Anglophone and Francophone literatures to include literatures in other languages such as Hindi Telugu Tamil Tagalog and Swahili

**The Cambridge Companion to Postcolonial Literary Studies** Neil Lazarus, 2004-07-15 Offers a lucid introduction to postcolonial studies one of the most important strands in recent literary theory and cultural studies

*Postcolonialism* Tariq Jazeel, 2019-02-22 Postcolonialism is a book that examines the influence of postcolonial theory in critical geographical thought and scholarship Aimed at advanced level students and researchers the book is a lively stimulating and relevant introduction to postcolonial geography that elaborates on the critical interventions in social cultural and political life this important subfield is poised to make The book is structured around three intersecting

parts Spaces Identity hybridity Knowledge that broadly follow the trajectory of postcolonial studies since the late 1970s It comprises ten main chapters each of which is situated at the intersections of postcolonialism and critical human geography In doing so Postcolonialism develops three key arguments First that postcolonialism is best conceived as an intellectually creative and practical set of methodologies or approaches for critically engaging existing manifestations of power and exclusion in everyday life and in taken as given spaces Second that postcolonialism is at its core concerned with the politics of representation both in terms of how people and space are represented but also the politics surrounding who is able to represent themselves and on what whose terms Third the book argues that postcolonialism itself is an inherently geographical intellectual enterprise despite its origins in literary theory In developing these arguments and addressing a series of relevant and international case studies and examples throughout Postcolonialism not only demonstrates the importance of postcolonial theory to the contemporary critical geographical imagination It also argues that geographers have much to offer to continued theorizations and workings of postcolonial theory politics and intellectual debates going forward This is a book that brings critical analyses of the continued and omnipresent legacies of colonialism and imperialism to the heart of human geography but also one that returns an avowedly critical geographical disposition to the core of interdisciplinary postcolonial studies

**Globalization and Postcolonialism** Sankaran Krishna, 2009 Globalization has become a widely used buzzword yet popular discussions often miss its deeper realities This book offers the first clear explanation of the impact of colonialist legacies in a globalized world in an era defined by the War on Terror Sankaran Krishna explores the history of the relationship between Western dominance and the forms of resistance that have emerged to challenge it Moving beyond the simple formulation of They hate us because we are rich we are free and they are crazy he asks What have we done that might generate such animosity What face has the United States presented to the developing world over time Krishna argues that we live on an interrelated globe that history matters a great deal in constructing contemporary realities and that others create stories or narratives about the world based on their experiences just as we do based on ours He contends that the interactions between the West and the non West have not been politically innocent economically egalitarian or culturally benign in their consequences Presenting a lucid exploration of the intertwined histories of both globalization and postcolonialism this book uses compelling real world examples to make sense of this crucial relationship

*Transitional Justice from Below* Kieran McEvoy, Lorna McGregor, 2008-07-15 Although relatively new as a distinct field of study transitional justice has become rapidly established as a vital field of enquiry From vaguely exotic origins on the outer edges of political science the study of justice in times of transition has emerged as a central concern of scholarship and practical policy making A process of institutionalisation has confirmed this importance The ICTY the ICTR the ICC hybrid tribunals in Sierra Leone and East Timor and local processes such as the Iraqi Higher Tribunal IHT have energised international law and international criminal justice scholarship The South African TRC was for a time lauded as the

model for dealing with the past and remains one of the most researched institutions in the world. It is one of approximately two dozen such institutions established in different transitional contexts over the past twenty years to assist conflicted societies to come to terms with a violent past. At the national level, international donors contribute huge sums of money to Rule of Law programmes designed to transform national justice systems. This collection seeks to offer something quite different to the mainstream of scholarship in this area, emphasising the need for bespoke solutions to different transitions rather than off the shelf models. The collection is designed to offer a space for diversity prompted by a series of perspectives from below of societies beset by past violent conflict which have sought to effect their transition to justice. In doing so, the contributors have also sought to enrich discussion about the role of human rights in transition, the continuing usefulness of perspectives from above and the still contested meanings of transition.

#### **Out of the Dark Night** Achille

Mbembe, 2021-01-19 Achille Mbembe is one of the world's most profound critics of colonialism and its consequences, a major figure in the emergence of a new wave of French critical theory. His writings examine the complexities of decolonization for African subjectivities and the possibilities emerging in its wake. In *Out of the Dark Night* he offers a rich analysis of the paradoxes of the postcolonial moment that points toward new liberatory models of community, humanity and planetarity. In a nuanced consideration of the African experience, Mbembe makes sweeping interventions into debates about citizenship, identity, democracy and modernity. He eruditely ranges across European and African thought to provide a powerful assessment of common ways of writing and thinking about the world. Mbembe criticizes the blinders of European intellectuals analyzing France's failure to heed postcolonial critiques of ongoing exclusions masked by pretenses of universalism. He develops a new reading of African modernity that further develops the notion of Afropolitanism, a novel way of being in the world that has arisen in decolonized Africa in the midst of both destruction and the birth of new societies. *Out of the Dark Night* reconstructs critical theory's historical and philosophical framework for understanding colonial and postcolonial events and expands our sense of the futures made possible by decolonization.

#### **Videogames and Postcolonialism** Souvik

Mukherjee, 2017-07-24 This book focuses on the almost entirely neglected treatment of empire and colonialism in videogames. From its inception in the nineties, Game Studies has kept away from these issues despite the early popularity of videogame franchises such as *Civilization* and *Age of Empire*. This book examines the complex ways in which some videogames construct conceptions of spatiality, political systems, ethics and society that are often deeply imbued with colonialism. Moving beyond questions pertaining to European and American gaming cultures, this book addresses issues that relate to a global audience, including especially the millions who play videogames in the formerly colonised countries seeking to make a timely intervention by creating a larger awareness of global cultural issues in videogame research. Addressing a major gap in Game Studies research, this book will connect to discourses of post colonial theory at large and thereby provide another entry point for this new medium of digital communication into larger Humanities discourses.

#### *Theology in the Capitalocene* Joerg

Rieger,2022-08-30 In times of rising pressures and catastrophes people yearn for alternatives So does the planet Protests are often a start but rebellion is not revolution nor does it always lead to transformation In this incisive and compelling new book Joerg Rieger takes a new look at the things that cause unease and discomfort in our time leading to the growing destruction and death of people and the planet Only when these causes are understood he argues can real alternatives be developed And yet understanding is only a start Solidarity and the willingness to work at the seemingly impossible intersections of everything the triad of gender race and class yes but more beyond must mark the work of theology Without solidarities that match the complexities of our world the best we can hope for is inclusion in the dominant system but hardly the systemic change and liberation we so desperately need **Reworking Postcolonialism** P. Malreddy,B. Heidemann,O.

spread and advance in colonial and post colonial South Asia A selection of articles addresses critical issues of nationalism communalism commercialism and gender through the lens of sport This book makes the point that the social histories of South Asian sport cannot be understood by simply looking at the history of the game in one province or region Furthermore it demonstrates that it would be wrong to understand sport in terms of the exigencies of the colonial state Drawing inspiration from C L R James well known epigram What do they know of cricket who only cricket know the findings suggest that South

Asian sport makes sense only when it is placed within the broader colonial and post colonial context The book demonstrates that sport not only influences politics and vice versa but that the two are inseparable Sport is not only political it is politics intrigue culture and art To deny this is to denigrate the position of sport in modern South Asian society This volume was previously published as a special issue of The International Journal of the History of Sport The Ashgate Research Companion to Modern Imperial Histories John Marriott, 2016-03-23 Written by leading scholars this collection provides a comprehensive and authoritative overview of modern empires Spanning the era of modern imperial history from the early sixteenth century to the present it challenges both the rather insular focuses on specific experiences and gives due attention to imperial formations outside the West including the Russian Japanese Mughal Ottoman and Chinese The companion is divided into three broad sections Part I Times surveys the three main eras of modern imperialism The first was that dominated by the settlement impulse with migrants many voluntarily and many more by force making new lives in the colonies This impulse gave way most especially in the nineteenth century to a period of busy and rapid expansion which was less likely to promote new settlement and in which colonists more frequently saw their sojourn in colonial lands as temporary and related to the business mostly of governance and trade Lastly in the twentieth century in particular empires began to fail and to fall Part II Spaces studies the principal imperial formations of the modern world Each chapter charts the experience of a specific empire while at the same time placing it within the complex patterns of wider imperial constellations The individual chapters thus survey the broad dynamics of change within the empires themselves and their relationships with other imperial formations and reflect critically on the ways in which these topics have been approached in the literature In Part III Themes scholars think critically about some of the key features of imperial expansion and decline These chapters are brief and many are provocative They reflect the current state of the field and suggest new lines of inquiry which may follow from more comparative perspectives on empire The broad range of themes captures the vitality and diversity of contemporary scholarship on questions of empire and colonialism encompassing political economic and cultural processes central to the formation and maintenance of empires as well as institutions ideologies and social categories that shaped the lives both of those implementing and those experiencing the force of empire In these pages the reader will find the slave and the criminal the merchant and the maid the scientist and the artist alongside the structures which sustained their lives and their livelihoods Overall the companion emphasises the diversity of imperial experience and process Comprehensive in its scope it draws attention to the particularities of individual empires rather than over generalising as if all empires at all times and in all places behaved in a similar manner It is this contingent and historical specificity that enables us to explore in expansive ways precisely what constituted the modern empire **From Agamben to Zizek** Jon Simons, 2010-09-10 In these 15 taster essays you will discover the key concepts and critical approaches of the theorists who have had the most significant impact on the humanities since 1990 On completing each chapter you will find suggestions for further reading so that you can find

out more and start applying the ideas in question In addition to chapters on individuals such as Badiou Ranciere and Spivak there are chapters on Laclau and Mouffe and a chapter on Green critical theorists

**Postcolonial Theory and the Specter of Capital** Vivek Chibber, 2014-02-25 Postcolonial theory has become enormously influential as a framework for understanding the Global South It is also a school of thought popular because of its rejection of the supposedly universalizing categories of the Enlightenment In this devastating critique mounted on behalf of the radical Enlightenment tradition Vivek Chibber offers the most comprehensive response yet to postcolonial theory Focusing on the hugely popular Subaltern Studies project Chibber shows that its foundational arguments are based on a series of analytical and historical misapprehensions He demonstrates that it is possible to affirm a universalizing theory without succumbing to Eurocentrism or reductionism Postcolonial Theory and the Specter of Capital promises to be a historical milestone in contemporary social theory

**Beyond Hybridity and Fundamentalism** Tabassum Ruhi Khan, 2015-05-28 The question of identity and especially its formation among youth has received significant academic attention as our worlds become intricately and unpredictably connected through satellite televisions mobile telephones Internet and social networking platforms Marking a distinct addition to such scholarship this volume is an ethnographic study of the under investigated issue of Indian Muslim youth s emergent subjectivity in a media saturated globalized Indian society The author develops the idea of convoluted modernity to explain Muslim youth s reactions to multifarious and divergent influences both from the East as well as the West shaping their everyday life The concept illustrates how Muslim youths ideas about self and community draw equally on MTV as on Peace TV to create a complex truck between consumerist hedonism and globalized Islam Introducing a new perspective to studies on globalization media and cultural politics this book shows how interpolation of local and global in the accelerated virtual spheres and their contextual interpretation within an expanding economy notwithstanding Muslim youth s disadvantaged position shape alternate modernities rife with ambiguities and beyond binaries of progress and regression
