Historian's Guide to Early British Maps Helen Wallis, Anita McConnell, 1995-04-06 Great Britain and Ireland enjoy a rich cartographic heritage yet historians have not made full use of early maps in their writings and research This is partly due to a lack of information about exactly which maps are available With the publication of this volume from the Royal Historical Society we now have a comprehensive guide to the early maps of Great Britain The book is divided into two parts part one describes the history and purpose of maps in a series of short essays on the early mapping of the British Isles part two comprises a guide to the collections national and regional Now available from Cambridge University Press this volume provides an essential reference tool for anyone requiring to access maps of the British Isles dating back to the medieval period and beyond *The Local Historian* ,1989 **British Archives** J. Symes, 2016-07-31 The intriguing characters in these real family history mysteries include an agricultural

labourer who left secrets behind in Somerset when he migrated to Manchester a working class woman who bafflingly lost ten of her fourteen children in infancy a miner who purportedly went to live with the Red Indians and a merchant prince of the Empire who was rumoured to have two wives This book shows how a variety of sources including birth marriage and death certificates censuses newspaper reports passports recipe books trade directories diaries and passenger lists were all used to uncover more and how much can be detected by setting the characters from your family tree in their proper historical backgrounds This book is an updated edition of Ruth Symes previous book titled *Stories From Your Family Tree Researching Ancestors Within Living Memory* 2008 Tracing the History of Your House Nick Barratt, 2006-02-02 The second expanded edition of the bestselling guide by TV s Nick Barratt **British Archives** Janet Foster, Julia Sheppard, 1995-09-27 Since it was first published in 1982 British Archives has established itself as the premier reference work to holdings of archives and manuscript collections throughout the UK The 3rd edition has been extensively revised and enlarged with more than 150 new entries further widening the range of the book Entries are structured to show the archives of the organisation as distinct from deposited collections and significant non manuscript material and additional details of fax number and conservation provision are included for the first time All the existing entries have been significantly updated together with the select bibliography and list of useful addresses of various organisations involved in the care and custody of archives The introduction provides an invaluable guide to researchers using archives including a summary of the relevant legislation and a detailed description of the usual holdings of county and other local authority record offices **The Cadastral Map in the Service of the State** Roger J. P. Kain, Elizabeth Baigent, 1992 Throughout history the control of land has been the basis of political power Cadastral maps cartographic records of property ownership played an important role in the rise of modern Europe as tools for the consolidation and extension of land based national power The Cadastral Map in the Service of the State A History of Properly Mapping illustrated with 127 maps traces the development and application of rural property mapping in Europe and European colonies from the Renaissance through the nineteenth century The authors go beyond traditional cartographic research approaching the maps as political instruments rather than as simple geographical or historical tools The result is an unprecedented examination of the political and economic forces behind the production of maps and advances in cartography demonstrating how the seemingly neutral science of cartography became a political instrument for national interests Beginning with a review of the roots of cadastral mapping in the Roman Empire the authors concentrate on the use of cadastral maps in the Netherlands France England the Nordic countries the German lands the territories of the Austrian Habsburgs and the European colonies During the seventeenth century governments began to use maps to secure economic and political bases by the nineteenth century these maps had become tools for aggressive governmental control of land as tax bases natural resources and national territories The culmination of extensive bibliographic and archival research made possible by the authors considerable linguistic skills this work draws from source

materials in ten languages and spanning five centuries It will remain the definitive source on the subject for years to come The Cadastral Map in the Service of the State was awarded the 1991 Kenneth Nebenzahl Prize for the best new manuscript in the history of cartography

Researching Local History Stuart A. Raymond, 2022-09-08 How has the place we live in changed developed and grown over the centuries That is the basic question local historians seek to answer The answer is to be found in the sources of information that previous generations have left us The records of parish county and diocesan administration of the courts of the national government and of private estates all have something to tell us about the history of the locality we are interested in So do old newspapers and other publications All of these sources are readily available but many have been little used Local historians come from a wide diversity of backgrounds But whether you are a student researching a dissertation a family historian interested in the wider background history of your family a teacher a librarian an archivist an academic or are merely interested in the history of your own area this book is for you If you want to research local history you need a detailed account of the myriad sources readily available This book provides a comprehensive overview of those sources and its guidance will enable you to explore and exploit their vast range It poses the questions which local historians ask and identifies the specific sources likely to answer those questions
