Maps In A Mirror:

Maps in a Mirror Orson Scott Card, 2009-11-30 *Maps in a Mirror* brings together nearly all of Orson Scott Card's short fiction written between 1977 and 1990. For those readers who have followed this remarkable talent since the beginning here are all those amazing stories gathered together in one place with some extra surprises as well. For the hundreds of thousands who are newly come to Card here is chance to experience the wonder of a writer so versatile that he can handle everything from traditional narrative poetry to modern experimental fiction with equal ease and grace. The brilliant story telling of the Alvin Maker books is no accident; the breathless excitement evoked by the Ender books is not a once in a lifetime experience. In this enormous volume are forty-six stories plus ten long intensely personal essays unique to this volume. In them the author reveals some of his reasons and motivations for writing with a good deal of autobiography into the bargain. One of the genre's most convincing storytellers. An important volume. Library Journal. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Maps in a Mirror Orson Scott Card, 1992-05 **Rethinking the Power of Maps** Denis Wood, 2010-04-16. A contemporary follow-up to the groundbreaking *Power of Maps*, this book takes a fresh look at what maps do, whose interests they serve, and how they can be used in surprising, creative, and radical ways. Denis Wood describes how cartography facilitated the rise of the modern state and how maps continue to embody and project the interests of their creators. He demystifies the hidden assumptions of mapmaking and explores the promises and limitations of diverse counter-mapping practices today. Thought-provoking illustrations include U.S. Geological Survey maps, electoral and transportation maps, and numerous examples of critical cartography, participatory GIS, and map art.

[The Social Life of Maps in America, 1750-1860](#) Martin Brückner, 2017-10-26. In the age of MapQuest and GPS, we take cartographic literacy for granted. We should not: the ability to find meaning in maps is the fruit of a long process of exposure and instruction. A cartocoded America, a nation in which maps are pervasive and meaningful, had to be created. *The Social Life of Maps* tracks American cartography's spectacular rise to its unprecedented cultural influence. Between 1750 and 1860, maps did more than communicate geographic information and political pretensions; they became affordable and intelligible to ordinary American men and women looking for their place in the world. School maps quickly entered classrooms where they shaped reading and other cognitive exercises; giant maps drew attention in public spaces; miniature maps helped Americans chart personal experiences. In short, maps were uniquely social objects whose visual and material expressions affected commercial practices and graphic arts, theatrical performances, and the communication of emotions. This lavishly illustrated study follows popular maps from their points of creation to shops and galleries, schoolrooms and coat pockets.
