

But distance may also
mean nothing
To a pair of lover's
hearts
Who may be far apart
But choose the path
That may split into two
But despite the divide
Will still meet together
and intertwine
And thus erase any
feeling of distance.

Mapping The Distance Poems

Giuseppe Mazzotta

Mapping The Distance Poems:

Mapping the Distance Ingrid Horrocks, 2010-05-01 This superb collection of poems shows the benefit of ten years gestation The major part of the book consists of poems coming from years spent living and studying overseas and then settling back in New Zealand and starting a family With its broad scope and variety of lyric styles Mapping the Distance is a landmark book

Mapping the Distance Alicia Hokanson, 1989-01-01 **Queen Street: a Poem, in Seven Parts ... With Map Illustrations** R. T. Sawers, 1848 *Pocket Maps and Public Poetry in the English Renaissance* Katarzyna Lecky, 2019-04-17 Katarzyna Lecky explores how early modern British poets paid by the state adapted inclusive modes of nationhood charted by inexpensive small format maps She explores chapbooks cheapbooks by Edmund Spenser Samuel Daniel Ben Jonson William Davenant and John Milton alongside the portable cartography circulating in the same retail print industry Domestic pocket maps were designed for heavy use by a broad readership that included those on the fringes of literacy The era's de facto laureates all banked their success as writers appealing to this burgeoning market share by drawing the nation as the property of the commonwealth rather than the Crown This book investigates the accessible world of small format cartography as it emerges in the texts of the poets raised in the expansive public sphere in which pocket maps flourished It works at the intersections of space place and national identity to reveal the geographical imaginary shaping the flourishing business of cheap print Its placement of poetic economies within mainstream systems of trade also demonstrates how cartography and poetry worked together to mobilize average consumers as political agents This everyday form of geographic poesis was also a strong platform for poets writing for monarchs and magistrates when their visions of the nation ran counter to the interests of the government

With the Witnesses Dale Tracy, 2017-06-09 While trauma theory has been adopted by contemporary literary and cultural studies as an ethical way to study depictions of suffering there is a risk that its present use could cause more harm than good By emphasizing inaccessible histories unspeakable suffering and unconscious witnessing trauma theory may lead readers to claim others suffering through empathic identification In *With the Witnesses* Dale Tracy argues that poetry offers an alternative approach to engage with not only suffering in art but suffering in general Examining the strategies of witness poetry Tracy interrogates and reformulates the dominant models of trauma studies in which readers take over the witnessing position by identifying with the speaker as a witness If the purpose of reading such poetry is to contribute to a chain of witnesses what is the distinct role of a reader and how does it differ from the role of the poem's speaker Tracy proposes that metonymy a logic of nearness rather than likeness is compassion's formal manifestation Analyzing poetry that emphasizes the contiguity of metonymy over the substitution of metaphor she attends to the positions into which witnessing speakers invite readers Poems that respond to diverse national and transnational contexts of atrocity conflict and marginalization guide *With the Witnesses* toward a compassionate response to suffering that involves feeling with not as another Following each poem as a unique theory of compassion *With the Witnesses* demonstrates

that poems hold suffering signed as art not claimable traces of suffering *Chicago Poems* Carl Sandburg,1992 Poems celebrate the city and its ordinary citizens and look at World War I and the struggle of working people to succeed Rona, a Poem, in Seven Books, Illustrated with a Correct Map of the Hebrides, and Elegant Engravings. The Notion of Turning in Metaphysical Poetry Carmen Dörge,2018 In Metaphysical Poetry there is an emphasis on religious experience which often touches on diverse kinds of turning Among them are religious conversion a turn to God spatial movement turning in space divine transformation turning from one kind into another musical tuning turning as a requisite for harmony and circular turning Moreover there is a strong link between turning and its realisation through the language of the poems Focusing on John Donne and George Herbert this study explores various aspects of turning as well as their interrelation Dissertation Series Religion and Literature Religion und Literatur Vol 7 Subject Poetry The New Map of the World Giuseppe Mazzotta,2014-07-14 For today s readers the great Italian philosopher of history Giambattista Vico 1668 1744 can be startlingly relevant to the social and educational divisiveness we confront at century s end here Giuseppe Mazzotta one of the leading Italianists in the United States shows how much Vico properly read can bring to an understanding of contemporary social problems To explore Vico s body of thought in all its monumental complexity Mazzotta highlights the place of poetry or writerliness in Vico s educational project which links literature history religion philosophy and politics The New Map of the World is the first book since Benedetto Croce s *The Philosophy of G B Vico* 1911 to interpret the immense range of Vico s creativity Beginning with Vico s autobiography Mazzotta explains that Vico s heroic attempt to unite the arts and sciences was meant to offer a desperately needed political unity to modern society In contrast to past thematic studies of Vico that focus on a single one of his ideas The New Map of the World explores the vital interaction of the issues that fascinated him his educational and political project his sense of the necessity for a new way of conceiving authority and his belief in the power of poetry Mazzotta ends by examining Vico s awareness of the tragic limits of politics itself Originally published in 1999 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **A Map of Mexico City Blues** James T

Jones,2010-08-20 In this pioneering critical study of Jack Kerouac s book length poem *Mexico City Blues* apoetic parallel to the writer s fictional saga the *Duluoz Legend* James T Jones uses a rich and flexible neoformalist approach to argue his case

for the importance of Kerouac's rarely studied poem *After*. After a brief summary of Kerouac's poetic career Jones embarks on a thorough reading of *Mexico City Blues* from several different perspectives: he first focuses on Kerouac's use of autobiography in the poem and then discusses how Kerouac's various trips to Mexico, his conversion to Buddhism, his theory of spontaneous poetics, and his attraction to blues and jazz influenced the theme, structure, and sound of *Mexico City Blues*. Jones's multidimensional explication suggests the formal and thematic complexity of Kerouac's long poem and demonstrates the major contribution *Mexico City Blues* makes to post-World War II American poetry and poetics.

Poetry of the Universe

Robert Osserman, 2011-04-27 In the bestselling literary tradition of Lewis Thomas's *Lives of a Cell* and James Watson's *The Double Helix*, *Poetry of the Universe* is a delightful and compelling narrative charting the evolution of mathematical ideas that have helped to illuminate the nature of the observable universe. In a richly anecdotal fashion, the book explores the leaps of imagination and vision in mathematics that have helped pioneer our understanding of the world around us.

Geocritical Explorations Robert T. Tally Jr., 2011-10-03 In recent years the spatial turn in literary and cultural studies has opened up new ways of looking at the interactions among writers, readers, texts, and places. Geocriticism offers a timely new approach, and this book presents an array of concrete examples or readings which also reveal the broad range of geocritical practices.

We Begin in Gladness Craig Morgan Teicher, 2018-11-06 One of our most perceptive critics on the ways that poets develop poems, a career, and a life. Though it seems at first like an art of speaking, poetry is an art of listening. The poet trains to hear clearly and as much as possible without interruption: the voice of his or her mind, the voice that gathers packs with meaning and unpacks the language he or she knows. It can take a long time to learn to let this voice speak without getting in its way. This slow learning, the growth of this habit of inner attentiveness, is poetic development, and it is the substance of the poet's art. Of course, this growth is rarely steady, never linear, and is sometimes not actually growth but diminishment; that's all part of the compelling story of a poet's way forward. From the Introduction: The staggering thing about a life's work is it takes a lifetime to complete. Craig Morgan Teicher writes in these luminous essays. *We Begin in Gladness* considers how poets start out, how they learn to hear themselves, and how some offer us that rare, glittering thing: lasting work. Teicher traces the poetic development of the works of Sylvia Plath, John Ashbery, Louise Glück, and Francine J. Harris, among others, to illuminate the paths they forged by dramatic breakthroughs or by slow increments, and always by perseverance. *We Begin in Gladness* is indispensable for readers curious about the artistic life and for writers wondering how they might light out or even scale the peak of the mountain.

Navigating CHamoru Poetry Craig Santos Perez, 2022-01-25 *Navigating CHamoru Poetry* focuses on Indigenous CHamoru (Chamorro) poetry from the Pacific Island of Guam. Poet and scholar Craig Santos Perez brings critical attention to a diverse and intergenerational collection of CHamoru poetry and scholarship. Throughout this book, Perez develops an Indigenous literary methodology called wayreading to navigate the complex relationship between CHamoru poetry, cultural identity, decolonial politics, diasporic migrations, and Native aesthetics. Perez argues that

contemporary CHamoru poetry articulates new and innovative forms of indigeneity rooted in CHamoru customary arts and values while also routed through the profound and traumatic histories of missionization colonialism militarism and ecological imperialism This book shows that CHamoru poetry has been an inspiring and empowering act of protest resistance and testimony in the decolonization demilitarization and environmental justice movements of Gu han Perez roots his intersectional cultural and literary analyses within the fields of CHamoru studies Pacific Islands studies Native American studies and decolonial studies using his research to assert that new CHamoru literature has been and continues to be a crucial vessel for expressing the continuities and resilience of CHamoru identities This book is a vital contribution that introduces local national and international readers and scholars to contemporary CHamoru poetry and poetics **A**
